BTW, DOWNLOAD part of PDFDumps 1z0-1073-25 dumps from Cloud Storage: [https://drive.google.com/open?id=1Dc\\_gNyeTlvtuv6ug\\_gnJycCRqp-dGsCq](https://drive.google.com/open?id=1Dc_gNyeTlvtuv6ug_gnJycCRqp-dGsCq)

PDFDumps's Oracle 1z0-1073-25 exam training materials' simulation is particularly high. You can encounter the same questions in the real real exam. This only shows that the ability of our IT elite team is really high. Now many ambitious IT staff to make their own configuration files compatible with the market demand, to realize their ideals through these hot IT exam certification. Achieved excellent results in the Oracle 1z0-1073-25 Exam. With the Oracle 1z0-1073-25 exam training of PDFDumps, the door of the dream will open for you.

## Oracle 1z0-1073-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Implementing Advanced Inventory Transactions: This part of the exam assesses the skills of Supply Chain Analysts in handling complex inventory flows. It explores advanced scenarios like consignment processes, supply chain orchestration, and back-to-back orders. Candidates must also demonstrate configuration of barcode scanning, product recalls, and support for electronic signatures in compliance environments.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>Implementing Inventory Transactions: This domain measures the ability of Inventory Application Developers to manage and execute inventory transactions. It covers the understanding of inventory balances, item availability, and reservation functionalities. Candidates must show proficiency in configuring transaction controls, handling serial and lot control, and managing common transaction types like subinventory transfers and interorganization transfers.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Implementing Inventory Replenishment: This section tests the ability of Inventory Replenishment Planners to configure and execute automated replenishment strategies. Candidates should understand how to define PAR locations and apply Min-Max planning. It assesses hands-on knowledge in running replenishment plans that maintain inventory levels across different storage locations.</li> </ul>

Topic 4	<ul style="list-style-type: none"> <li>• <b>Understanding External Integration:</b> This portion evaluates how System Integration Specialists understand and support integrations between Inventory Management and other Oracle or third-party systems. It includes familiarity with key integration points necessary for streamlined operations and system data consistency.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Using AI</li> <li>• ML</li> <li>• <b>Mobile and Other Automation Features:</b> This section of the exam assesses the awareness of Cloud Application Consultants in using AI, machine learning, and automation tools. Candidates should understand the practical value these technologies bring to predictive analytics, mobile usage, and overall operational efficiency within Inventory Management.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• <b>Implementing Enterprise Structures:</b> This section of the exam measures the knowledge of Oracle Cloud Inventory Consultants and covers the foundational concepts of enterprise structure setup. Candidates must understand the purpose and interaction of components like Item Organizations and Inventory Organizations. It also assesses the ability to configure Inventory Organizations and tailor enterprise structure settings to support business operations efficiently.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>• <b>Implementing Inventory Management:</b> This section of the exam evaluates the skills of Oracle Inventory Specialists in configuring core inventory functions. It focuses on the cost-related features of inventory, including Receipt Accounting and Cost Accounting. Candidates are expected to demonstrate their ability to set up subinventories, units of measure, items, and facility schedules as part of the inventory management configuration process.</li> </ul>

## Efficient Pass 1z0-1073-25 Guaranteed & Leading Offer in Qualification Exams & Free PDF 1z0-1073-25: Oracle Inventory Cloud 2025 Implementation Professional

With these adjustable Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) mock exams, you can focus on weaker concepts that need improvement. This approach identifies your mistakes so you can remove them to master the 1z0-1073-25 exam questions of PDFDumps give you a comprehensive understanding of 1z0-1073-25 Real Exam format. Self-evaluation by taking practice exams makes your Oracle 1z0-1073-25 exam preparation flawless and strengthens enough to crack the test in one go.

### Oracle Inventory Cloud 2025 Implementation Professional Sample Questions (Q37-Q42):

#### NEW QUESTION # 37

What happens when you enable Delete Additional Items in the Cycle Count definition?

- A. Items enabled for "Include in Schedule under Define Classes and Items" are deleted from the cycle count.
- **B. Items not associated with the previous count are deleted from the cycle count.**
- C. Items associated with the cycle count but not included in the ABC group name are deleted from the cycle count.

**Answer: B**

#### NEW QUESTION # 38

Goods need to be moved from Org A to Org B. The person at the warehouse in Org B must receive and move the shipment physically, and perform a quality check. Which is the appropriate transfer type and receipt routing required?

- A. Expense Destination Transfer Type: DirectReceipt Routing: Standard
- B. Expense Destination Transfer Type: In-TransitReceipt Routing: Inspection
- **C. Inventory Destination Transfer Type: In-TransitReceipt Routing: Inspection (\*)**

- D. Inventory Destination Transfer Type: DirectReceipt Routing: Standard
- E. Inventory Destination Transfer Type: DirectReceipt Routing: Inspection

**Answer: C**

#### NEW QUESTION # 39

Your customer manages all the procurement and warehouse operations in the US and has decided to create a US business unit for this purpose.

Which two mandatory pieces of information are required to create a US business unit?

- A. Manager
- B. Buyer
- C. Default Set
- D. Secondary Ledger
- E. Business Function

**Answer: C,E**

#### NEW QUESTION # 40

In which two ways can ownership change for consigned goods from supplier to buyer?

- A. Create a consumption advice.
- B. Create a transfer to a consigned transaction.
- C. Create a transfer to an owned transaction.
- D. Perform a subinventory transfer.

**Answer: C,D**

#### NEW QUESTION # 41

##### SIMULATION

##### Back-to-Back Supply Creation Flows

You can set up Oracle Fusion Cloud applications that support back-to-back fulfillment to trigger supply creation flows (buy, make, transfer, and on hand) after a sales order is entered and scheduled.

