### Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q57-Q62):

#### NEW QUESTION # 57

Base item testing, customization, and final review and sign-off are the three steps in preparing what type of content?

- A. New content
- B. Customized content**
- C. Oracle Content
- D. Base content

#### Answer: B

Explanation:

Customized content involves testing base items, tailoring them, and obtaining final approval, distinguishing it from new content (option A), Oracle Content (option B), or unchanged Base content (option C).

## NEW QUESTION # 58

Which phase includes publishing new and updated OGL content activities?

- A. Prepare
- B. Test
- C. Update
- D. Publish

**Answer: D**

Explanation:

The Publish phase is dedicated to publishing new and updated OGL content (option D), making it available in production after testing and updates. Test (option A) validates content, Prepare (option B) plans for changes, and Update (option C) modifies content—none involve deployment. Publish finalizes the cycle, ensuring users access the latest, approved guides, marking the culmination of prior efforts.

## NEW QUESTION # 59

Where in the OGL console can users provide step-level feedback on a guide?

- A. In the Guide or Step Comments fields within the Content Editor
- B. In the Description field of the Guide Settings modal
- C. In the feedback field within the Feedback Analytics dashboard
- D. In the Step Settings section of the Full Editor

**Answer: A**

Explanation:

In the OGL console, step-level feedback is provided directly within the Content Editor, specifically in the Guide or Step Comments fields. This allows users to annotate specific steps or the entire guide during development or review, ensuring detailed and contextual feedback. The Feedback Analytics dashboard (option A) is for analyzing feedback trends, not submitting it. Step Settings (option C) adjusts configurations, and the Description field in Guide Settings (option D) is for metadata, not feedback. The Content Editor is the correct tool for this purpose.

## NEW QUESTION # 60

What is the correct order of how key activities occur during the Oracle Cloud Fusion quarterly update cycle?

- A. Prepare, Test, Update, Publish
- B. Test, Publish, Update, Prepare
- C. Test, Publish, Prepare, Update
- D. Prepare, Update, Publish, Test

**Answer: A**

Explanation:

The Oracle Cloud Fusion quarterly update cycle follows: Prepare (assess changes), Test (validate content), Update (modify as needed), Publish (deploy to production) (option B). This logical sequence ensures readiness, verification, refinement, and final release, aligning with Oracle's structured approach to managing updates. Other options disrupt this flow, e.g., testing before preparing (option A) or publishing before updating (option C), making B the correct, systematic order.

## NEW QUESTION # 61

Which applications are eligible to receive the OGL Included offering?

- A. Third-party applications
- B. Oracle Fusion SaaS applications
- C. Any Oracle applications

**Answer: B**

### Explanation:

The OGL Included offering is specifically available for Oracle Fusion SaaS applications (option B), as it's bundled with these cloud solutions to enhance user guidance. Not all Oracle applications (option A) qualify, and third-party applications (option C) require separate integration, not the Included offering. This eligibility ties OGL's native support to Fusion's SaaS model, ensuring seamless deployment within Oracle's core cloud ecosystem.
