

시험준비에가장좋은C-BCBTP-2502시험대비최신버전 덤프최신덤프공부자료

📄 Get the Top SAP C_BCBTP_2502 Exam PDF Questions — Achieve on Your First Effort!

Are you aiming to succeed the SAP C_BCBTP_2502 exam questions on your very first try? Certification exams in 2025 are demanding than ever, demanding extensive knowledge and practical experience. To increase your chances of accomplishment, you need exact and current learning guides. HelloDumps provides [SAP C_BCBTP_2502 dumps](#) and expert-reviewed study materials to help you practice effectively. The greatest part? You can now enjoy an exclusive 35% deal on all study materials!

Why Choose HelloDumps for Your C_BCBTP_2502 Exam Preparation?

✅ **Valid C_BCBTP_2502 Exam Questions – Obtain an Lead Over Others**
HelloDumps offers actual exam-like questions, closely corresponding with the latest C_BCBTP_2502 composition, difficulty level, and syllabus of the SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite certification. Practicing these questions helps you understand the test structure and enhances your achievement.

📄 **Obtain SAP Certified Associate - Positioning SAP Business Technology Platform as part of SAP Business Suite Exam Questions 2025 Here:** <https://helloworldumps.com/c-bcbtp-2502-pdf-dumps.html>

✅ **Three Practical Learning Formats**
We provide study materials in various formats to suit different learning styles:

- 📄 **PDF Layout** – Study on any device, anytime, anywhere.
- 💻 **Desktop Preparation Test** – Simulates real exam conditions with customizable mock tests.
- 🌐 **Web-Based Drill Test** – No installation required—practice directly from

<https://drive.google.com/open?id=1RwL7x1c6Zhl7S6KkFYwRIYfTrbve4fXk>

우리Itcertkr 사이트에SAP C-BCBTP-2502관련자료의 일부 문제와 답 등 문제들을 제공함으로 여러분은 무료로 다 운받아 체험해보실 수 있습니다. 여러분은 이것이야 말로 알맞춤이고, 전면적인 여러분이 지금까지 갖고 싶었던 문제집이라는 것을 느끼게 됩니다.

SAP C-BCBTP-2502 시험요강:

주제	소개
주제 1	<ul style="list-style-type: none"> • Discovering SAP Business Technology Platform: This section of the exam measures the skills of SAP Solution Architects and focuses on positioning the SAP Business Technology Platform within the overall SAP Business Suite strategy. It includes understanding the platform's role in enabling transformation, aligning with enterprise strategy, and supporting digital innovation. Candidates are expected to recognize the relevance of SAP BTP in modern business processes and how it integrates with other SAP offerings.

주제 2	<ul style="list-style-type: none"> • Illustrating CIO Transformation Delivered by SAP Business Suite: This section of the exam evaluates the skills of IT Transformation Managers and covers the role of SAP Business Suite in delivering value for CIO-led digital transformation. It highlights the significance of SAP's portfolio in enterprise IT, introduces the capabilities of SAP BTP, and shows how it connects with end-to-end processes and industry-specific use cases. Candidates should also be able to identify the key products within SAP BTP and explain how cross-portfolio components integrate to deliver measurable value.

C-BCBTP-2502시험덤프데모, C-BCBTP-2502적중을 높은 인증시험덤프

성공을 위해 길을 찾고 실패를 위해 구실을 찾지 않는다는 말이 있습니다. SAP인증 C-BCBTP-2502시험이 영어로 출제되어 시험패스가 너무 어렵다 혹은 회사다니느라 공부할 시간이 없다는 등등은 모두 공부하기 싫은 구실에 불과합니다. Itcertkr의 SAP인증 C-BCBTP-2502덤프만 마련하면 실패를 성공으로 바꿀수 있는 기적을 체험할수 있습니다.제일 간단한 방법으로 가장 어려운 문제를 해결해드리는것이Itcertkr의 취지입니다.

최신 SAP Certified Associate C-BCBTP-2502 무료샘플문제 (Q28-Q33):

질문 # 28

How does SAP LeanIX support IT landscape management when integrated with SAP BTP?

- A. By preventing real-time integration with business processes.
- B. By enforcing manual IT infrastructure tracking.
- **C. By providing enterprise architecture visualization and analysis.**
- D. By restricting governance of IT landscapes.

정답: C

설명:

As organizations adopt SAP BTP to build and extend their applications, their IT landscapes can become increasingly complex. SAP LeanIX (now a core part of SAP's enterprise architecture strategy) supports management by providing comprehensive visualization and analysis of the enterprise architecture. When integrated with SAP BTP, LeanIX allows IT leaders to see exactly how different BTP services, cloud applications, and on-premise systems are interconnected. This "map" of the IT landscape is essential for identifying redundant applications, managing technical debt, and ensuring that the IT strategy aligns with business goals. The positioning of LeanIX alongside BTP is crucial for "Transformation Management." During a move to SAP S/4HANA or a transition to the cloud, LeanIX helps organizations plan their roadmap by showing the impact of changes on the existing architecture. It provides data-driven insights into which applications are critical, which are obsolete, and where there are gaps in security or compliance. By providing this transparency, LeanIX empowers architects to make informed decisions about where to deploy new BTP services. This prevents the "sprawl" of unmanaged cloud services and ensures that the evolution of the SAP Business Suite is organized, cost-effective, and fully aligned with the broader digital transformation objectives of the company.

