Cisco 200-901 Exam | 200-901 Valid Torrent - Best Provider for 200-901: DevNet Associate Exam Exam

Without practice, you cannot crack the 200-901 exam. PassExamDumps facilitates you in this purpose with its desktop Cisco 200-901 practice exam software. It helps you get practical experience with the final 200-901 Exam. By practicing under real DevNet Associate Exam (200-901) exam situations again and again, you develop confidence and skills to attempt the 200-901 exam within its allocated time.

Cisco 200-901 Exam is an associate-level certification, which means that it is suitable for beginners who want to start a career in software development or network automation. DevNet Associate Exam certification is also suitable for professionals who want to enhance their skills and knowledge in software development and network automation. It is a valuable certification for network engineers, software developers, and DevOps engineers who want to advance their careers.

Cisco DevNet Associate Exam Sample Questions (Q266-Q271):

NEW QUESTION # 266

Refer to the exhibit.

List Messages

Lists all messages in a room. Each message will include content attachments if present.

The list sorts the messages in descending order by creation date.

Long result sets will be split into [pages](#).

```
GET /v1/messages
```

Query Parameters

roomId
string **Required**
List messages in a room, by ID.

mentionedPeople
array
List messages with these people mentioned, by ID. Use me as a shorthand for the current API user.

before
string
List messages sent before a date and time.

beforeMessage
string
List messages sent before a message, by ID.

max
number
Limit the maximum number of messages in the response.
Default:

Try it **Example**

```
GET /v1/messages{?roomId,mentionedPeople,before,beforeMessage}
```

Header

Authorization Use personal access token

Bearer

This limited duration personal access token is hidden for your security.

Query Parameters

roomId
Required e.g. Y2lzY29zcGFyazovL3VzL1JPT00vYmJj

mentionedPeople e.g. Y2lzY29zcGFyazovL3VzL1BFT1BMR56

before e.g. 2016-04-2Tf9:01:55:966Z

beforeMessage e.g. Y2lzY29zcGFyazovL3VzL1FU1NBROL

max e.g. 100

Run

```

bash-3.2$ curl -H "Content-Type: application/json" -H "Authorization:
Fj2zzzykEa091ic9GK2j8LtE1HKlHklE6oRHPQdw1Pat60i7ndtHnWzL2b5pQmG14Kk_B9EI59isacLy7-
NarA02n9H-tGgt-SxQ39iDejgcs" -i -X POST -d "{ \"roomId\":
\\\"Y2geK53sjEknoSrC7SwQ5ZGL99pHgiuScB7DfNvU8Xx4wDKLiPORcEkryAnM3QaK9LQZsP0G4\\\"
, \"text\": \"test2\" }" https://api.ciscospark.com/v1/messages

bash-3.2$

```

A developer is troubleshooting an API with the given API with the given API documentation and cURL command. What is the cause of this problem?

- A. The user is not allowed to post messages from their account
- **B. The API token specified is expired**
- C. The authorization header is missing or incomplete
- D. The request body is missing or incomplete

Answer: B

NEW QUESTION # 267

When a Cisco IOS XE networking device is configured by using RESTCONF, what is the default data encoding method?

- A. application/json-data+xml
- B. application/yaml-data+json
- **C. application/yang-data+json**
- D. application/xml-data+json

Answer: C

Explanation:

When configuring a Cisco IOS XE networking device using RESTCONF, the default data encoding method is application/yang-data+json. This MIME type indicates that the data is encoded in JSON format and structured according to YANG data models. YANG (Yet Another Next Generation) is a data modeling language used to model configuration and state data manipulated by the NETCONF protocol, which RESTCONF leverages.

References:

- * Cisco DevNet Documentation - RESTCONF
- * Cisco DevNet Associate Certification Guide

NEW QUESTION # 268

Refer to the exhibit.

List Rooms

List rooms.

The `title` of the room for 1:1 rooms will be the display name of the other person.

By default, lists rooms to which the authenticated user belongs.

Long result sets will be split into [pages](#).

GET /v1/rooms

Query Parameters

Name	Description
<code>teamId</code> string	List rooms associated with a team, by ID.
<code>type</code> string	List rooms by type. <i>Possible values: direct, group</i>
<code>sortBy</code> string	Sort results. <i>Possible values: id, lastactivity, created</i>
<code>max</code> number	Limit the maximum number of rooms in the response. Default: 100

Fill in the blank to complete the query parameter and value so that the result set is returned in reverse chronological order (most recent first) based on when message were entered.

HTTP GET /v1/rooms

Answer:

Explanation:

?sortBy=lastactivity

Explanation:

To ensure the result set is returned in reverse chronological order based on when messages were entered, we need to use the `sortBy` parameter with the value `lastactivity`. This parameter sorts the rooms by their last activity timestamp, ensuring the most recent rooms are listed first.

Example:

GET /v1/rooms?sortBy=lastactivity

References:

* Cisco Webex Teams API Documentation (explains query parameters and their usage in API calls)

* Cisco DevNet Associate Exam Topics: APIs and Automation (understanding how to utilize query parameters to retrieve data)

HTTP GET /v1/rooms ?sortBy=lastactivity

NEW QUESTION # 269

Refer to the exhibit.

