## NEW QUESTION # 62
Where do you enable a customer-specific field to be available for Uls and reports relevant for the same business context?

- A. In the Maintain SAP Business Technology Platform Extensions app
- B. In the Custom Fields app
- C. In the Runtime Authoring mode
- D. In the Extensibility Cockpit app

**Answer: B**

Explanation:
You enable a customer-specific field to be available for UIs and reports relevant for the same business context in the Custom Fields app. The Custom Fields app allows you to create and manage custom fields for business objects in SAP S/4HANA Cloud, public edition. You can define the properties of the custom fields, such as the label, data type, length, and default value. You can also specify the UIs and reports where you want the custom fields to appear, and the business context that determines the visibility and authorization of the custom fields. The Custom Fields app also enables you to activate the custom fields and generate the corresponding CDS views and OData services for consumption by other applications. **NEW QUESTION # 63**
In the Organizational Structure app in SAP Central Business Configuration, which of the following entities can be added under the Company root node? Note: There are 2 correct answers to this question.

- A. Sales Organization
- B. Purchasing Organization
- C. Division
- D. Plant

**Answer: A,B**

Explanation:
In the Organizational Structure app within SAP Central Business Configuration, the structure of an organization is defined by specifying various entities that reflect the business's operational and functional areas. Under the Company root node, entities such as Sales Organization and Purchasing Organization can be added:
* Sales Organization: This entity is responsible for the distribution and sale of goods and services. It defines the scope of sales activities, including customer negotiations, sales orders, and distribution.
Adding a Sales Organization under the Company root node allows for the management and configuration of sales-related processes within SAP S/4HANA Cloud Public Edition.
* Purchasing Organization: This entity manages procurement activities, including the negotiation of purchasing conditions, ordering, and the receipt of goods. By adding a Purchasing Organization under the Company root node, the system can handle procurement processes, vendor relationships, and purchasing analytics.
These entities are crucial for defining how the organization operates within the SAP S/4HANA Cloud Public Edition environment, facilitating the alignment of the software's functionality with the company's business processes.
