

Helpful Features of CompTIA 220-1202 Dumps PDF Format

BONUS!!! Download part of Lead2PassExam 220-1202 dumps for free: <https://drive.google.com/open?id=1nzGuJnGZUyL7J0J775kouv5dMLqQmiY0>

We update our CompTIA 220-1202 exam dumps over time and mark the changes online. Enroll in the CompTIA 220-1202 exam dumps and start your preparation with CompTIA 220-1202 practice questions. We will provide you with the information covered in the current test and incorporate materials that originate from CompTIA 220-1202 Exam Dumps. You will get a handful of knowledge about topics that will benefit your professional career.

We have authoritative production team made up by thousands of experts helping you get hang of our CompTIA A+ Certification Exam: Core 2 study question and enjoy the high quality study experience. We will update the content of 220-1202 test guide from time to time according to recent changes of examination outline and current policies, so that every examiner can be well-focused and complete the exam focus in the shortest time. Besides, our 220-1202 Exam Questions can help you optimize your learning method by simplifying obscure concepts so that you can master better. One more to mention, with our 220-1202 test guide, there is no doubt that you can cut down your preparing time in 20-30 hours of practice before you take the exam.

Pass Guaranteed 2026 CompTIA 220-1202: CompTIA A+ Certification Exam: Core 2 First-grade Valid Test Prep

By propagating all necessary points of knowledge available for you, our 220-1202 study materials helped over 98 percent of former exam candidates gained successful outcomes as a result. Our 220-1202 exam questions have accuracy rate in proximity to 98 and over percent for your reference. And it is unique and hard to find in the market as our 220-1202 training guide. Besides, our price of the 220-1202 practice engine is quite favourable.

CompTIA A+ Certification Exam: Core 2 Sample Questions (Q180-Q185):

NEW QUESTION # 180

A user recently installed an application that accesses a database from a local server. When launching the application, it does not

populate any information. Which of the following command- line tools is the best to troubleshoot the issue?

- A. nslookup
- B. ipconfig
- C. netstat
- D. curl

Answer: C

Explanation:

netstat reveals active network connections and listening ports on the local machine. By using it, you can confirm that the application has successfully opened (or attempted) a connection to the database server's port, verify the remote server's address and port, and detect any failed or hanging TCP sessions that would prevent data retrieval.

NEW QUESTION # 181

A technician is deploying mobile devices and needs to prevent access to sensitive data if the devices are lost. Which of the following is the best way to prevent unauthorized access if the user is unaware that the phone is lost?

- A. Remote wipe
- B. Encryption
- C. Facial recognition
- D. Geofencing

Answer: A

Explanation:

Remote wipe is the best option to prevent unauthorized access to data when a mobile device is lost or stolen- especially if the user is unaware of the loss. It allows administrators or mobile device management (MDM) systems to remotely erase all data on the device, rendering it unusable for unauthorized users.

- A). Encryption protects the data, but if the device remains powered and logged in, it may still be accessible.
- C). Geofencing can restrict features based on location but does not erase data.
- D). Facial recognition helps secure access but can be bypassed in some cases or fail in practical situations.

Study Guide Section: Mobile device security (remote wipe, lockout, MDM tools)

NEW QUESTION # 182

Various alerts on a user's Windows 11 laptop are continually interrupting the user during videoconference calls. Which of the following should a support technician recommend to best solve the issue?

- A. Use multiple sound output devices for the various source applications
- B. Disable all notifications in different applications in the order they appear
- C. Configure the Sounds option in Control Panel to be set to No Sounds
- D. Set Windows Notifications settings to Do Not Disturb

Answer: D

Explanation:

Windows 11 features a "Do Not Disturb" mode under Notification settings, which is designed to suppress interruptions during tasks like videoconferencing.

NEW QUESTION # 183

An end user sees frequent onscreen messages from a retail site they visited a week ago. A technician investigates and determines that the pop-up blocker is turned on. Which of the following should the technician do next?

- A. Turn off notifications in the browser
- B. Clear the browser cache
- C. Uninstall and reinstall the browser

- D. Reset the browser to its default settings

Answer: A

Explanation:

The correct answer is B. Turn off notifications in the browser, because the described behavior matches browser notification abuse, not traditional pop-ups. Modern browsers allow websites to request permission to send notifications. If a user previously allowed notifications from a retail site, the site can continue sending onscreen alerts even when pop-up blockers are enabled.

According to the Quentin Docter - CompTIA A+ Complete Study Guide, browser notification permissions are separate from pop-up blocking settings. Pop-up blockers prevent new browser windows or tabs from opening, but they do not block push notifications that were previously approved by the user. These notifications can persist long after visiting a site.

The Travis Everett & Andrew Hutz - All-in-One Exam Guide explains that one of the first troubleshooting steps for repeated browser messages is to review and disable site notification permissions. This directly targets the root cause without affecting browser configuration or user data.

The Mike Meyers / Mark Soper Lab Manual reinforces that resetting or reinstalling the browser is an excessive step unless configuration corruption is suspected. Clearing cache removes stored files but does not revoke notification permissions.

Because the messages originate from previously allowed browser notifications, the most appropriate and targeted fix is to disable notifications in the browser, making B the correct answer.

NEW QUESTION # 184

A technician notices that the weekly backup is taking too long to complete. The daily backups are incremental. Which of the following would most likely resolve the issue?

- A. Performing incremental weekly backups
- B. Increasing the backup storage
- C. Running synthetic full weekly backups
- D. Changing the backup window

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A synthetic full backup combines the last full backup with subsequent incremental backups to create a new full backup without re-reading data from the source system. This method significantly reduces the backup window and network impact. It is especially useful when traditional full backups are too time-consuming.

A: Changing the backup window only shifts timing, not duration.

B: Incremental weekly backups would lack a proper full recovery point and aren't ideal alone.

C: Storage space isn't the bottleneck in backup speed-it's read/write operations and network load.

Reference:
