TestValid has the ability to help IT people for success. TestValid Salesforce Salesforce-Data-Cloud exam dumps are the training materials that help you succeed. As long as you want to Pass Salesforce-Data-Cloud Test, you must choose TestValid. We guarantee your success in the first attempt. If you fail, we will give you a FULL REFUND of your purchasing fee.

The advantages of our Salesforce-Data-Cloud study materials are plenty and the price is absolutely reasonable. The clients can not only download and try out our products freely before you buy them but also enjoy the free update and online customer service at any time during one day. The clients can use the practice software to test if they have mastered the Salesforce-Data-Cloud Study Materials and use the function of stimulating the test to improve their performances in the real test. So our products are absolutely your first choice to prepare for the test Salesforce-Data-Cloud certification.

## Salesforce-Data-Cloud Valid Exam Fee & Reliable Salesforce-Data-Cloud Exam Simulator

TestValid Salesforce Salesforce-Data-Cloud pdf questions have been marked as the topmost source for the preparation of Salesforce-Data-Cloud new questions by industry experts. These questions cover every topic in the exam, and they have been verified by Salesforce professionals. Moreover, you can download the Salesforce Data Cloud Accredited Professional Exam (Salesforce-Data-Cloud) pdf questions demo to get a better analysis of the exam. By practicing with these questions, you can assess your preparation for the Salesforce Salesforce-Data-Cloud new questions.

## Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q77-Q82):

### NEW QUESTION # 77

When performing segmentation or activation, which time zone is used to publish and refresh data?

- A. Time zone of the user creating the activity
- B. Time zone of the Data Cloud Admin user
- C. Time zone set by the Salesforce Data Cloud org
- D. Time zone specified on the activity at the time of creation

**Answer: C**

Explanation:

The time zone that is used to publish and refresh data when performing segmentation or activation is D. Time zone set by the Salesforce Data Cloud org. This time zone is the one that is configured in the org settings when Data Cloud is provisioned, and it applies to all users and activities in Data Cloud. This time zone determines when the segments are scheduled to refresh and when the activations are scheduled to publish.

Therefore, it is important to consider the time zone difference between the Data Cloud org and the destination systems or channels when planning the segmentation and activation strategies. References: Salesforce Data Cloud Consultant Exam Guide, Segmentation, Activation

**NEW QUESTION # 78**

Northern Trail Outfitters uses B2C Commerce and is exploring implementing Data Cloud to get a unified view of its customers and all their order transactions.

What should the consultant keep in mind with regard to historical data ingesting order data using the B2C Commerce Order Bundle?

- A. The B2C Commerce Order Bundle ingests 6 months of historical data.
- B. The B2C Commerce Order Bundle ingests 30 days of historical data.
- C. The B2C Commerce Order Bundle ingests 12 months of historical data.
- D. The B2C Commerce Order Bundle does not ingest any historical data and only ingests new orders from that point on.

**Answer: D**

Explanation:

The B2C Commerce Order Bundle is a data bundle that creates a data stream to flow order data from a B2C Commerce instance to Data Cloud. However, this data bundle does not ingest any historical data and only ingests new orders from the time the data stream is created. Therefore, if a consultant wants to ingest historical order data, they need to use a different method, such as exporting the data from B2C Commerce and importing it to Data Cloud using a CSV file12. Data Access and Export for B2C Commerce and Commerce Marketplace

**NEW QUESTION # 79**

How many calculated insights can be created per tenant?

- A. 0
- B. 1
- C. 2
- D. 3

**Answer: A**

Explanation:

The maximum number of calculated insights that can be created per tenant is 50. A calculated insight is a metric that defines and calculates a multidimensional measure on your data. You can use calculated insights to create segments and analyze your data in Data Cloud. You can also use calculated insights to create dashboards and reports in Tableau CRM. Reference: Calculated Insights

**NEW QUESTION # 80**

Cumulus Financial wants to create a segment of individuals based on transaction history data. This data has been mapped in the data model and is accessible via multiple container paths for segmentation.

What happens if the optimal container path for this use case is not selected?

- A. Data Cloud segmentation will automatically select the optimal container path.
- B. The resulting segment may be smaller or larger than expected.
- C. Alternate container paths will be suggested before the segment is published.
- D. The resulting segment will not be generated.

**Answer: B**

#### Explanation:

In Salesforce Data Cloud, when segmenting individuals based on transaction history data, there may be multiple paths to the same data through different objects in the data model. If the wrong container path is selected:

The segment may pull in too many or too few individuals because different container paths may define relationships differently. Some records may be unintentionally excluded or duplicated, affecting segmentation accuracy.

Identity resolution and relationships between objects might not behave as expected.

Why Not A? Data Cloud does not suggest alternate container paths automatically. The user must choose the correct path.

Why Not C? Data Cloud does not automatically select the optimal path; it relies on the user's selection.

Why Not D? The segment will still be generated but may have inaccurate results.

### NEW QUESTION # 81

When trying to disconnect a data source an error will be generated if it has which two dependencies associated with it?

Choose 2 answers

- A. Activation
- B. Data stream
- C. Activation target
- D. Segment

#### Answer: B,D

#### Explanation:

When disconnecting a data source in Salesforce Data Cloud, the system checks for active dependencies that rely on the data source. Based on Salesforce's official documentation (Disconnect a Data Source), the error occurs if the data source has data streams or segments associated with it. Here's the breakdown:

#### Key Dependencies That Block Disconnection

##### Data Stream (Option B):

Why It Matters:A data stream is the pipeline that ingests data from the source into Data Cloud. If an active data stream is connected to the data source, disconnecting the source will fail because the stream depends on it for ongoing data ingestion.

##### Resolution:Delete or pause the data stream first.

Documentation Reference:"Before disconnecting a data source, delete all data streams that are associated with it." (Salesforce Help Article)

##### Segment (Option C):

Why It Matters:Segments built using data from the source will reference that data source. Disconnecting the source would orphan these segments, so the system blocks the action.

##### Resolution:Delete or modify segments that depend on the data source.

Documentation Reference:"If there are segments that use data from the data source, you must delete those segments before disconnecting the data source." (Salesforce Help Article)

Why Other Options Are Incorrect Activation (A):Activations send segments to external systems (e.g., Marketing Cloud) but do not directly depend on the data source itself. The dependency chain is Segment # Activation, not Data Source # Activation.

Activation Target (D):Activation targets (e.g., Marketing Cloud) are destinations and do not tie directly to the data source.

#### Steps to Disconnect a Data Source

Delete Dependent Segments: Navigate to Data Cloud > Segments and remove any segments built using the data source.

Delete or Pause Data Streams: Go to Data Cloud > Data Streams and delete streams linked to the data source.

Disconnect the Data Source: Once dependencies are resolved, disconnect the source via Data Cloud > Data Sources.

### NEW QUESTION # 82

.....

To save the clients' time, we send the products in the form of mails to the clients in 5-10 minutes after they purchase our Salesforce-Data-Cloud study materials and we simplify the information to let the clients only need dozens of hours to learn and prepare for the test. To help the clients solve the problems which occur in the process of using our Salesforce-Data-Cloud Study Materials, the clients can consult u about the issues about our study materials at any time.
