## Free PDF Quiz 2026 Marvelous Salesforce Valid Sharing-and-Visibility-Architect Dumps

You can directly refer our Salesforce Sharing-and-Visibility-Architect study materials to prepare the exam. Once the newest test syllabus is issued by the official, our experts will quickly make a detailed summary about all knowledge points of the real Salesforce Sharing-and-Visibility-Architect Exam in the shortest time. All in all, our Sharing-and-Visibility-Architect exam quiz will help you grasp all knowledge points.

## Salesforce Certified Sharing and Visibility Architect Sample Questions (Q22-Q27):

### NEW QUESTION # 22

The Finance team at Universal Containers usually does not need access to Account and Contract records A given Opportunity access for a big deal to help with tax calculation. She can now also access Account and C. Which two reasons could be causing this issue? Choose 2 answers

- A. Account records can be accessed due to implicit sharing from Opportunity.
- B. Contact records can be accessed due to implicit sharing from Account.
- C. Account records can be access due to role hierarchy.
- D. Contact records can be accessed due to implicit sharing from Opportunity.

**Answer: A**

### NEW QUESTION # 23

Sales operations at Universal Containers (UC) wants to create list views to filter opportunities for certain geographies. How should UC hide list views that are not relevant to an individual user since there will be more than 50 list views?

- A. Share the list views with the appropriate role and internal subordinates.
- B. Share the list views with the appropriate individual users.
- C. Share the list views with the appropriate queue.

#### Answer: A

Explanation:

\* List View Sharing: Salesforce allows list views to be shared with roles, roles and subordinates, public groups, or individual users. To manage visibility of list views for users effectively, sharing with roles and internal subordinates ensures only relevant users within the organizational hierarchy see the list views.

\* Why Option A is Correct:

\* Sharing with roles and internal subordinates limits access to users in specific roles and their reporting lines, reducing clutter for irrelevant users.

\* This method is scalable for organizations with many list views and users.

\* Why Others Are Incorrect:

\* Option B: Sharing with individual users is not scalable when there are numerous list views and users.

\* Option C: Queues are not used to manage list view sharing in this scenario.

For more details, refer to Salesforce documentation on managing list view visibility: <https://help.salesforce.com/>

### NEW QUESTION # 24

Universal Containers (UC) service reps are assigned to a profile which has View All on the Case object. The organization-wide default (OWD) for the Account and Case objects is Private.

To make sure service reps have access to all relevant information (Accounts and Contacts) to attend to customer requests, which detail should an architect consider?

- A. Service reps will NOT be able to access the relevant Contacts if their OWD is Controlled by Parent.
- B. Service reps will be able to access the relevant Contacts if their OWD is Controlled by Parent.
- C. Service reps will NOT be able to access the relevant Accounts if their OWD is Private.

#### Answer: B

Explanation:

\* OWD Settings and Access Control:

\* When the OWD for Contacts is "Controlled by Parent," access to the Contact is determined by access to the related Account.

\* Why Option C is Correct:

\* Service reps have "View All" permission on Cases, granting them access to related Accounts.

Since Contacts are controlled by the parent Account, service reps also gain access to relevant Contacts.

\* Why Others Are Incorrect:

\* Option A: Service reps can access Accounts related to Cases they can view, even if the OWD is Private.

\* Option B: Contacts controlled by the parent are accessible as long as the parent Account is accessible.

For detailed guidance, see Salesforce documentation on OWD and Controlled by Parent: <https://help.salesforce.com/>

### NEW QUESTION # 25

To grant Universal Containers sales managers access to shipment records properly, it was necessary to leverage Apex managed sharing. The IT team is worried about improper access to records.

What should an architect recommend to mitigate this risk?

- A. Use isSharesble keyword in Apex classes to assure record visibility will be followed.
- B. Use isAccessible keyword in Apex classes to assure record visibility will be followed.
- C. Use runAs system method in test classes to test using different users and profiles.

## Answer: C

Explanation:

- \* Testing Apex Managed Sharing:
- \* Properly testing Apex managed sharing involves using the runAs() method to simulate different user contexts and validate access and sharing behavior.
- \* Why Option B is Correct:
  - \* The runAs() method allows testing of record-level access by running code in the context of specific users, ensuring that Apex sharing logic behaves as intended.
- \* Why Others Are Incorrect:
  - \* Option A: The isShareable keyword does not exist in Apex.
  - \* Option C: isAccessible is used to check field-level security, not record visibility.

For more information, refer to Salesforce Testing Best Practices: <https://help.salesforce.com/>

## NEW QUESTION # 26

Jane, a support representative at Universal Containers, created a report to view all her open cases that have been created in the past 7 days and saved the report in the "Private Reports" folder.

Who can view and run the report?

- A. The report owner and anybody in the role hierarchy above the report owner
- **B. The report owner**
- C. The report owner and users with the "View All Data" permission
- D. The report owner and any users who have been given access to the "My Private Reports" folder

## Answer: B

Explanation:

Explanation

The report owner is the only one who can view and run the report that is saved in the "Private Reports" folder.

Option A is incorrect, since there is no such thing as the "My Private Reports" folder in Salesforce. Option B is incorrect, since the role hierarchy does not affect the access to private reports. Option D is incorrect, since the "View All Data" permission does not grant access to private reports.

## NEW QUESTION # 27

.....

It is not easy to qualify for a qualifying exam in such a short period of time. Our company's Sharing-and-Visibility-Architect learning material is very good at helping customers pass the exam and obtain a certificate in a short time, and now I'm going to show you our Sharing-and-Visibility-Architect Learning materials.
