The GRE General Test is a computer-based exam that measures a student's readiness for graduate-level coursework. GRE exam comprises three sections - Analytical Writing, Verbal Reasoning, and Quantitative Reasoning. The Analytical Writing section assesses the ability of a test taker to articulate complex ideas and arguments in a clear and concise manner. The Verbal Reasoning section measures the ability to analyze and evaluate written material and synthesize information from it. The Quantitative Reasoning section assesses the ability to understand, interpret, and analyze quantitative data and mathematical concepts. The GRE General Test is a challenging exam, and it requires thorough preparation to achieve a competitive score.

The GRE General Test is a critical step in the graduate school admissions process. It is a standardized test that assesses a student's aptitude in verbal reasoning, quantitative reasoning, critical thinking, and analytical writing skills. Students can take the test year-round and send their scores to up to four graduate programs of their choice. It is essential for students to prepare thoroughly for the GRE General Test and aim for a competitive score to increase their chances of getting into their desired graduate program.

NEW QUESTION # 342

The complex topic of whether bilingualism enhances cognitive functions beyond language, the so-called "bilingual advantage," is an intensely debated subject. Research results can be influenced by many variables, including the definition of bilingualism itself. The previous focus on what was perceived to be a classical case of bilingualism (early, simultaneous acquisition of more than one language) has been largely replaced by a more inclusive definition, based on the ability to communicate rather than a perfect command. Indeed, improvement in cognitive functions has been reported after only one week of an intensive language course.

Conversely, inactive bilinguals, who were early balanced bilinguals in their childhood but moved to an exclusive use of one language in later life, perform differently from active bilinguals and more like monolinguals.

In the context of the passage as a whole, the reference to "improvement in cognitive functions" primarily serves to

- A. encourage an intensive approach to language acquisition
- **B. reiterate one of the main benefits of being bilingual**
- C. illustrate how language acquisition promotes learning in general
- D. provide support for a particular research approach to bilingualism
- E. emphasize the ease with which a person can learn a second language

Answer: B
