## IIA Business Knowledge for Internal Auditing Sample Questions (Q30-Q35):

### NEW QUESTION # 30

The audit committee of a global corporation has mandated a change in the organization's business ethics policy. Which of the following approaches describes the best way to accomplish the policy's diffusion worldwide?

- A. Send the board-approved version of the policy to each country's senior leadership, and empower them to tailor the policy to the local language and culture.
- **B. Consult with legal and operational management in each affected country to ensure the final version can be implemented globally, following audit committee approval.**
- C. Deploy the policy in the corporate headquarters' language, so everyone gets an unfiltered version simultaneously.

- D. Introduce the policy region by region, using any lessons learned to change the subsequent version of the policy for the next area.

**Answer: B**

#### NEW QUESTION # 31

Which of the following best describes the concept of relevant cost?

- A. A past cost that differs among alternatives.
- B. A future cost that is the same among alternatives.
- C. A past cost that is the same among alternatives.
- D. A future cost that differs among alternatives.

**Answer: D**

#### NEW QUESTION # 32

Which of the following network types should an organization choose if it wants to allow access only to its own personnel?

- A. An intranet.
- B. A local area network (LAN).
- C. The internet.
- D. An extranet.

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

An intranet is a private network used by an organization for internal communication and information sharing among employees. It is accessible only to authorized personnel within the company.

Option A (Extranet) - Allows external parties (e.g., suppliers, partners) to access limited information.

Option B (LAN) - Refers to a network infrastructure rather than controlled access.

Option D (Internet) - Is public and not restricted to internal personnel.

Thus, Option C (Intranet) is the correct answer as it ensures access only to organizational personnel.

#### NEW QUESTION # 33

The following data are available from the records of a department store for the year ended December 31, Year 1:

	At cost	At retail
Merchandise inventory, as of January 1, Year 1	US \$ 9,000	US \$13,000
Purchases	33,000	46,000
Markups (net)		1,000
Markdowns (net)		4,000
Sales		48,000

Using the retail method to approximate valuation at lower of average cost or net realizable value, the department store's merchandise inventory at December 31, Year 1 is

- A. US \$5,600
- B. US T3,900
- C. Ur \$6,000]
- D. US \$8,400

**Answer: A**

Explanation:

The version of the retail method that approximates a lower-of-average-cost-or-NRV valuation includes markups but not markdowns in the cost-to-retail ratio. Thus, the cost of the inventory at December 31, Year 1 is US \$5,600.

Inventory, January 1, Year 1	<b>Cost</b>	<b>Retail</b>
Purchases	US \$ 9,000	US \$ 13,000
Markups, net	33,000	46,000
		1,000
Sales	US \$42,000	60,000
Markdowns, net		(48,000)
		(4,000)
Inventory at retail, December 31, Year 1		8,000
Cost-to-retail ratio (US \$42,000 ÷ \$60,000)		× .70
Inventory at cost, December 31, Year 1		US \$ 5,600

#### NEW QUESTION # 34

Which of the following characteristics distinguishes computer processing from manual processing?

- A. Errors or fraud in computer processing will be detected soon after their occurrence.
- B. The potential for systematic errors is ordinarily greater in manual processing than in computerized processing.
- C. Computer processing virtually eliminates the occurrence of computational error normally associated with manual processing.
- D. Most computer systems are designed so that transaction trails useful for audit purposes do not exist.

**Answer: C**

Explanation:

Computer processing uniformly subjects like transactions to the same processing instructions. A computer program defines the processing steps to accomplish a task. Once the program is written and tested appropriately, it will perform the task repetitively and without error. However, if the program contains an error, all transactions will be processed incorrectly.

#### NEW QUESTION # 35
