VMware Cloud Operations 8.x Professional V2 free valid pdf & VMware 2V0-32.24 sure pass exam dumps

2026 Latest PassExamDumps 2V0-32.24 PDF Dumps and 2V0-32.24 Exam Engine Free Share: https://drive.google.com/open?id=14cmX6l6cnJA0jXP_inxflsvN7S5itlkX

That's why PassExamDumps offers actual VMware Cloud Operations 8.x Professional V2 (2V0-32.24) exam questions to help candidates pass the exam and save their resources. The VMware 2V0-32.24 Exam Questions provided by PassExamDumps is of the highest quality, and it enables participants to pass the exam on their first try.

VMware 2V0-32.24 Exam Syllabus Topics:

Topic	Details
Topic 1	• VMware Products and Solutions: This section of the exam measures the skills of Cloud Engineers and covers the components, integrations, and use cases for various VMware Cloud Management solutions. It includes tools like vRealize True Visibility Suite, Skyline, Federated Analytics, vRealize AI Cloud, and Log Insight Cloud. Candidates also explore deployment tools such as Remote Collectors and Cloud Proxies to understand their role in scalable cloud operations.
Topic 2	• Planning and Designing: This section of the exam measures the skills of Cloud Architects and covers the architectural models and sizing requirements for vRealize Operations and vRealize Log Insight. It evaluates the ability to choose between standalone, clustered, and high-availability setups, and to plan appropriately based on scenario-based requirements for capacity and deployment type, ensuring well-designed cloud solutions.
Topic 3	• Performance-tuning, Optimization, and Upgrades: This section has no testable objectives and therefore is not directly assessed in the exam.

Practice 2V0-32.24 Engine | Testking 2V0-32.24 Learning Materials

Confronting a tie-up during your review of the exam? Feeling anxious and confused to choose the perfect 2V0-32.24 latest dumps to pass it smoothly? We understand your situation of susceptibility about the exam, and our 2V0-32.24 test guide can offer timely help on your issues right here right now. Without tawdry points of knowledge to remember, our experts systematize all knowledge for your reference. You can download our free demos and get to know synoptic outline before buying. We offer free demos as your experimental tryout before downloading our Real 2V0-32.24 Exam Questions. For more textual content about practicing exam questions, you can download our products with reasonable prices and get your practice begin within 5 minutes.

VMware Cloud Operations 8.x Professional V2 Sample Questions (Q10-Q15):

NEW QUESTION # 10
An administrator has been tasked with analyzing the impact of deploying a new application. The current infrastructure is using an external storage array.
What vRealize Operations What-If Analysis should the administrator perform to get this information?

- A. Infrastructure Planning: Hyperconverged
- B. Workload Planning: Traditional
- C. Workload Planning: Hyperconverged
- D. Infrastructure Planning: Traditional

Answer: B

Explanation:
To analyze the impact of deploying a new application in an environment using an external storage array, the administrator should perform a Workload Planning: Traditional analysis in vRealize Operations. This type of analysis focuses on traditional infrastructure, which includes external storage arrays and other non- hyperconverged components. It allows for evaluating how the new application might affect resources such as CPU, memory, and storage, while considering the traditional setup of the infrastructure.

NEW QUESTION # 11
An administrator has been tasked to deploy vRealize Operations. The corporate policy states that DHCP should be used whenever supported.
Which two types of node support DHCP? (Choose two.)

- A. Primary Node
- B. Worker Node
- C. Replica Node
- D. Data Node
- E. Remote Collector

Answer: D,E

Explanation:
Remote Collector: These nodes can use DHCP to obtain their IP addresses, which is useful in environments where static IPs are not preferred for non-primary infrastructure.
Data Node: Data nodes can also be configured with DHCP, simplifying IP management in large deployments.

NEW QUESTION # 12
An administrator has been tasked with creating an identically configured deployment of the production vRealize Operations cluster that is currently managed by vRealize Suite Lifecycle Manager (vRSLCM).
Which four steps should the administrator complete to meet this objective? (Choose four.)

- A. Create a new vRSLCM Environment using the JSON Configuration file
- B. Create new locker SSL certificates and passwords for the new deployment
- C. Export the configuration for the Production vRSLCM Environment
- D. Create new locker SSL certificates for the new deployment
- E. Update the YAML file to replace any configuration details
- F. Update the JSON file to replace any configuration details

- G. Create a new vRSLCM Environment using the YAML Configuration file

Answer: A,C,E,F

Explanation:
Update the YAML file to replace any configuration details: The configuration details for the production vRealize Operations cluster will need to be reflected in the YAML file, which contains setup details for replication.
Create a new vRSLCM Environment using the JSON Configuration file: The environment configuration for the new deployment can be created using the exported JSON configuration file.
Update the JSON file to replace any configuration details: The exported JSON configuration file needs to be modified to ensure that it points to the new environment setup (e.g., IP addresses, FQDNs).
Export the configuration for the Production vRSLCM Environment: Exporting the existing production configuration is the first step in creating a new, identically configured deployment of vRealize Operations.

NEW QUESTION # 13
An administrator has been tasked to quickly recover unused allocated compute from existing development virtual machines (VMs) using vRealize Operations, as the vSphere cluster is now at capacity.
The current state of the environment:
The VMs either have dev or prod in their name.
Production VMs reside on cluster due to historical usage.
The administrator already has permission to modify any development VMs within the cluster.
Which approach below will quickly ensure cluster compute resources are recovered from the correct VMs?

- A. Exclude any Production virtual machines before running the Rightsize action.
- B. Use the Heavy Hitter VMs Dashboard to identify the VMs which are consistently consuming a large amount of resources and liaise with the VM owners.
- C. Generate an Oversized Virtual Machines Report to identify suitable virtual machines and liaise with the VM owners.
- D. Generate an Undersized Virtual Machines Report to identify suitable virtual machines and liaise with the VM owners.

Answer: A

Explanation:
To recover unused allocated compute resources quickly from development VMs in a cluster, the best approach is to use the Rightsize action while ensuring that Production virtual machines are excluded from the process. By excluding production VMs, the administrator can focus on development VMs (those with "dev" in their name) and adjust their resource allocations without affecting critical production systems.

NEW QUESTION # 14
Which vRealize Log Insight deployment architecture is valid?

- A. A four node cluster deployed with two nodes in each of two datacenters
- B. A six node cluster deployed with three nodes in each of two datacenters
- C. A three node cluster forwarding all messages to a three node cluster in another datacenter
- D. A three node cluster with a large central node and two smaller remote nodes

Answer: B

Explanation:
vRealize Log Insight supports the deployment of multi-node clusters across multiple data centers for high availability and scalability.
The architecture with three nodes in each of two separate data centers ensures fault tolerance and load balancing. The six-node cluster can operate across the two datacenters and provides a resilient and distributed logging solution.

NEW QUESTION # 15
......

If you care about your qualification exams and have some queries about 2V0-32.24 preparation materials, we are pleased to serve for you, you can feel free to contact us via email or online service about your doubt. Our company are established more than 10 years, our quality of 2V0-32.24 valid practice test questions are the leading position in this filed. We believe our 2V0-32.24 exam

guide will help you pass exam easily without too much spirit & time. All our 2V0-32.24 training materials are compiled painstakingly.
