# NCP-CN Exams, Test NCP-CN Simulator Online

2026 Latest Dumpexams NCP-CN PDF Dumps and NCP-CN Exam Engine Free Share: https://drive.google.com/open?id=1fYJ0cPDJDTXF1UYbHOQLSj0h_5MjcbWo

With the best quality and high accuracy, our NCP-CN vce braindumps are the best study materials for the certification exam among the dumps vendors. Our experts constantly keep the pace of the current exam requirement for NCP-CN Actual Test to ensure the accuracy of our questions. The pass rate of our NCP-CN exam dumps almost reach to 98% because our questions and answers always updated according to the latest exam information.

## Nutanix NCP-CN Exam Syllabus Topics:

| Topic | Details |
|---|---|
| Topic 1 | • Perform Day 2 Operations: This part assesses the expertise of site reliability engineers and cluster operators in ongoing cluster management tasks after deployment. It includes configuring authentication and authorization mechanisms, setting up logging systems, and implementing cluster backup and recovery procedures. Candidates also need to demonstrate skills in monitoring cluster performance and health, configuring autoscaling to handle workload changes, and performing lifecycle management functions such as upgrades and maintenance. |
| Topic 2 | • Prepare the Environment for an NKP Deployment: This section of the exam measures the skills of infrastructure engineers and cloud administrators and covers the initial setup tasks needed for NKP deployment. Candidates must demonstrate the ability to seed a private container registry, create a bootstrap Kubernetes cluster, and determine license tiers suitable for clusters. They also need to prepare a bastion host for secure access, build machine images or prepare nodes for deployment, and gather all necessary information to build a cluster on the target cloud or on-premises provider. |
| Topic 3 | • Manage Building an NKP Cluster: This section evaluates the skills of Kubernetes administrators and platform engineers in customizing and deploying NKP clusters. Candidates must show proficiency in tailoring cluster configurations to meet specific requirements and deploying Kommander, the management platform, while applying the appropriate licenses to enable cluster features and management capabilities. |
| Topic 4 | • Conduct NKP Fleet Management: This section tests the abilities of platform administrators and cloud operations engineers in managing multiple clusters as a fleet. It focuses on configuring workspaces to organize clusters, deploying workload clusters within these workspaces, and attaching or detaching clusters as needed. Additionally, candidates must be able to configure projects for workload segmentation and manage platform applications that support the overall NKP environment. |

## Test NCP-CN Simulator Online - NCP-CN Test Lab Questions

# Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q40-Q45):

**NEW QUESTION # 40**
A Platform Engineer for an organization needs to deploy NKP into AWS while using custom credentials for authenticating. Which flag should the engineer use when starting to bootstrap the cluster installation?

- A. --cloud-credentials=<my-profile><br>
- B. --aws-access-key=<aws access="" key=""> --aws-secret-key=<aws secret="" key=""></aws></aws></my-profile></my-profile>
- C. --aws-profile=<my-profile><br>
- D. --with-aws-bootstrap-credentials=true<br>

**Answer: C**

**NEW QUESTION # 41**
A Platform Engineer needs to do an air-gapped installation of NKP. This environment needs to run without Internet access and be fully operational, including updates. Docker has been installed, and the NKP bundle exists on a bastion host. What is the first command that the engineer must run to begin the process?

- A. nkp push bundle --bundle
- B. nkp create cluster nutanix
- C. docker load -i konvoy-bootstrap-image-v2.12.0.tar
- D. tar -xzvf nkp-air-gapped-bundle_v2.12.0_linux_amd64.tar.gz

**Answer: D**

**NEW QUESTION # 42**
An organization is setting up a new set of NKP clusters for R&D. The R&D director requires full admin access for the team on infrastructure dedicated to R&D.
What is the proper method for the engineer to ensure these objectives are met?

- A. Create an 'R&D' NKP connector and infrastructure providerCreate an 'R&D' NKP group and assign it admin-level rolesAssign the 'R&D' NKP group to the 'R&D' NKP infrastructure providerDeploy the NKP clusters into the 'R&D' workspace
- B. Create an 'R&D' NKP workspaceCreate an 'R&D' infrastructure provider in this workspaceCreate an 'R&D' NKP group for the R&D team members and assign admin-level roles withinDeploy the NKP clusters into the 'R&D' workspace
- C. Create an 'R&D' NKP connector and infrastructure providerCreate an 'R&D' NKP group and assign it admin-level rolesAssign the 'R&D' NKP group to the 'R&D' NKP connectorDeploy the NKP clusters into the 'R&D' workspace
- D. Create an 'R&D' NKP workspace and project within this workspaceCreate an NKP infrastructure provider in the 'R&D' NKP projectCreate an 'R&D' NKP group for the R&D team members and assign admin-level roles within this projectDeploy the NKP clusters into the 'R&D' workspace

**Answer: B**

**NEW QUESTION # 43**
A Platform Engineer is deploying an NKP cluster within an air-gapped AWS environment. However, after an infrastructure planning session with the network team, it's been determined that the default CIDR block range that is used by pods on NKP clusters is already in use in their environment.
How can the engineer ensure there are no collisions between NKP pod traffic and the existing network using that subnet range?

- A. Because the environment is air-gapped, there will be no network traffic collision concerns and no adjustment needs to be

made to the pod network CIDR block range.
- B. Create an NKP infrastructure provider for AWS in the NKP UI.When deploying the NKP cluster through the UI, specify a unique CIDR block range for the pod network field in the Network section of the Create Cluster page.
- C. Create the NKP cluster's manifest using the nkp create cluster command set and include the pod CIDR block range parameter when generating the cluster manifest.Deploy the NKP cluster manifest.
- D. Create an NKP infrastructure provider for AWS in the NKP UI.Select the Advanced Options button from the Network section of the Create Cluster page and specify a unique CIDR block range within the pod network field.

**Answer: C**

**NEW QUESTION # 44**
A Kubernetes administrator needs to deploy a new NKP deployment for a DR Datacenter. Cluster information:
AOS 6.10
Hypervisor is AHV
Six NX-8170-G9 NodesWhich command should the administrator use to invoke the prompt-based CLI deployment method?

- A. nkp create cluster ahv
- B. nkp create cluster nutanix
- C. nkp install kommander
- D. nkp create nodepool nutanix

**Answer: A**

**NEW QUESTION # 45**
......

It is indeed not easy to make a decision. NCP-CN study engine is willing to give you a free trial. If you have some knowledge of our NCP-CN training materials, but are not sure whether it is suitable for you, you can email us to apply for a free trial version. You know, we have provided three versions of NCP-CN practice quiz: the PDF, Software and APP online. Accordingly, we have three free trial versions as well.
