These formats are CloudSec-Pro web-based practice test software, desktop practice exam software, and Palo Alto Networks Cloud Security Professional (CloudSec-Pro) PDF dumps files. All these three CloudSec-Pro exam questions formats are easy to use and compatible with all devices and the latest web browsers. Just choose the right Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam dumps format and start Palo Alto Networks CloudSec-Pro exam questions preparation today. As far as the prices of CloudSec-Pro exam dumps are concerned, we ensure you that our Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam questions prices are entirely affordable for everyone.

After years of operation, our platform has accumulated a wide network of relationships, so that we were able to learn about the changes in the exam at the first time. This is a benefit that students who have not purchased CloudSec-Pro exam guide can't get. The team of experts hired by Palo Alto Networks Cloud Security Professional study questions constantly updates and supplements the contents of study materials according to the latest syllabus and the latest industry research results. We also have dedicated staff to maintain CloudSec-Pro Exam Material every day, and you can be sure that compared to other test materials on the market, Palo Alto Networks Cloud Security Professional study questions are the most advanced.

100% Satisfaction Guarantee and Free DumpsFree Palo Alto Networks CloudSec-Pro Exam Questions Demo

Our company is widely acclaimed in the industry, and our CloudSec-Pro study materials have won the favor of many customers by virtue of their high quality. Started when the user needs to pass the qualification test, choose the CloudSec-Pro study materials, they will not have any second or even third backup options, because they will be the first choice of our practice exam materials. Our CloudSec-Pro Study Materials are devoted to research on which methods are used to enable users to pass the test faster.

Palo Alto Networks Cloud Security Professional Sample Questions (Q222-Q227):

NEW QUESTION # 222

Console is running in a Kubernetes cluster, and you need to deploy Defenders on nodes within this cluster.

Which option shows the steps to deploy the Defenders in Kubernetes using the default Console service name?

- A. From the deployment page in Console, choose twistlock-console for Console identifier, and run the curl | bash script on the master Kubernetes node.
- B. From the deployment page in Console, choose pod name for Console identifier, generate DaemonSet file, and apply the DaemonSet to twistlock namespace.
- C. From the deployment page in Console, choose twistlock-console for Console identifier, generate DaemonSet file, and apply DaemonSet to the twistlock namespace.
- D. From the deployment page configure the cloud credential in Console and allow cloud discovery to auto- protect the Kubernetes nodes.

Answer: C

Explanation:

Reference: <https://cdn.twistlock.com/docs/downloads/Twistlock-Reference-Architecture.pdf> Deploying Defenders in a Kubernetes cluster involves generating a DaemonSet configuration from the Prisma Cloud Console. The "twistlock-console" is typically used as the Console identifier, which facilitates the communication between the Defenders and the Console. The generated DaemonSet file is then applied to the Kubernetes cluster, specifically within the "twistlock" namespace, ensuring that a Defender is deployed on each node within the cluster for comprehensive protection. This method is in line with Kubernetes best practices for deploying cluster-wide agents, ensuring seamless and scalable deployment of Prisma Cloud's security capabilities.

NEW QUESTION # 223

Which two CI/CD plugins are supported by Prisma Cloud as part of its Code Security? (Choose two.)

- A. Visual Studio Code
- **B. CircleCI**
- C. IntelliJ
- **D. Checkov**

Answer: B,D

Explanation:

<https://live.paloaltonetworks.com/t5/blogs/what-is-changing-for-ci-cd-plugins/ba-p/461676> Prisma Cloud has announced changes to its CI/CD plugins due to the acquisition of Bridgecrew1. The existing IaC functionality in Prisma Cloud will be replaced by a Prisma "cloud code security" (CCS) module that delivers Bridgecrew integration in Prisma Cloud1. As part of this change, several CI/CD plugins that Prisma Cloud currently uses will either be replaced or modified1.

According to the information from the link, both Checkov and CircleCI are listed as integrations that will switch to the Prisma "cloud code security" (CCS) module1. Checkov is an open-source command-line interface (CLI) utility that includes more than 750 predefined policies and supports custom policies1. CircleCI is a continuous integration and continuous delivery platform1.

NEW QUESTION # 224

The attempted bytes count displays?

