

CLT Unterlage - CLT Deutsch

Außerdem sind jetzt einige Teile dieser PrüfungFrage CLT Prüfungsfragen kostenlos erhältlich: <https://drive.google.com/open?id=1YZOYqsFyC3fgi2q7NKHmm1SVQqS1KsxX>

In den letzten Jahren hat die MSSC CLT Zertifizierungsprüfung großen Einfluß aufs Alltagsleben geübt. Aber die Kernfrage ist, wie man die MSSC CLT Zertifizierungsprüfung einmalig bestehen. Die Antwort ist, dass Sie die Schulungsunterlagen zur MSSC CLT Zertifizierungsprüfung von PrüfungFrage benutzen sollen. Mit PrüfungFrage können Sie Ihre erste Zertifizierungsprüfung bestehen. Worauf warten Sie noch?Kaufen Sie die Schulungsunterlagen zur MSSC CLT Zertifizierungsprüfung von PrüfungFrage, Sie werden sicher mehr bekommen, was Sie wünschen.

MSSC CLT Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Safe Material Handling and Equipment Operation: This section of the exam measures skills of the Certified Logistics Associate and covers the proper methods for safely moving materials and the correct operation of common handling equipment like forklifts and pallet jacks.
Thema 2	• Work Communication: This section of the exam measures skills of the Certified Logistics Associate and covers the ability to effectively share information, follow verbal and written instructions, and clearly document tasks in a logistics environment.
Thema 3	• Dispatch and Tracking Operations: This section of the exam measures skills of the Certified Logistics Technician and covers the procedures for organizing shipments, coordinating carriers, and monitoring the progress of goods in transit until they reach their destination.
Thema 4	• Packaging and Shipping: This section of the exam measures skills of the Certified Logistics Technician and covers the necessary techniques for securing goods safely for transit, selecting the right containers, and correctly labeling them for outbound transportation.
Thema 5	• Order Processing: This section of the exam measures skills of the Certified Logistics Technician and covers the steps required to accurately manage and fulfill customer requests, including picking and preparing the correct items for dispatch.
Thema 6	• Quality Control Principles: This section of the exam measures skills of the Certified Logistics Associate and covers the fundamental concepts used to monitor and ensure that goods and processes meet required quality standards and customer expectations.
Thema 7	• The Logistics Environment: This section of the exam measures skills of the Certified Logistics Associate and covers the standard operational setting, including the various facilities, equipment, and regulatory factors that affect daily logistics tasks.

Thema 8	• Information Systems: This section of the exam measures skills of the Certified Logistics Associate and covers understanding and using the basic technology and software systems necessary to track, manage, and execute logistics operations, such as inventory or shipment records.
Thema 9	• Safe Handling of Hazardous Materials: This section of the exam measures skills of the Certified Logistics Technician and covers the specific regulations, documentation, and protective measures required for storing and moving dangerous goods safely.
Thema 10	• Teamwork and Good Workplace Conduct to Solve Problems: This section of the exam measures skills of the Certified Logistics Associate and covers the professional behaviors and collaborative techniques needed to work effectively with colleagues and resolve common operational issues as a team.
Thema 11	• Measuring Weight & Volume: This section of the exam measures skills of the Certified Logistics Technician and covers the technical computations needed to correctly size packages and calculate accurate weight and cubic volume for shipping costs and load planning.
Thema 12	• Product Storage: This section of the exam measures skills of the Certified Logistics Technician and covers the best practices for organizing, locating, and maintaining products within a warehouse to maximize space efficiency and minimize damage or loss.
Thema 13	• Product Receiving: This section of the exam measures skills of the Certified Logistics Technician and covers the technical procedures for inspecting, verifying, documenting, and correctly transferring incoming shipments of goods into storage facilities.
Thema 14	• The World of Logistics and the Global Supply Chain: This section of the exam measures skills of the Certified Logistics Associate and covers the foundational knowledge of how logistics fits into the broader global economy and the movement of goods from their origin to the final consumer.

PrüfungFrage ist eine Website, die Ihnen zum Erfolg führt. PrüfungFrage bietet Ihnen die ausführlichen Schulungsmaterialien zur MSSC CLT (Certified Logistics Technician (CLT) 4.0) Zertifizierungsprüfung, mit deren Hilfe Sie in kurzer Zeit das relevante Wissen zur Prüfung auswendiglernen und die Prüfung einmalig bestehen können.

