

# Test SC-401 Questions Answers - Free SC-401 Exam Questions

What's more, part of that Pass4training SC-401 dumps now are free: [https://drive.google.com/open?id=1STYb5s0dZAsRM4JOBM1YOFrCUB\\_CH-Pd](https://drive.google.com/open?id=1STYb5s0dZAsRM4JOBM1YOFrCUB_CH-Pd)

In order to make the exam easier for every candidate, Pass4training compiled such a study materials that allows making you test and review history performance, and then you can find your obstacles and overcome them. In addition, once you have used this type of SC-401 Exam Question online for one time, next time you can practice in an offline environment. It must be highest efficiently SC-401 exam tool to help you pass the exam.

## Microsoft SC-401 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Implement Data Loss Prevention and Retention: This section evaluates Data Protection Officers on designing and managing data loss prevention (DLP) policies and retention strategies. It includes setting policies for data security, configuring Endpoint DLP, and managing retention labels and policies. Candidates must understand adaptive scopes, policy precedence, and data recovery within Microsoft 365.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Manage Risks, Alerts, and Activities: This section assesses Security Operations Analysts on insider risk management, monitoring alerts, and investigating security activities. It covers configuring risk policies, handling forensic evidence, and responding to alerts using Microsoft Purview and Defender tools. Candidates must also analyze audit logs and manage security workflows.</li></ul>

Topic 3	<ul style="list-style-type: none"> <li>Implement Information Protection: This section measures the skills of Information Security Analysts in classifying and protecting data. It covers identifying and managing sensitive information, creating and applying sensitivity labels, and implementing protection for Windows, file shares, and Exchange. Candidates must also configure document fingerprinting, trainable classifiers, and encryption strategies using Microsoft Purview.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Protect Data Used by AI Services: This section evaluates AI Governance Specialists on securing data in AI-driven environments. It includes implementing controls for Microsoft Purview, configuring Data Security Posture Management (DSPM) for AI, and monitoring AI-related security risks to ensure compliance and protection.</li> </ul>

## Free SC-401 Exam Questions, Dump SC-401 Torrent

Your performance and exam skills will be improved with our SC-401 practice test software. The software provides you with a range of SC-401 exam dumps, all of which are based on past Microsoft SC-401 certification. Either way, the SC-401 Practice Exam software will provide you with feedback on your performance. The Administering Information Security in Microsoft 365 (SC-401) practice test software also includes a built-in timer and score tracker so students can monitor their progress.

## Microsoft Administering Information Security in Microsoft 365 Sample Questions (Q251-Q256):

### NEW QUESTION # 251

You have a Microsoft S65 E5 subscription that contains two users named User1 and Admin1. Admin1 manages audit retention policies for the subscription.

You need to ensure that the audit logs of User1 will be retained for 10 years.

What should you do first?

- A. Assign a 10-year audit log retention add-on license to User1.**
- B. Assign a Microsoft Purview Audit (Premium) add on license to User1.
- C. Assign a 10 year audit log retention add-on license to Admin1.
- D. Assign a Microsoft Purview Audit (Premium) add-on license to Admin1.

### Answer: A

Explanation:

The scenario is about retaining audit logs for User1 for 10 years in Microsoft 365. Admin1 is responsible for managing audit retention policies, but the requirement specifically applies to User1's audit logs.

Key points:

Microsoft 365 E5 includes Audit (Premium) by default. This provides access to advanced auditing features and retention up to 1 year.

To retain audit logs for longer than 1 year (such as 10 years), Microsoft requires the 10-year Audit Log Retention Add-on license. This license must be assigned to the user whose activities need to be retained (User1), not the administrator (Admin1).

Admin1 only needs permissions to configure and manage retention policies, but the actual long-term retention is tied to the licensed users' activity.

Why other options are incorrect:

A). Assign a Microsoft Purview Audit (Premium) add-on license to User1: Not needed because E5 already includes Audit (Premium).

