問題 #19

The Level 1 practice description in CMMC is Foundational. What is the Level 2 practice description?

- A. Advanced
- B. Optimizing
- C. Expert

- D. Continuously Improved

答案： A

解題說明：

Understanding CMMC 2.0 Levels and Their Descriptions The Cybersecurity Maturity Model Certification (CMMC) 2.0 consists of three levels, each representing increasing cybersecurity maturity:

Level 1 - Foundational

Focuses on basic cyber hygiene

Implements 17 practices aligned with FAR 52.204-21

Primarily protects Federal Contract Information (FCI)

Level 2 - Advanced (Correct Answer)

Focuses on protecting Controlled Unclassified Information (CUI)

Implements 110 practices aligned with NIST SP 800-171

Requires triennial third-party assessments for critical programs

Level 3 - Expert

Focuses on advanced cybersecurity against APT (Advanced Persistent Threats) Implements NIST SP 800-171 and additional NIST

SP 800-172 controls Requires triennial government-led assessments The CMMC 2.0 framework explicitly describes Level 2 as

"Advanced." It aligns with NIST SP 800-171 to ensure robust CUI protection.

A). Expert (Incorrect)- This describes Level 3, not Level 2.

C). Optimizing (Incorrect)- Not a defined CMMC level description.

D). Continuously Improved (Incorrect)- CMMC does not use this terminology.

The correct answer is B. Advanced, which accurately describes CMMC Level 2.

問題 #20

Which document is the BEST source for descriptions of each practice or process contained within the various CMMC domains?

- A. CMMC Glossary
- **B. CMMC Assessment Process**
- C. CMMC Appendices
- D. CMMC Assessment Guide Levels 1 and 2

答案： B

問題 #21

During the planning phase of a CMMC Level 2 Assessment, the Lead Assessor is considering what would constitute the right evidence for each practice. What is the Assessor attempting to verify?

- A. Adequacy
- B. Assessment scope
- C. Process mapping
- **D. Sufficiency**

答案： D

問題 #22

A C3PAO is near completion of a Level 2 Assessment for an OSC. The CMMC Findings Brief and CMMC Assessment Results documents have been developed. The Final Recommended Assessment Results are being generated. When generating these results, what MUST be included?

- A. Recorded and final updated Daily Checkpoint
- B. Fully executed CMMC Assessment contract between the C3PAO and the OSC
- C. An updated Assessment Plan

- D. Review documentation for the CMMC Quality Assurance Professional (CQAP)

答案：D

解題說明：

- * AC3PAO (Certified Third-Party Assessment Organization) is responsible for conducting CMMC Level 2 assessments.
- * After completing the assessment, the C3PAO generates the Final Recommended Assessment Results, which include key documentation reviewed by the CMMC Quality Assurance Professional (CQAP) for quality control.

Reference:

CMMC Assessment Process (CAP) Guide

Step 2: Role of the CMMC Quality Assurance Professional (CQAP) The CQAP is responsible for reviewing assessment documentation to ensure it aligns with CMMC requirements and DoD expectations.

Before finalizing the assessment results, the C3PAO must include documentation for CQAP review to maintain compliance.

Step 3: Why Other Answer Choices Are Incorrect A. An updated Assessment Plan (Incorrect):

The Assessment Plan is developed before the assessment begins, not during the final recommended results phase.

B: Recorded and final updated Daily Checkpoint (Incorrect):

Daily Checkpoints are internal tracking tools used during assessments, but they are not mandatory for final results.

C: Fully executed CMMC Assessment contract between the C3PAO and the OSC (Incorrect):

While a contract is required for the assessment, it is not part of the Final Recommended Assessment Results.

Final Confirmation of Correct Answer: Review documentation for the CMMC Quality Assurance Professional (CQAP) must be included in the Final Recommended Assessment Results.

Thus, the correct answer is: D. Review documentation for the CMMC Quality Assurance Professional (CQAP)

問題 #23

In performing scoping, what should the assessor ensure that the scope of the assessment covers?

- A. All entities, regardless of the line of business, associated with the organization
- B. All assets documented in the business plan
- C. All assets regardless if they do or do not process, store, or transmit FCI/CUI
- D. All assets processing, storing, or transmitting FCI/CUI and security protection assets

答案：D

解題說明：

Scoping Requirements in CMMC Assessments The CMMC 2.0 Scoping Guide and CMMC Assessment Process (CAP) Document clearly define what should be included in the scope of an assessment.

The assessment scope must cover:

- * All assets that process, store, or transmit FCI/CUI
- * Security Protection Assets (ESP)- these assets help protect FCI/CUI, such as firewalls, endpoint detection systems, and encryption mechanisms.

Thus, the correct scope includes both:

#FCI/CUI Assets (Data storage, processing, or transmission assets)

#Security Protection Assets (ESP) (Firewalls, security tools, etc.)

* A. All assets documented in the business plan #Incorrect. Business plans may include assets unrelated to FCI/CUI, making this scope too broad. Only assets relevant to FCI/CUI should be assessed.

* B. All assets regardless if they do or do not process, store, or transmit FCI/CUI #Incorrect. CMMC does not require organizations to include assets that have no connection to FCI/CUI.

* C. All entities, regardless of the line of business, associated with the organization #Incorrect. Only the assets relevant to FCI/CUI or security protection should be assessed. Unrelated business divisions (like a non-federal commercial division) are out-of-scope.

Why the Other Answers Are Incorrect

* CMMC 2.0 Scoping Guide - Level 1 & Level 2

* CMMC Assessment Process (CAP) Document

CMMC Official References Thus, option D (All assets processing, storing, or transmitting FCI/CUI and security protection assets) is the correct answer as per official CMMC assessment scoping requirements.