MSSC Certified Logistics Technician (CLT) 4.0 CLT Prüfungsfragen mit Lösungen (Q66-Q71):

66. Frage

Once picked and assembled, orders must be inspected for

- A. bar codes
- B. documents
- C. quantity
- **D. accuracy**

Antwort: D

Begründung:

After an order is picked and assembled, accuracy verification is essential before packing or shipment. The CLT "Order Processing" competency details this as the final quality control step within the fulfillment process. Accuracy includes verifying correct SKUs, quantities, and any special handling or packaging requirements. Inspectors or packers perform this check using pick lists, bar code scans, or WMS verification tools to confirm that the customer's order matches what was physically picked. While quantity and documentation are part of the process, "accuracy" is the overarching goal that ensures customer satisfaction and prevents costly returns or shipment errors. CLT emphasizes that every order leaving the warehouse should meet exact order specifications to maintain service level performance and quality metrics.

67. Frage

Which logistics automated system generates the pick list?

- A. Inventory Management System (IMS)
- **B. Warehouse Management System (WMS)**
- C. Order Processing System (OPS)
- D. Multi-Order Batch Picking System (MOBPS)

Antwort: B

Begründung:

The Warehouse Management System (WMS) is the logistics automation platform responsible for generating pick lists and directing warehouse associates on which items to select, in what order, and from which locations. In the CLT "Order Processing and Warehouse Systems" competencies, the WMS integrates with order entry and inventory databases to translate customer orders into actionable picking instructions. The system also tracks task completion and updates inventory records in real-time. While Inventory Management Systems and Order Processing Systems provide related data, the WMS manages the physical execution of warehouse activities, including picking, packing, and shipping. Its use ensures efficiency, accountability, and traceability throughout the order fulfillment process, aligning with CLT standards for data-driven warehouse operations.

68. Frage

Which of the following is the most basic Automated Storage and Retrieval System (AS/RS) used to store and retrieve materials that has an operator present?

- **A. Man-on-Board**
- B. The Mezzanine
- C. Vertical Lift Module (VLM)
- D. A-Frame dispensing system

Antwort: A

Begründung:

The Man-on-Board AS/RS represents the simplest automated retrieval system where an operator rides on the storage/retrieval machine to manually select or place loads. CLT's "Automated Systems" section identifies this as a semi-automated system that combines human control with mechanical assistance for efficiency and precision. It contrasts with fully automated AS/RS where retrieval is entirely computer-controlled. The Man-on-Board system is ideal for large or variable-sized items requiring human judgment. CLT emphasizes that even with operator presence, safety protocols-such as harnessing, emergency stops, and restricted access-must be followed. This system provides a transitional solution between manual storage and full automation, improving throughput while maintaining operator involvement.

69. Frage

HAZMATs that are not stored or transported in bulk must be individually labeled. Which of the following is NOT a basic labeling requirement?

- A. includes the material symbol at the top of the label
- B. must be clearly visible
- **C. must be written with a black Sharpie marker**
- D. cannot be covered by any other marking

Antwort: C

Begründung:

CLT aligns with DOT/OSHA rules: hazardous materials packages require durable, clearly visible, and unobstructed markings/labels that communicate hazard class, proper shipping name/UN ID (as applicable), and pictograms/symbols per standards. There is no requirement specifying a particular marker brand or handwriting; labels must meet durability/legibility specifications, not be covered or obscured, and display the correct hazard symboling.

Reference:

70. Frage

An outbound order must be checked for all of the following EXCEPT

- A. damaged condition
- B. customer address
- C. correct dock for loading
- D. item and count accuracy

Antwort: C

Begründung:

In the MSSC Certified Logistics Technician (CLT 4.0) standards, the final inspection of an outbound order focuses on product condition, item accuracy, and shipping documentation. Before an order leaves the facility, warehouse staff must confirm that all items are in good condition (free from visible damage), the counts match the packing list or manifest, and that the customer address and shipping labels are accurate. These checks ensure that shipments meet quality expectations and reduce costly returns or claims. However, confirming the correct dock for loading is a facility-level logistics coordination task, not part of the order verification process. Dock assignment is typically controlled by dispatch or the warehouse management system (WMS) to optimize carrier scheduling and loading efficiency. The CLT curriculum distinguishes between quality assurance tasks (verifying accuracy, packaging, and labeling) and logistical operations (assigning docks, sequencing trailers). Therefore, verifying the correct dock is not a required outbound order check, making option D the correct answer.

This aligns with CLT's Packaging and Shipment and Dispatch and Tracking key activities, which emphasize product verification, documentation accuracy, and load integrity before release-not dock allocation management.

71. Frage
