NEW QUESTION # 82

A company uses a legacy finance application that runs on a single SQL Server instance. The company plans to implement Dynamics 365 Finance. The following table describes the current implementation and design decisions for the new implementation:

Feature	Current application	Dynamics 365 implementation
Business logic	Business logic is implemented as stored procedures in SQL Server.	Business logic will be implemented as Power Automate flows.
Data	Data is stored in SQL Server tables.	Data will be imported by using Dynamics 365 APIs.
Reports	Reports are stored in SQL Server Reporting Services.	Reports will be recreated by using Power BI.
User Interface	HTML markup for the user interface is stored as text values in SQL Server.	HTML markup for the user interface will be migrated directly by using FetchXML queries.
Users	Users are configured as SQL Server user account.	Users will be configured as Office 365 user accounts.

You need to identify the gap in the migration plan. Which requirement should you identify as a gap?

- A. Reports
- B. Business logic
- C. User Interface
- D. Data
- E. Users

Answer: E

Explanation:
