

100% Pass Quiz Efficient Oracle - 1z0-1042-24 - New Oracle Cloud Infrastructure 2024 Application Integration Professional Mock Test

BTW, DOWNLOAD part of Easy4Engine 1z0-1042-24 dumps from Cloud Storage: https://drive.google.com/open?id=1QmogP2PBc21toMu3dg1CCWN8Z-g5p_S9

Easy4Engine is fully aware of the fact that preparing successfully for the Oracle 1z0-1042-24 exam in one go is a necessity because of the expensive registration fee. For applicants like you, success in the Oracle Cloud Infrastructure 2024 Application Integration Professional exam on the first attempt is crucial to saving money and time. Our Free Oracle 1z0-1042-24 Exam Questions will help you decide fast to buy the premium ones.

You may be given the Oracle 1z0-1042-24 practice exam results as soon as they have been saved in the software. Easy4Engine modified Oracle 1z0-1042-24 exam dumps allow students to learn effectively about the real Oracle 1z0-1042-24 Certification Exam. Oracle 1z0-1042-24 practice exam software allows students to review and refine skills in a preceding test setting.

Free PDF Quiz Oracle - 1z0-1042-24 - Oracle Cloud Infrastructure 2024 Application Integration Professional –Valid New Mock Test

The format name of Channel Partner Program 1z0-1042-24 practice test questions is Oracle PDF Questions file, desktop practice test software, and web-based practice test software. Choose the nay type of Channel Partner Program Oracle Cloud Infrastructure 2024 Application Integration Professional 1z0-1042-24 Practice Exam Questions that fit your Oracle 1z0-1042-24 exam preparation requirement and budget and start preparation without wasting further time.

Oracle 1z0-1042-24 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.
Topic 2	<ul style="list-style-type: none"> Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.
Topic 3	<ul style="list-style-type: none"> Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.

Topic 4	<ul style="list-style-type: none"> Using OIC Connections & Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.
Topic 5	<ul style="list-style-type: none"> Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.

Oracle Cloud Infrastructure 2024 Application Integration Professional Sample Questions (Q46-Q51):

NEW QUESTION # 46

You can recover unsaved changes in an Oracle Integration (OIC) integration that crashes during design time because of a browser crash or loss of network connectivity. Which statement is NOT valid with regard to this feature?

- A. A user with the ServiceAdministrator role can recover the unsaved changes.
- B. A backup copy is created after each completed task, therefore there is no time limit to logging back in and recovering your changes.
- C. A user with the ServiceAdministrator role can unlock an integration that has unsaved changes.
- D. Changes made while editing a Connections page cannot be recovered.
- E. Changes made while working inside the Map Editor cannot be recovered.

Answer: E

Explanation:

Comprehensive and Detailed Explanation:

Recovery Feature:

* E:False-mapper changes recoverable.

NEW QUESTION # 47

When creating integrations in Oracle Integration (OIC), a visual mapper enables you to map element nodes between applications by dragging source element nodes onto target element nodes. Which statement is NOT true about the OIC Data Mapper functionality?

- A. All transformation mappings use extensible Stylesheet Language (XSL).
- B. The data structure for the target service is always displayed on the right side in the Designer view.
- C. In the Designer view, the Sources section contains data structures of all available data objects, which includes integration metadata, tracking variables, global variables, and integration property values.
- D. All Source and Target data objects are represented internally as JSON structures.

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

Mapper Facts:

* D:False-XML-based, not JSON.

NEW QUESTION # 48

You have an Oracle Integration Cloud (OIC) synchronous integration flow that updates external systems with several invocations. However, several of your OIC integration clients are reporting that they are experiencing timeouts waiting for the response confirmation from this processing. Which is a legitimate strategy to mitigate this issue?

- A. Change the implementation logic to invoke multiple fine-grained external API calls within a single loop.
- B. Change the design implementation strategy to an asynchronous flow that provides a separate notification to clients when the processing is complete.
- C. Increase the blocking timeout within the OIC integration settings to allow for extended time.

Answer: B

Explanation:

Comprehensive and Detailed Explanation:

Timeouts in synchronous flows:

* Option A: Increasing timeouts might help but doesn't address efficiency and risks longer delays.

* Option B: Fine-grained calls in a loop could worsen performance, increasing latency.

* Option C: Switching to an asynchronous flow decouples client waits from processing, using callbacks or notifications- a proven mitigation strategy.

C aligns with best practices for responsiveness.

NEW QUESTION # 49

You are working on integration within Oracle Integration (OIC) that includes several connections to external systems. As part of your development work, you need to implement fault handling to ensure that any unexpected errors are caught and handled correctly. Which approach can you use for this requirement?

- A. Create a separate fault handling integration and configure your integration to invoke it when necessary using the Rethrow Fault action.
- B. Add a Try-Catch action to your integration flow and configure it to catch and handle faults.
- C. Use the Throw New Fault action within your integration flow to send caught faults to the OIC Error Hospital.
- **D. Open the Global Fault Handler page on the integration canvas and add actions to handle faults.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation:

Fault Handling:

* C: True-Global Fault Handler is standard.

NEW QUESTION # 50

Which is NOT an advantage of using Oracle Integration Cloud (OIC) for creating application integrations?

- A. Auto-association of Oracle SaaS applications
- B. Prebuilt integrations
- **C. User Choice of IDE for development**
- D. Data mapping recommendations
- E. Public/Private Cloud portability

Answer: C

Explanation:

Comprehensive and Detailed Explanation:

Oracle Integration Cloud (OIC) is a platform designed to simplify and accelerate the creation of integrations between various applications, whether cloud-based or on-premises. Its key advantages include:

* Prebuilt integrations (A): OIC provides a library of prebuilt adapters and integration recipes, reducing development time.

* Auto-association of Oracle SaaS applications (B): OIC seamlessly integrates with Oracle SaaS applications (e.g., HCM, ERP) via adapters, often auto-configuring connection details.

* Public/Private Cloud portability (D): OIC supports hybrid integrations, connecting public cloud services with private/on-premises systems via the Connectivity Agent.

* Data mapping recommendations (E): The OIC mapper provides intelligent suggestions to simplify data transformation between source and target schemas.

However, User Choice of IDE for development (C) is not an advantage because OIC uses a browser-based, low-code design environment rather than offering a choice of external Integrated Development Environments (IDEs) like Eclipse or IntelliJ.

Development is confined to OIC's built-in designer, which prioritizes simplicity over flexibility in tooling. This limitation distinguishes it from platforms where developers can select their preferred IDE.

NEW QUESTION # 51

.....

Easy4Engine delivers up to date 1z0-1042-24 exam products and modify them time to time. Latest 1z0-1042-24 exam questions are assembled in our practice test modernizes your way of learning and replaces the burdensome preparation techniques with flexible learning. We accord you an actual exam environment simulated through our practice test sessions that proves beneficial for 1z0-1042-24 Exams preparation. Our 1z0-1042-24 practice tests provide you knowledge and confidence simultaneously. Candidates who run across the extensive search, Easy4Engine products are the remedy for their worries. Once you have chosen for our 1z0-1042-24 practice test products, no more resources are required for exam preparation.