질문 # 29

Which of the following SAP BTP components enhances enterprise data governance?

- **A. SAP Data Intelligence**
- B. SAP BusinessObjects BI
- C. SAP AppGyver
- D. SAP Concur

정답: A

설명:

Data governance is the practice of ensuring that data is accurate, available, and secure across an organization. SAP Data Intelligence is the primary component within SAP BTP that addresses this need. It provides advanced metadata management and data cataloging capabilities, which are the foundations of governance. A data catalog acts like a "search engine" for enterprise data, allowing users to understand the origin (lineage), quality, and sensitivity of the information they are working with. In a complex SAP Business Suite environment, data often moves through multiple stages and systems. SAP Data Intelligence tracks

this "data lineage," showing how data was transformed as it moved from an ERP system to a reporting dashboard. This transparency is crucial for regulatory compliance (like GDPR) and for building trust in the data used for decision-making. If a financial report looks incorrect, governance tools allow IT to trace the data back to its source to find the error. By positioning Data Intelligence as the governance hub, SAP BTP ensures that the "Intelligent Enterprise" is built on a foundation of high-quality, trusted data. This is a significant differentiator from tools like SAP BusinessObjects (which focuses on reporting) or SAP Concur (which focuses on expenses), as Data Intelligence provides the underlying control layer for the entire data ecosystem.

질문 # 30

Which SAP BTP component helps businesses extract insights from structured and unstructured data?

- A. SAP Integration Suite
- B. SAP SuccessFactors
- C. SAP Data Intelligence
- D. SAP Business Network

정답: C

설명:

In today's data landscape, business value is hidden not just in "structured" databases (like tables and spreadsheets) but also in "unstructured" data (like images, sensor logs, and social media feeds). SAP Data Intelligence is the specific component of SAP BTP designed to manage this diversity. It is a comprehensive data management solution that provides data orchestration, data cataloging, and powerful machine learning integration. It allows data scientists and engineers to create "data pipelines" that ingest, transform, and analyze data regardless of its source or format.

The role of SAP Data Intelligence within the SAP Business Suite is to turn "dark data" into actionable insights. For example, it can take unstructured maintenance logs from factory machinery and combine them with structured financial data to predict the total cost of ownership of an asset. By providing a unified view of the entire data landscape-whether that data resides in an SAP HANA database, a non-SAP data warehouse, or a cloud "data lake"-it ensures that decision-makers have a complete picture. This capability is vital for advanced AI and machine learning projects, as it provides the robust data foundation required to train accurate models, thereby positioning SAP BTP as a leader in enterprise data orchestration.

질문 # 31

What is the primary function of SAP BTP's SAP Fiori tools?

- A. To deploy third-party CRM solutions.
- B. To build user-friendly applications with a consistent UI/UX experience.
- C. To develop backend APIs for database integration.
- D. To replace SAP S/4HANA transactional screens.

정답: B

설명:

User adoption is often the biggest hurdle in enterprise software deployment. The primary function of SAP Fiori tools on BTP is to solve this by enabling the creation of user-friendly applications with a consistent UI/UX experience. SAP Fiori is the design language for all modern SAP applications, moving away from complex, menu-heavy traditional screens toward a role-based, intuitive interface that works seamlessly across desktops, tablets, and smartphones.

On SAP BTP, Fiori tools (integrated within SAP Business Application Studio) provide templates and floorplans that help developers quickly build applications that look and behave exactly like standard SAP S/4HANA apps. This consistency is vital for the SAP Business Suite because it reduces training time and minimizes user error. When an employee moves from an HR task in SuccessFactors to a finance task in S/4HANA, the interface remains familiar. By positioning Fiori as the "face" of the platform, SAP ensures that the complex technical capabilities of BTP-such as AI insights or real-time data-are delivered to the end-user in a simple, actionable, and modern way, ultimately increasing productivity and employee satisfaction.

질문 # 32

What is a key feature of SAP BTP's AI capabilities?

- A. AI processing without cloud-based analytics support.

- B. Limited AI functionalities restricted to specific SAP modules.
- **C. Automated decision-making with machine learning models.**
- D. Rule-based decision-making without machine learning.

정답: C

설명:

SAP BTP's approach to Artificial Intelligence is centered on the concept of "Business AI," which means AI is built specifically for business contexts and is deeply embedded within the SAP applications users use every day. A key feature of this capability is automated decision-making with machine learning (ML) models.

Unlike traditional rule-based systems that follow rigid "if-then" logic, ML models within BTP can analyze vast amounts of historical data to identify patterns and predict future outcomes. This allows the platform to provide recommendations, such as identifying the best supplier based on past performance or flagging potentially fraudulent financial transactions.

The AI Foundation on SAP BTP provides developers with ready-to-use services and tools to build, run, and manage AI-led extensions. This includes access to Large Language Models (LLMs) and specialized machine learning services that are pre-trained on business data. By positioning AI as a core component of BTP, SAP ensures that intelligence is not an afterthought but a central part of the business process. This enables a shift from reactive data entry to proactive, data-driven management. Furthermore, these AI capabilities are tightly integrated with SAP Analytics Cloud, ensuring that the insights generated by machine learning models are immediately actionable through intuitive visualizations and dashboards, thereby driving the digital transformation of the SAP Business Suite.