- A. traffic that is either denied by the firewall rules or traffic that was reset by a host or virtual machine that received the packet and responded with a RST packet.
- **B. traffic that is either denied by the security group or firewall rules or traffic that was reset by a host or virtual machine that received the packet and responded with a RST packet.**
- C. traffic denied by the security group or traffic that was reset by a host or virtual machine that received the packet and responded with a RST packet.
- D. traffic that is either denied by the security group or firewall rules.

Answer: B

Explanation:

The attempted bytes count in Prisma Cloud's context refers to the amount of traffic that is either denied by security group or firewall rules, or the traffic that was reset by a host or virtual machine (VM) that received the packet and responded with a RST (Reset) packet (A). This metric is crucial for understanding the nature of blocked or interrupted traffic within the cloud environment, helping administrators identify potential security threats or misconfigurations that may be preventing legitimate traffic. It encompasses both the traffic actively blocked by security controls and the traffic that the receiving entity deemed invalid or unwanted, thus providing a comprehensive view of the network's defensive posture.

NEW QUESTION # 225

An administrator wants to retrieve the compliance policies for images scanned in a continuous integration (CI) pipeline. Which endpoint will successfully execute to enable access to the images via API?

- A. GET /api/v22.01/policies/compliance/ci
- **B. GET /api/v22.01/policies/compliance/ci/images**
- C. GET /api/v22.01/policies/compliance/ci/serverless
- D. GET /api/v22.01/policies/compliance

Answer: B

Explanation:

The following curl command creates a single rule compliance policy for container images scanned in the CI pipeline: curl 'https://<CONSOLE>/api/v<VERSION>/policies/compliance/ci/images' \

NEW QUESTION # 226

Which container scan is constructed correctly?

- A. twistcli images scan -u api -p api --docker-address https://us-west1.cloud.twistlock.com/us-3-123456789 myimage/latest
- B. twistcli images scan -u api -p api --address https://us-west1.cloud.twistlock.com/us-3-123456789 -- container myimage/latest
- C. twistcli images scan -u api -p api --address https://us-west1.cloud.twistlock.com/us-3-123456789 -- details myimage/latest
- D. twistcli images scan --docker-address https://us-west1.cloud.twistlock.com/us-3-123456789 myimage/ latest

Answer: C

Explanation:

The correct construction for a container scan using the TwistCLI tool provided by Prisma Cloud (formerly Twistlock) is shown in option C. This command uses the TwistCLI tool to scan a container image, specifying the necessary authentication credentials (username and password with '-u' and '-p' flags), the address of the Prisma Cloud instance (with the '--address' flag), and the image to be scanned (in this case, 'myimage/latest').

The inclusion of the '--details' flag is a common practice to obtain detailed scan results, which is crucial for in-depth analysis and remediation efforts. This command structure aligns with the standard usage of TwistCLI for image scanning purposes, as documented in Prisma Cloud's official resources and guides.

NEW QUESTION # 227

.....

Do you want to pass CloudSec-Pro exam easily? CloudSec-Pro exam training materials of DumpsFree is a good choice, which covers all the content and answers about CloudSec-Pro exam dumps you need to know. Then you can master the difficult points in a limited time, pass the CloudSec-Pro Exam in one time, improve your professional value and stand more closely to success.

Test CloudSec-Pro Valid: <https://www.dumpsfree.com/CloudSec-Pro-valid-exam.html>

Palo Alto Networks CloudSec-Pro Testing Center After receiving many users' feedback, we never stop trying to do better, GetCertKey provide some CloudSec-Pro samples of questions and answers, There are so many success examples by choosing our CloudSec-Pro exam collection, so we believe you can be one of them if you choose our nearly perfect CloudSec-Pro exam torrent materials with high quality and accuracy, Palo Alto Networks CloudSec-Pro Testing Center Besides, they are accessible to both novice and experienced customers equally.

Other things, however, will make them scream, holler, bang the table, CloudSec-Pro and threaten to withhold your check, Professional expert group, After receiving many users' feedback, we never stop trying to do better.

Start Palo Alto Networks CloudSec-Pro Exam Preparation Today And Get Success

GetCertKey provide some CloudSec-Pro samples of questions and answers, There are so many success examples by choosing our CloudSec-Pro exam collection, so we believe you can be one of them if you choose our nearly perfect CloudSec-Pro exam torrent materials with high quality and accuracy.

Besides, they are accessible to both novice and experienced customers equally, We will send Cloud Security Engineer CloudSec-Pro test questions to your email once we receive your order, pls make sure your email address valid or leave an alternate email.