Each variant of the back-to-back flow differs in the supply document that's created and the supply execution application in which the document is created. Depending on the source of the item, supply is provided from manufacturing, procurement, or inventory. Then, after the supply is received into the fulfillment warehouse, the back-to-back order is ready for shipment to your customer.

The following table describes the supply creation flows and associated supply document supported for each flow when using back-to-back fulfillment.

##### □ Back-to-Back Supply Creation Buy Flow

The supply document for a back-to-back buy flow is a purchase order. Based on supply recommendations from Oracle Global Order Promising, a purchase order is created and reserved against the sales order. When the purchase order is received by the supplier, on hand is created to ship out the back-to-back sales order.

The following figure shows the back-to-back supply creation buy flow.

**Answer:**

Explanation:

See the Explanation for the complete solution

Explanation:

Back-to-Back Supply Creation Flows in Oracle Cloud

Back-to-back (B2B) fulfillment in Oracle Fusion Cloud allows organizations to trigger supply creation (Buy, Make, Transfer, or On-Hand Reservation) after a sales order is entered and scheduled. The system dynamically generates supply documents depending on the source of the item and executes supply fulfillment through Oracle Procurement, Manufacturing, or Inventory Management.

##### 1. Overview of Back-to-Back Supply Creation Flows

Each back-to-back flow follows these key steps:

Sales Order Entry & Scheduling - A customer places an order that requires supply creation.

Supply Order Generation - The system determines the best supply source based on predefined sourcing rules.

Supply Execution - The supply is created using procurement (Buy), manufacturing (Make), transfer (Transfer), or existing stock (On-Hand).

Receiving & Reservation - The supply is received and linked to the sales order.

Order Fulfillment - The sales order is shipped to the customer.

2. Back-to-Back Supply Creation Buy Flow (Procurement-Based Fulfillment) The Buy Flow is used when the required item is procured from an external supplier because it is not available in stock or another warehouse.

Step-by-Step Buy Flow Process

Below is the step-by-step breakdown of the Back-to-Back Buy Flow with Oracle Fusion applications involved:

Step 1: Initiate Back-to-Back Sales Order

The customer places a sales order in Oracle Order Management.

The system checks stock availability in Oracle Inventory Cloud.

If no stock is available, Oracle Supply Chain Orchestration (SCO) triggers a supply request.

Oracle Global Order Promising (GOP) determines procurement as the best supply source.

The sales order is scheduled for back-to-back fulfillment.

System Action: The system marks the sales order for procurement and creates a supply order.

Step 2: Create Supply Order

Oracle Supply Chain Orchestration (SCO) generates a Supply Order.

The system determines that a Purchase Order (PO) is needed.

A Purchase Requisition is created in Oracle Procurement Cloud.

System Action: The system sends a request for procurement.

Step 3: Request Purchase Order (PO)

Oracle Procurement Cloud converts the requisition into a Purchase Order (PO).

The PO is sent to the external supplier.

The PO is linked to the sales order, ensuring that supply is dedicated to fulfilling the order.

System Action: The system creates a Purchase Order (PO) and tracks supplier delivery.

Step 4: Receive the Purchase Order (PO)

The supplier delivers the goods to the fulfillment warehouse.

The warehouse team receives the PO in Oracle Receiving.

The received inventory is updated in Oracle Inventory Cloud.

The supply is reserved against the back-to-back demand.

System Action: The system marks the received supply as reserved for the sales order.

Step 5: Ship the Back-to-Back Sales Order

The order is picked, packed, and shipped from the warehouse.

Oracle Shipping Execution updates the order status.

An invoice is generated in Oracle Receivables.

The sales order is closed.

Final Action: The system completes the order and ships it to the customer.

3. Oracle Fusion Cloud Applications Involved in Back-to-Back Buy Flow

4. Benefits of the Back-to-Back Buy Flow

✓ Reduces Inventory Holding Costs - No need to stock large quantities in advance.

✓ Ensures Order-Specific Procurement - Every sales order is directly linked to supply.

✓ Automates Procurement & Order Processing - Seamless integration between Oracle modules.

✓ Enhances Customer Satisfaction - Quick fulfillment by sourcing products efficiently.

✓ Optimizes Supplier Collaboration - Real-time PO creation and tracking with suppliers.

5. Real-World Use Case

Scenario: Electronics Distributor Fulfilling a Large Order

A distributor selling high-end laptops does not keep them in stock but procures them from suppliers only when an order is placed.

Process Flow:

A corporate customer places an order for 50 laptops.

The system checks stock and finds no available inventory.

A Purchase Order is created in Oracle Procurement Cloud and sent to the supplier.

The supplier delivers the laptops to the warehouse.

The laptops are reserved against the sales order.

The laptops are shipped to the customer, and the invoice is generated.

Result: The distributor minimizes inventory costs while fulfilling customer demand efficiently.

**NEW QUESTION # 42**

.....

Are you tired of feeling overwhelmed and unsure about how to prepare for the Oracle Inventory Cloud 2025 Implementation Professional (1z0-1073-25) exam? Are you ready to take control of your future and get the 1z0-1073-25 certification you need to accelerate your career? If so, it's time to visit PDFDumps and download real Oracle 1z0-1073-25 Exam Dumps. Our team of experts has designed a 1z0-1073-25 Exam study material that has already helped thousands of students just like you achieve their goals. We offer a comprehensive 1z0-1073-25 practice exam material that is according to the content of the Oracle 1z0-1073-25 test.
