For we promise to give all of our customers one year free updates of our AWS-SysOps exam questions and we update our AWS-SysOps Study Guide fast and constantly. Do not miss the opportunity to buy the best AWS-SysOps preparation questions in the international market which will also help you to advance with the times.

The AWS-SysOps or the AWS Certified SysOps Administrator - Associate exam is designed for system administrators who want to validate their skills and knowledge in deploying, managing, and operating applications on the AWS platform. AWS-SysOps exam is intended for professionals who are responsible for provisioning, managing, and operating systems, as well as monitoring and troubleshooting production environments on AWS.

To become an AWS Certified SysOps Administrator - Associate, candidates must have experience in deploying, managing, and operating highly scalable, fault-tolerant, and distributed systems on the AWS platform. They should also have a good understanding of AWS services, architecture, and best practices.

The AWS-SysOps Certification is designed for IT professionals who have experience in deploying, managing, and operating AWS systems. It is ideal for system administrators, operations managers, and IT professionals who are responsible for the day-to-day operations of AWS systems. AWS Certified SysOps Administrator - Associate certification enhances the candidate's profile, validates their skills, and makes them stand out in the competitive job market.

You may be taken up with all kind of affairs, and sometimes you have to put down something and deal with the other matters for the latter is more urgent and need to be done immediately. With the help of our AWS-SysOps training guide, your dream won't be delayed anymore.

## Amazon AWS Certified SysOps Administrator - Associate Sample Questions (Q518-Q523):

### NEW QUESTION # 518

A user has configured an Auto Scaling group with ELB. The user has enabled detailed CloudWatch monitoring on Auto Scaling. Which of the below mentioned statements will help the user understand the functionality better?

- A. In this case, Auto Scaling will send data every minute and will charge the user extra
- B. Auto Scaling sends data every minute only and does not charge the user

- C. It is not possible to setup detailed monitoring for Auto Scaling
- D. Detailed monitoring will send data every minute without additional charges

**Answer: A**

Explanation:

CloudWatch is used to monitor AWS as well as the custom services. It provides either basic or detailed monitoring for the supported AWS products. In basic monitoring, a service sends data points to CloudWatch every five minutes, while in detailed monitoring a service sends data points to CloudWatch every minute. Auto Scaling includes 7 metrics and 1 dimension, and sends data to CloudWatch every 5 minutes by default. The user can enable detailed monitoring for Auto Scaling, which sends data to CloudWatch every minute. However, this will have some extra-costs.

#### NEW QUESTION # 519

When preparing for a compliance assessment of your system built inside of AWS. what are three best-practices for you to prepare for an audit? (Choose three.)

- A. Request and obtain a compliance and security tour of an AWS data center for a pre-assessment security review
- **B. Request and obtain approval from AWS to perform relevant network scans and in-depth penetration tests of your system's Instances and endpoints**
- C. Schedule meetings with AWS's third-party auditors to provide evidence of AWS compliance that maps to your control objectives
- **D. Gather evidence of your IT operational controls**
- **E. Request and obtain applicable third-party audited AWS compliance reports and certifications**

**Answer: B,D,E**

#### NEW QUESTION # 520

Which service is offered by Auto Scaling?

- A. Automatic scale elastic IP
- **B. Automatic scale EC2 capacity**
- C. Automatic scale ECS capacity
- D. Automatic scaling storage

**Answer: B**

Explanation:

Explanation/Reference:

Explanation:

Auto Scaling is a service that allows users to scale the EC2 resources up or down automatically according to the conditions or by manual intervention. It is a seamless process to scale the EC2 compute units up and down.

Reference: <http://aws.amazon.com/autoscaling/>

#### NEW QUESTION # 521

With the threat of ransomware viruses encrypting and holding company data hostage, which action should be taken to protect an Amazon S3 bucket?

- A. Deny Post, Put, and Delete on the bucket
- **B. Enable server-side encryption on the bucket**
- C. Enable Amazon S3 versioning on the bucket
- D. Enable snapshots on the bucket

**Answer: B**

#### NEW QUESTION # 522

A VPC is connected to a company data center by a VPN. An Amazon EC2 instance with the IP address

172.31.16.139 is within a private subnet of the VPC. A SysOps Administrator issued a ping command to the EC2 instance from an on-premises computer with the IP address 203.0.113.12 and did not receive an acknowledgment. VPC Flow Logs were enabled and showed the following:

What action will resolve the issue?

- A. Modify the EC2 security group rules to allow inbound traffic from the on-premises computer
- **B. Modify the EC2 security group rules to allow outbound traffic to the on-premises computer**
- C. Modify the VPC network ACL rules to allow outbound traffic to the on-premises computer
- D. Modify the VPC network ACL rules to allow inbound traffic from the on-premises computer

**Answer: B**

## NEW QUESTION # 523

.....
