

Exam SC-300 Preview | SC-300 New Learning Materials

SC-300 Assignment Schedule							
Week	Mon	Tue	Wed	Thu	Fri	Sat	Sun
Week 1: Introduction & Identity Fundamentals	Curriculum Review: Overview of SC-300 Exam Structure, Study Approach	Introduction to Entra ID (Azure AD) & Identity Concepts	Understanding Authentication & Authorization (OAuth 2.0, OIDC, SAML)	Managing Entra ID Users, Groups, and Devices	Role-Based Access Control (RBAC) and Privileged Identity Management (PIM)	Lab - Configuring Users, Groups, and Roles in Entra ID	Review & Knowledge Check
Week 2: Implementing and Managing Identity & Access	Configuring and Managing Identity Providers	Implementing and Managing External Identities	Conditional Access Policies & Zero Trust Model	Multi-Factor Authentication (MFA) & Password Protection Strategies	Configuring and Monitoring Entra ID Security Features	Lab - Implementing Conditional Access and MFA	Review & Practice Questions
Week 3: Access Management for Applications	Registering and Managing Applications in Entra ID	Implementing and Managing Application Permissions	Using Enterprise Applications and Service Principals	Understanding and Configuring OAuth 2.0 and OIDC in Entra ID	Securing APIs with Entra ID	Lab - Configuring Application Permissions and API Security	Weekly Review & Practice Test
Week 4: Governance & Compliance	Implementing Access Reviews	Managing Privileged Identity Management (PIM) & Just-in-Time Access	Monitoring and Reporting Entra ID Activities	Integrating Identity Governance with Compliance Policies	Advanced Security Features & Threat Detection	Lab - Configuring Access Reviews and PIM	Final Review & Full-Length Practice Exam

P.S. Free 2026 Microsoft SC-300 dumps are available on Google Drive shared by Test4Sure: https://drive.google.com/open?id=1Nnu0_pw1A7CjtkP322PP09KARLgEvexj

We promise you that if you fail to pass your exam after using SC-300 exam materials, we will give you refund. We are pass guarantee and money back guarantee. Moreover, SC-300 training materials cover most of knowledge points for the exam, and you can master the major knowledge points as well as improve your professional ability after practicing. SC-300 Exam Materials contain both questions and answers, and it's convenient for you to have a quickly check after practicing. We also have online and offline chat service, if you have any questions about SC-300 exam dumps, you can consult us.

Microsoft SC-300 Exam Syllabus Topics:

Section	Weight	Objectives
Topic 1: Plan and automate identity governance	20–25%	- Implement entitlement management 1. External user access governance 2. Access packages, catalogs, and requests 3. Lifecycle workflows and terms of use
		- Manage privileged access
		- Monitor and report identities
Topic 2: Implement and manage user identities	25–30%	1. Audit logs and sign-in logs 2. Usage analytics and reports 3. Identity monitoring and alerting
		- Manage identity lifecycle 1. Create, modify, and delete identities 2. Bulk operations and synchronization 3. Directory objects and administrative units
		- Plan and implement identity strategy 1. Manage users, groups, and devices 2. License management and directory configuration 3. Manage external identities and cross-tenant access

		- Implement authentication methods • 1. MFA, SSPR, and passwordless authentication • 2. Certificate-based authentication and FIDO2 • 3. Windows Hello for Business and temporary access pass - Manage identity protection • 1. Risk investigation and remediation • 2. User risk and sign-in risk policies • 3. Workload identity protection - Plan and implement Conditional Access • 1. Policy design, assignments, and controls • 2. Protected actions and policy troubleshooting • 3. Continuous access evaluation and authentication context - Secure application access • 1. Access control for SaaS and custom apps • 2. Application proxy and on-premises publishing • 3. Defender for Cloud Apps integration
Topic 3: Implement authentication and access management	25–30%	
Topic 4: Plan and implement workload identities	20–25%	- Manage application access • 1. Permissions, consent, and application roles • 2. App registrations and enterprise applications • 3. Service principals and managed identities

SC-300 New Learning Materials | SC-300 Interactive EBook

Our product backend port system is powerful, so it can be implemented even when a lot of people browse our website can still let users quickly choose the most suitable for his Microsoft Identity and Access Administrator qualification question, and quickly completed payment. It can be that the process is not delayed, so users can start their happy choice journey in time. Once the user finds the learning material that best suits them, only one click to add the SC-300 study tool to their shopping cart, and then go to the payment page to complete the payment, our staff will quickly process user orders online. In general, users can only wait about 5-10 minutes to receive our SC-300 learning material, and if there are any problems with the reception, users may contact our staff at any time. To sum up, our delivery efficiency is extremely high and time is precious, so once you receive our email, start your new learning journey.

Microsoft Identity and Access Administrator Sample Questions (Q394-Q399):

NEW QUESTION # 394

You have a Microsoft 365 tenant.

You need to identify users who have leaked credentials. The solution must meet the following requirements.

* Identify sign-ins by users who ate suspected of having leaked credentials.

* Rag the sign-ins as a high risk event.

* Immediately enforce a control to mitigate the risk, while still allowing the user to access applications.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

To classify leaked credentials as high-risk, use:

Azure Active Directory (Azure AD) Identity Protection
Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
Identity Governance
Self-service password reset (SSPR)

To trigger remediation, use:

Client apps not using Modern authentication
Device state
Sign-in risk
User location
User risk

To mitigate the risk, select:

Apply app enforced restrictions
Block access
Grant access but require app protection policy
Grant access but require password change

Answer:

Explanation:

To classify leaked credentials as high-risk, use:

Azure Active Directory (Azure AD) Identity Protection
Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
Identity Governance
Self-service password reset (SSPR)

To trigger remediation, use:

Client apps not using Modern authentication
Device state
Sign-in risk
User location
User risk

To mitigate the risk, select:

Apply app enforced restrictions
Block access
Grant access but require app protection policy
Grant access but require password change

NEW QUESTION # 395

You have an Azure AD tenant that has multi-factor authentication (MFA) enforced and self-service password reset (SSPR) enabled.

