You will love our Sharing-and-Visibility-Architect study guide for sure!

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q12-Q17):

NEW QUESTION # 12

Universal Containers (UC) is a fast-growing company that sells containers globally. It has thousands of dealerships throughout the world where local dealers service containers. UC implemented a new Partner Community for its dealers. Each dealership has a dealer manager who manages the service agents. The community-sharing model is private.

What is the optimal option to give dealer managers visibility to customer cases only raised by their service agents?

- A. Create a sharing rule to share cases created by service agents with their dealer manager.
- B. Create a sharing set to share cases created by service agents with their dealer manager.
- C. Change external organization-wide default of case object to public read only.
- D. Using the role hierarchy, the cases raised by service agents will be visible to their relevant dealer managers.

Answer: D

NEW QUESTION # 13

Universal Containers has recently implemented an integration that is populating 50 custom fields on the account object. They would like these fields to be available to Managers for reporting but do not want them to clutter the page layouts. What should the Architect recommend as a solution?

- A. Grant Managers access to the fields using Field-Level Security; do not add them to a page layout.
- B. Add the fields to the Managers' Account Page Layout; mark the page layout section as Collapsed.
- C. Grant the Managers access to the fields using a Role-Based Sharing Rule; leave them hidden on the page layout.
- D. Add the fields to a Custom Report; grant the Managers' Role access to the report folder.

Answer: A

NEW QUESTION # 14

In order to allow community users to collaborate on Opportunities, which license type must the users be given?

- A. Partner Community
- B. Customer Community Plus
- C. Customer Community

Answer: A

Explanation:

To enable community users to collaborate on Opportunities, they must have access to the Opportunity object, which is included in the Partner Community license. This license type is specifically designed for partners and provides access to features like Opportunities, Campaigns, Leads, and other standard objects required for collaborative sales processes.

* Option A: Customer Community Plus licenses do not grant access to Opportunities, as they are primarily focused on external customer engagement without sales collaboration.

* Option B: Customer Community licenses are limited to basic interactions like viewing and updating cases or accessing content, and they exclude access to Opportunities.

* Option C (Correct): Partner Community licenses include access to Opportunities, making them the appropriate choice for this use case.

NEW QUESTION # 15

Which two objects support creating queues?
Choose 2 answers.

- A. Account.
- B. Lead.
- C. Case.
- D. Opportunity.

Answer: B,C

Explanation:

Explanation

Lead and Case are two objects that support creating queues. Queues are used to route records to a group of users who share workloads. Queues are available for standard objects such as Lead and Case, and custom objects that have a queue-supported lookup field. Option A is incorrect, since Account does not support creating queues. Option D is incorrect, since Opportunity does not support creating queues.

NEW QUESTION # 16

Universal Containers uses the standard Case object to track various support requests sent to servicing agents. Currently, the Case object has more than 400 fields. Eight different types of case processes have been established, each with a unique combination of statuses. The Director of Customer Service wants to ensure that servicing agents see only the required information specific to the case type they are addressing.

Which option is recommended to implement this requirement?

- A. Use Dynamic Forms with different field sections representing the relevant fields per case type, and control visibility of sections by Case Record Type value.
- B. Use a custom LWC to override the View action of the Case object, and a Custom Metadata Type to define the relevant fields per case type.
- C. Use different Page Layouts per case type, each representing the relevant fields per case type.

Answer: A

NEW QUESTION # 17

.....

We have brought in an experienced team of experts to develop our Sharing-and-Visibility-Architect study materials, which are close to the exam syllabus. With the help of our Sharing-and-Visibility-Architect study materials, you don't have to search all kinds of data, because our products are enough to meet your needs.