B). Assign a 10-year audit log retention add-on license to Admin1: Incorrect because Admin1 is not the user whose logs must be retained; the license applies to the user being audited, not the admin.

D). Assign a Microsoft Purview Audit (Premium) add-on license to Admin1: Again, unnecessary because E5 already includes Audit (Premium), and Admin1's license does not affect User1's log retention.

Reference:

Microsoft Learn: Audit (Premium) licensing and requirements

"To retain audit records for 10 years, assign the 10-year Audit Log Retention Add-on license to the users whose activities you want to retain."

## NEW QUESTION # 252

### HOTSPOT

You have a Microsoft 365 E5 subscription that contains a user named User1.

You deploy Microsoft Purview Data Security Posture Management for AI (DSPM for AI).

You need to ensure that User1 can perform the following actions:

# View recommendations from the Recommendations page.

# View the user risk level for all events by using Activity explorer.

The solution must follow the principle of least privilege.

To which role group should you add User1 for each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer:

Explanation:

Explanation:

Box 1: The Insider Risk Management Investigators role allows users to view recommendations related to insider risk cases and Microsoft Purview DSPM for AI insights. This role is appropriate because it grants access to review AI-related risk recommendations without unnecessary administrative privileges.

Box 2: The Insider Risk Management Analysts role allows users to analyze user risk levels and events using Activity Explorer. This follows the principle of least privilege, ensuring that User1 can only view risk levels and investigate but does not gain full administrative control over insider risk policies.

## NEW QUESTION # 253

### Hotspot Question

You have a Microsoft SharePoint Online site that contains the following files.

Users are assigned roles for the site as shown in the following table.

Which files can User1 and User2 open? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer:

Explanation:

Explanation:

User1: User1 is a Site Owner, meaning they have full control over all files in the site. Even though File3.docx is blocked by DLP, a Site Owner can override or manage DLP restrictions and still access all files.

User2: User2 is a Site Member, meaning they have standard permissions to view and edit files unless blocked. File1.docx has no DLP action, so User2 can access it. File2.docx is matched by DLP, but it is not blocked, so User2 can still access it. File3.docx is blocked by DLP, which means User2 cannot access it.

## NEW QUESTION # 254

### HOTSPOT

You need to meet the technical requirements for the confidential documents.

What should you create first, and what should you use for the detection method? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

### Answer:

Explanation:

Explanation:

A screenshot of a computer AI-generated content may be incorrect.

To detect and protect confidential documents, we need a custom rule to identify project codes that start with 999 (since they are classified as confidential).

Box 1: A Sensitive Info Type (SIT) allows Microsoft Purview DLP policies to recognize structured data (e.g., project codes). DLP policies require a sensitive info type to detect content based on patterns, keywords, or dictionary terms. A sensitivity label alone

does not define detection logic-it is used for classification and protection after content is identified.

Box 2: Since project codes follow a structured 10-digit pattern, we should use a Regular Expression (Regex) to match project codes that start with 999.

Example Regex pattern:

999\d{7}

This pattern detects a 10-digit number starting with "999".

### NEW QUESTION # 255

You have a Microsoft SharePoint Online site named Site! that contains the files shown in the following table.

You have a data loss prevention (DLP) policy named DLP1 that has the advanced DLP rules shown in the following table.

You apply DLP1 toSite1.

Which policy tips will appear for File2?

- A. Tip3 only
- B. Tip1 only
- **C. Tip2 only**
- D. Tip1 and Tip2 only

**Answer: C**

### NEW QUESTION # 256

.....

We often receive news feeds and what well-known entrepreneurs have done to young people. The achievements of these entrepreneurs are the goals we strive for and we must value their opinions. And you may don't know that they were also benefited from our SC-401 study braindumps. We have engaged in this career for over ten years and helped numerous entrepreneurs achieved their SC-401 certifications toward their success. Just buy our SC-401 learning materials and you will become a big man as them.
