## How to book the LPIC-1 Linux Administrator , 101-500 Exam

These are following steps for registering the 101-500 exam.

- Step 1: Go to the 101-500 Official Site
- Step 2: Read the instructions carefully, follow prompts.
- Step 3: Apply for the 101-500.

## What is LPI 101-500 exam?

There are some important details that you need to know about the LPI 101-500 exam. One of the first things is that this test consists of around 60 questions that are based on the multiple-choice format or you can face with fill-in-the-blank. The students will have 90 minutes to answer all of these questions, so they better move faster. To pass this certification exam, the learners need to get a minimum score of 500 points out of 800. Note that the test is available in many languages, including English, German, Chinese (Traditional and Simplified), Japanese, Portuguese (Brazilian), and Spanish. LPI 101-500 costs \$200.

Scheduling the 101-500 exam is very simple. All you need to do is register with the LPI and get your ID. After that, you will use the ID to create a Pearson VUE account. From there, you have to select your test. If you fail on your first try, you can take it again after waiting for at least 7 days. But if you still fail, you will have to wait for a month for your next attempt. Once you pass the exam, the certification is only valid for 5 years.

Lpi 101-500 Exam covers a range of topics such as system architecture, Linux installation and package management, GNU and Unix commands, devices, Linux filesystems, and file system hierarchy standard. Candidates are expected to have a deep understanding of these topics to pass the exam. 101-500 exam is designed to test the practical skills of the candidates, and they are required to perform tasks such as installing and configuring Linux systems, managing users and groups, and troubleshooting common system issues. Passing the Lpi 101-500 exam demonstrates that a candidate has a strong foundation in Linux administration and is ready to take on more advanced roles in the field.

You can have conversations with us through online and offline service.

### Lpi LPIC-1 Exam 101, Part 1 of 2, version 5.0 Sample Questions (Q91-Q96):

#### NEW QUESTION # 91

Select the line that best represents what permissions the /etc/passwd file should have

- A. -rw----- 1 root root 531 Apr 3 12:36 /etc/passwd
- B. -rw-r--r-- 1 root root 531 Apr 3 12:36 /etc/passwd
- C. all answers listed are not correct
- D. all answers listed are correct
- E. -rw-r--r-- 1 1 1 531 Apr 3 12:36 /etc/passwd

**Answer: B**

#### NEW QUESTION # 92

What of the following statements are true regarding /dev/ when using udev? (Choose TWO correct answers.)

- A. The content of /dev/ is stored in /etc/udev/dev and is restored during system startup.
- B. The /dev/ directory is a filesystem of type tmpfs and is mounted by udev during system startup.
- C. Entries for all possible devices get created on boot even if those devices are not connected.
- D. When using udev, it is not possible to create block or character devices in /dev/ using mknod.
- E. Additional rules for udev can be created by adding them to /etc/udev/rules.d/.

**Answer: B,E**

#### NEW QUESTION # 93

Which command is used in a Linux environment to create a new directory? (Specify ONLY the command without any path or parameters.)

- A. /usr/bin/mkdir
- B. mkdir

**Answer: B**

Explanation:

The mkdir command is used in a Linux environment to create a new directory. The mkdir command takes one or more arguments that specify the name and path of the directory to be created. For example, mkdir foo will create a directory named foo in the current working directory, while mkdir /home/bar will create a directory named bar in the /home directory. The mkdir command can also create multiple directories at once by using the -p option, which creates any missing parent directories along the path. For example, mkdir -p

/tmp/a/b/c will create the directories /tmp, /tmp/a, /tmp/a/b and /tmp/a/b/c if they do not exist already.
