- A. They build a consolidated backlog during the Realize phase
- B. To validate customer scopes and requirements against SAP S/4HANA Cloud Public Edition best practices
- C. To validate customer scopes during Fit-To-Standard workshops and provide the required configuration values for the Realize phase.

Answer: C

Explanation:

Level 3 Business Driven Configuration Questionnaires (BDCQs) are detailed tools used in the SAP Activate methodology to collect configuration data and validate the solution fit for SAP S/4HANA Cloud Public Edition.

* Option A: They build a consolidated backlog during the Realize phase. Incorrect. BDCQs are used in the Explore phase to gather configuration data, not to build a backlog in the Realize phase. The SAP S

/4HANA Cloud Implementation Guide states, "BDCQs are utilized in the Explore phase to collect configuration values, while backlogs are managed separately in SAP Cloud ALM during the Realize phase."

* Option B: To validate customer scopes during Fit-To-Standard workshops and provide the required configuration values for the Realize phase. Correct. Level 3 BDCQs are used during Fit-to- Standard workshops to validate scope and collect detailed configuration values for the Realize phase.

* Option C: To validate customer scopes and requirements against SAP S/4HANA Cloud Public Edition best practices. Incorrect.

While BDCQs validate scopes, their primary role is to collect configuration data, not to validate requirements against best practices, which is done during Fit-to- Standard workshops.