You enable combined registration in interrupt mode.

You create a new user named User1.

Which two authentication methods can User1 use to complete the combined registration process? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Windows Hello for Business
- B. a hardware token
- C. a FIDO2 security key
- D. a one-time passcode email
- E. the Microsoft Authenticator app

Answer: C,E

NEW QUESTION # 396

You have a Microsoft 365 E5 subscription. You need to perform the following tasks:

- * Identify the locations and IP addresses used by Azure AD users to sign in
- * Review the Azure AD security settings and identify improvement recommendations.
- * Identify changes to Azure AD users or service principle.

What should you use for each task? To answer, drag the appropriate resources to the correct requirements.

Each resource may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Resources

- Audit logs
- Identity secure score
- Provisioning logs
- Sign-in logs

Answer Area

Identify the locations and IP addresses used by Azure AD users to sign in:

Identify changes to Azure AD users or service principals:

Review the Azure AD security settings and identify improvement recommendations:

Answer:

Explanation:

Resources

- Audit logs
- Identity secure score
- Provisioning logs
- Sign-in logs

Answer Area

Identify the locations and IP addresses used by Azure AD users to sign in:

Identify changes to Azure AD users or service principals:

Review the Azure AD security settings and identify improvement recommendations:

Explanation:

Resources

- Audit logs
- Identity secure score
- Provisioning logs
- Sign-in logs

Answer Area

Identify the locations and IP addresses used by Azure AD users to sign in:

Identify changes to Azure AD users or service principals:

Review the Azure AD security settings and identify improvement recommendations:

NEW QUESTION # 397

You have a Microsoft 365 E5 subscription that contains three users named User1, User2, and User3.

You have two Azure AD roles that have the Activation settings shown in the following table.

Name	Required justification on activation	Require approval to activate	Approvers
Role1	No	Yes	User1
Role2	Yes	No	None

The Azure AD roles have the Assignment settings shown in the following table.

Role	Allow permanent eligible assignment	Allow Permanent activate assignment	Require justification on active assignment
Role1	Yes	Yes	Yes
Role2	No	Yes	Yes

The Azure AD roles have the eligible users shown in the following table.

Role	Eligible assignment
Role1	User1, User2
Role2	User3

For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Statements	Yes	No
If User1 requests Role1, the request will be approved automatically.	☐	☐
User1 can approve the request of User3 for Role2.	☐	☐
User1 must provide justification to approve the request of User2 for Role1.	☐	☐

Answer:

Explanation:

Statements	Yes	No
If User1 requests Role1, the request will be approved automatically.	☐	☒
User1 can approve the request of User3 for Role2.	☐	☒
User1 must provide justification to approve the request of User2 for Role1.	☒	☐

Explanation:

Statement

Yes / No

If User1 requests Role1, the request will be approved automatically.

No

User1 can approve the request of User3 for Role2.

No

User1 must provide justification to approve the request of User2 for Role1.

Yes

According to the Microsoft SC-300 study guide, Exam Ref SC-300, and Microsoft Entra Privileged Identity Management (PIM) documentation, role activation and assignment settings in Azure AD PIM determine who can activate roles, who can approve activations, and whether justification is required. Let's analyze each configuration step-by-step.

Role1 Configuration Summary Setting

Value

Required justification on activation

No

Require approval to activate

Yes

Approvers

User1

Allow permanent eligible assignment

Yes

Allow permanent active assignment

Yes

Require justification on active assignment

Yes

Eligible Assignments: User1, User2

Role2 Configuration Summary Setting

Value

Required justification on activation

Yes

Require approval to activate

No

Approvers

None

Allow permanent eligible assignment

No

Allow permanent active assignment

Yes

Require justification on active assignment

Yes

Eligible Assignments: User3

Statement 1: "If User1 requests Role1, the request will be approved automatically."

* Role1 requires approval to activate.

* The approver is User1, but a user cannot self-approve their own request in Azure AD PIM.

* Therefore, even though User1 is listed as an approver, the system does not automatically approve self- requests.

Answer: No

Statement 2: "User1 can approve the request of User3 for Role2."

* Role2 does not require approval to activate (approval = No).

* User3 is the only eligible member for Role2 and can activate it directly.

* Hence, no approval action exists for User1.

Answer: No

Statement 3: "User1 must provide justification to approve the request of User2 for Role1."

* Role1 requires approval to activate, and User1 is the approver.

* The assignment settings for Role1 state: Require justification on active assignment = Yes.

* This means when approving or activating, the approver (User1) must enter a justification before approval.

Answer: Yes

NEW QUESTION # 398

You have a Microsoft 365 subscription that contains a Microsoft SharePoint Online site named Site1 and a Microsoft 365 group named Group1. You need to ensure that the members of Group1 can access Site1 for 90 days. The solution must minimize administrative effort. What should you use?

- A. an access review
- **B. an access package**
- C. a Conditional Access policy
- D. a lifecycle workflow

Answer: B

NEW QUESTION # 399

.....

Our company aimed to provide you with professional team, high quality service and reasonable price on our SC-300 exam questions. In order to help most customers solve their problems, our company always insist on putting them first and providing valued service on our SC-300 training braindump. It has helped so many candidates passed their SC-300 exam. We deeply believe that the SC-300 test torrent of our company will help you pass the SC-300 exam and get your certification successfully in a short time too.