List the clients that have used this network in the timespan

HTTP REQUEST

```
GET /networks/ {networkId}/clients
```

PARAMETERS

t0

The beginning of the timespan for the data. The maximum lookback period is 31 days from today.

timespan

The timespan for which the information will be fetched. If specifying timespan, do not specify parameter t0. The value must be in seconds and be less than or equal to 31 days. The default is 1 day.

perPage

The number of entries per page returned. Acceptable range is 3 – 1000. Default is 10.

startingAfter

A token used by the server to indicate the start of the page. Often this is a timestamp or an ID but it is not limited to those. This parameter should not be defined by client applications. The link for the first, last, prev, or next page in the HTTP Link header should define it.

endingBefore

A token used by the server to indicate the end of the page. Often this is a timestamp or an ID but it is not limited to those. This parameter should not be defined by client applications. The link for the first, last, prev, or next page in the HTTP Link header should define it.

```
base_url = https://api.meraki.com/api/v0"
network_id = "L 12345678910"
api_key = "1098hadpfsiapsf8ahf8ohp"
requests.<item 1> (
  <item 2> + "/<item 3>/" + /<item 4>, "/<item 5>",
  headers = {
    "X-Cisco-Meraki-API-Key": "<item 6>",
    "Content-Type": "<item 7>"
  },
  <item 8>={"<item 9>":/<item 10>}}
```

Drag and drop the code from the left code from the left onto the item number on the right to complete the Meraki code to obtain a list of client which have used this network.

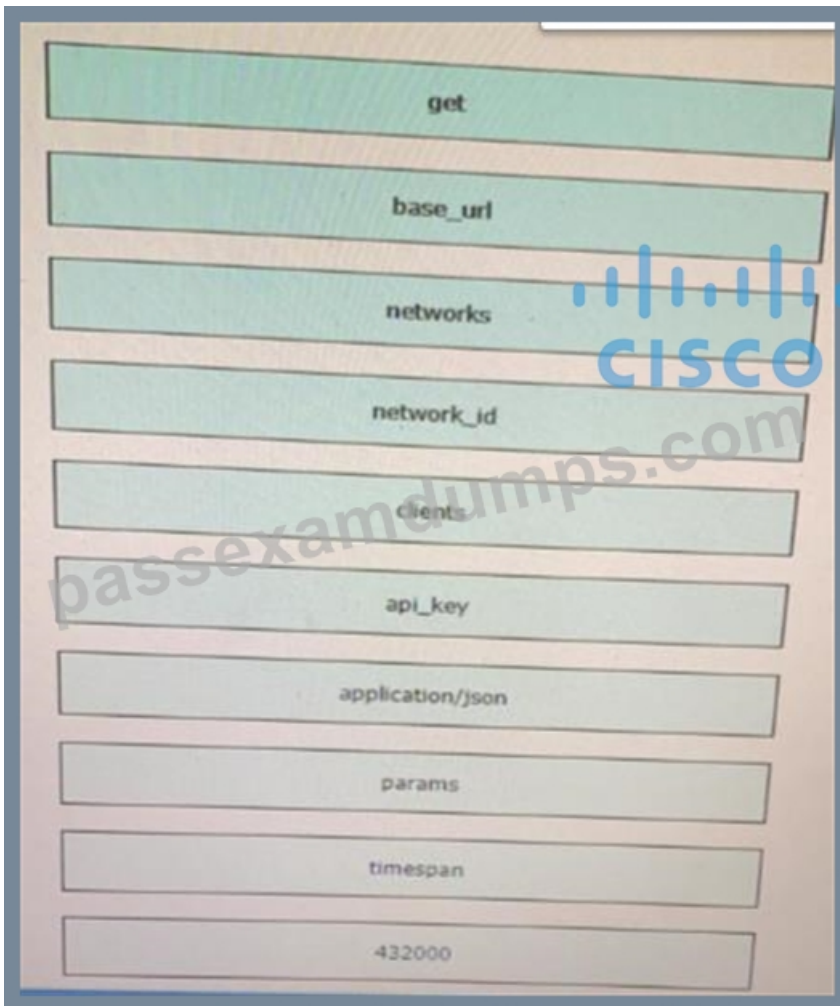

params	<item 1>
networks	<item 2>
timespan	<item 3>
get	<item 4>
432000	<item 5>
base_url	<item 6>
application/json	<item 7>
network_id	<item 8>
clients	<item 9>
api_key	<item 10>

Answer:

Explanation:

params	get
networks	base_url
timespan	networks
get	network_id
432000	clients
base_url	api_key
application/json	application/json
network_id	params
clients	timespan
api_key	432000

Explanation

1 - d, 2 - f, 3 - b, 4 - h, 5 - i, 6 - j, 7 - g, 8 - a, 9 - c, 10 - e

NEW QUESTION # 270

Which two statements describe the advantages of using a version control system? (Choose two.)

- A. It provides tooling to automate application builds and infrastructure provisioning.
- B. It provides a system to track User Stories and allocate to backlogs.
- C. It allows for branching and merging so that different tasks are worked on in isolation before they are merged into a feature or master branch.
- D. It allows developers to write effective unit tests.
- E. It allows multiple engineers to work against the same code and configuration files and manage differences and conflicts.

Answer: C,E

Explanation:

A version control system offers several advantages:

* **Branching and Merging:** Developers can work on features, bug fixes, or experiments in isolation (branches) without affecting the main codebase. Once the work is completed, it can be merged back into the main branch, facilitating organized and controlled development workflows.

1: Cisco DevNet Associate Certification Guide, Chapter 4, Section on Version Control Systems.
