## **Palo Alto Networks System Engineer - Cortex Professional Sample Questions (Q166-Q171):**

### **NEW QUESTION # 166**

If a customer activates a TMS tenant and has not purchased a Cortex Data Lake instance.

Palo Alto Networks will provide the customer with a free instance

What size is this free Cortex Data Lake instance?

- **A. 1 TB**
- B. 10 GB
- C. 10 TB
- D. 100 GB

**Answer: A**

### **NEW QUESTION # 167**

An adversary attempts to communicate with malware running on a network in order to control malware activities or to exfiltrate data from the network.

Which Cortex XDR Analytics alert will this activity most likely trigger?

- A. malware
- B. uncommon local scheduled task creation
- **C. DNS Tunneling**
- D. new administrative behavior

**Answer: C**

### **NEW QUESTION # 168**

When preparing for a Cortex XSOAR proof of value (POV), which task should be performed before the evaluation is requested?

- A. Planning for every different use case the customer has for the solution
- **B. Gathering a list of the different integrations that will need to be configured**
- C. Building out an executive-level proposal detailing the product capabilities
- D. Ensuring that the customer has single sign-on (SSO) configured in their environment

**Answer: B**

Explanation:

Before requesting a Cortex XSOAR proof of value (POV) evaluation, it's important to gather a list of the different integrations that will need to be configured. This ensures that the POV can be tailored to the customer's environment and use cases, and allows the evaluation to be based on real-world data and workflows.

### **NEW QUESTION # 169**

A customer has purchased Cortex XDR and requires 24/7 monitoring of the platform. However, the customer only has staff available during business hours.

Which Palo Alto Networks offering would best meet this requirement?
