1Z1-947 Practice Exam | Trustworthy 1Z1-947 Exam Content

The top of the lists Oracle GoldenGate 19c Implementation Professional (1Z1-947) exam practice questions features are free demo download facility, 1 year free updated Oracle exam questions download facility, availability of Oracle GoldenGate 19c Implementation Professional (1Z1-947) exam questions in three different formats, affordable price, discounted prices and Oracle 1Z1-947 exam passing money back guarantee.

Oracle GoldenGate 19c Implementation Professional Sample Questions (Q48-Q53):

NEW QUESTION # 48
You have a table that has a primary key as well as an additional unique key. Failing to consistently identify a row will result in an error during conflict resolution. Which option solves this?

- A. Use the SQLEXEC feature to handle errors and resolve the conflict.
- B. Add unique indexes to the table to resolve the conflict.
- C. Use the RESOLVECONFLICT feature to handle errors and resolve the conflict.
- D. Use the HANDLECOLLISIONS feature to handle errors and resolve the conflict.

Answer: B

Explanation:
Oracle GoldenGate must consistently identify rows during replication using a primary or unique key. If row identification fails, adding or enforcing a unique index is the correct way to resolve the issue-not relying on collision or conflict-handling features.

NEW QUESTION # 49
A database that requires replication contains sensitive data that is not required on the target. How should you prevent this sensitive data from being replicated?

- A. Do not specify those columns in the ADD TRANDATA command.
- B. Use the COLS and COLSEXCEPT options in the TABLE parameter.
- C. Use the COLMAP option in the MAP parameter.
- D. Use the FILTER option in the MAP parameter.

Answer: B

Explanation:
To prevent sensitive data from being replicated, you should use the COLS and COLSEXCEPT options in the TABLE parameter. These options allow you to explicitly include or exclude specific columns from the replication process, ensuring that sensitive data is not transferred to the target database.

NEW QUESTION # 50
How is Oracle GoldenGate different from simple replication?

- A. It supports only batch-based replication
- B. It uses trigger-based data capture
- C. It uses log-based CDC and supports real-time, heterogeneous replication
- D. It only supports homogeneous databases

Answer: C

Explanation:
GoldenGate captures changes directly from redo/transaction logs and supports various databases in real-time.

NEW QUESTION # 51
You have configured and added the Extract and Replicat tasks by using the Direct Load method. What do you need to do to get the processes up and running?

- A. Start the Extract task, wait for it to stop, and then start the Replicat task
- B. Start the Extract task
- C. Start the Replicat task
- D. Start the Extract task and then start the Replicat task

Answer: A

Explanation:
In the Direct Load method, the Extract performs a one-time data load and then stops. Only after that should the Replicat be started to apply the loaded data. Starting both simultaneously is not valid for this method.

NEW QUESTION # 52
Which three are requirements to correctly configure an OGG trail file?

- A. Designation as local or remote
- B. A Replicat process
- C. A maximum file size
- D. An Extract process

- E. A trail file identifier

Answer: A,D,E

NEW QUESTION # 53
.....

We guarantee that you can pass the exam at one time even within one week based on practicing our 1Z1-947 exam materials regularly. 98 to 100 percent of former exam candidates have achieved their success by the help of our 1Z1-947 Practice Questions. And we have been treated as the best friend as our 1Z1-947 training guide can really help and change the condition which our loyal customers are in and give them a better future.
