IT업계 종사자라면 누구나 ISACA 인증CISM-CN시험을 패스하고 싶어하리라고 믿습니다. 많은 분들이 이렇게 좋은 인증시험은 아주 어렵다고 생각합니다. 네 맞습니다. 패스할 확률은 아주 낮습니다. 노력하지 않고야 당연히 불

가능한 일이 아니겠습니까? ISACA 인증CISM-CN 시험은 기초 지식 그리고 능숙한 전업지식이 필요 합니다.
ITDumpsKR는 여러분들한테ISACA 인증CISM-CN시험을 쉽게 빨리 패스할 수 있도록 도와주는 사이트입니다.
ITDumpsKR의ISACA 인증CISM-CN시험관련 자료로 여러분은 짧은 시간내에 간단하게 시험을 패스할수 있습니다.
시간도 절약하고 돈도 적게 들이는 이런 제안은 여러분들한테 딱 좋은 해결책이라고 봅니다.

최신 Isaca Certification CISM-CN 무료샘플문제 (Q674-Q679):

질문 # 674

誰最適合確定資料庫中的資訊應如何分類?

- A. 資料庫管理員 (DBA)
- B. 資料庫分析師
- C. 資料擁有者
- D. 資訊安全分析師

정답: C

설명:

= Data owner is the best suited to determine how the information in a database should be classified, because data owner is the person who has the authority and responsibility for the data and its protection. Data owner is accountable for the business value, quality, integrity, and security of the data. Data owner also defines the data classification criteria and levels based on the data sensitivity, criticality, and regulatory requirements.

Data owner assigns the data custodian and grants the data access rights to the data users. Data owner reviews and approves the data classification policies and procedures, and ensures the compliance with them.

Data Classification, page 331

질문 # 675

在決定資訊資產的關鍵性和敏感性時，下列哪一項是最重要的考慮因素？

- A. 資產支援的業務功能
- B. 業務連續性測試的結果
- C. 可能影響資產的威脅數量
- D. 保護資產所需的投資

정답: A

질문 # 676

下列哪一項是決定事件回應計畫有效性的最佳方法？

- A. 進行桌面練習
- B. 執行滲透測試
- C. 根據最佳實踐對計劃進行基準測試
- D. 查看先前的審核報告

정답: A

설명:

A tabletop exercise is a simulation of a potential incident scenario that involves the key stakeholders and tests the roles, responsibilities, and procedures of the incident response plan. It is the best way to determine the effectiveness of the plan because it allows the participants to identify and address any gaps, weaknesses, or ambiguities in the plan, as well as to evaluate the communication, coordination, and decision-making processes. A tabletop exercise can also help to raise awareness, enhance skills, and improve teamwork among the incident response team members and other relevant parties.

질문 # 677

組織的品質流程可以透過提供以下內容來最好地支援安全管理：

- A. 安全系統文件的儲存庫。
- B. 安全配置控制項。
- C. 安全策略指導。
- D. 確保滿足安全要求。

정답: D

질문 # 678

依安全等級標註資訊:

- A. 提高人們安全處理資訊的可能性。
- B. 減少所需對策的數量和類型。
- C. 減少為每個分類確定基線控制的需要。
- D. 如果資訊處理不安全，會影響後果。

정답: A

설명:

Labeling information according to its security classification enhances the likelihood of people handling information securely. Security classification is a process of categorizing information based on its level of sensitivity and importance, and applying appropriate security controls based on the level of risk associated with that information¹. Labeling is a process of marking the information with the appropriate classification level, such as public, internal, confidential, secret, or top secret². The purpose of labeling is to inform the users of the information about its value and protection requirements, and to guide them on how to handle it securely. Labeling can help users to:

- *Identify the information they are dealing with and its classification level
- *Understand their roles and responsibilities regarding the information
- *Follow the security policies and procedures for the information
- *Avoid unauthorized access, disclosure, modification, or destruction of the information
- *Report any security incidents or breaches involving the information

Labeling can also help organizations to:

- *Track and monitor the information and its usage
 - *Enforce access controls and encryption for the information
 - *Audit and review the compliance with security standards and regulations for the information
 - *Educate and train employees and stakeholders on information security awareness and best practices
- Therefore, labeling information according to its security classification enhances the likelihood of people handling information securely, as it increases their awareness and accountability, and supports the implementation of security measures. The other options are not the primary benefits of labeling information according to its security classification. Reducing the number and type of countermeasures required is not a benefit, but rather a consequence of applying security controls based on the classification level. Reducing the need to identify baseline controls for each classification is not a benefit, but rather a prerequisite for labeling information according to its security classification. Affecting the consequences if information is handled insecurely is not a benefit, but rather a risk that needs to be managed by implementing appropriate security controls and incident response procedures.
