Salesforce Certified Advanced Administrator Sample Questions (Q47-Q52):

NEW QUESTION # 47
Ursa Major Solar has a junction object that connects Docs with Solar Panels. The administrator needs users to be able to see all the solar panels that a Dot is related to. Users already have access to the Bot and the Junction, but not the Solar Panel object.
What access docs the user need to be able to see the solar panel records?

- A. Read permission is required on both master records.
- B. Access permission Is not required on either master record.
- C. Read permission is required on at least are master record.
- D. Create permission Is required on both master records.

Answer: C

Explanation:
To access a junction object record, a user needs to have at least read permission on one of its master records and on the junction object itself. If the user does not have access to either master record, they cannot access the junction object record. If the user has access to both master records, they can access the junction object record with the most permissive access level of either master record. References:

NEW QUESTION # 48
Cloud Kicks wants to force its users to set a value for a custom called Tier by answering a series of questions.
What two functions should the administrator use to ensure that users cannot bypass answering these questions in order to determine their Tier value.
Choose 2 answers

- A. Set up a list view for the list of questions.
- B. Make the field Read Only on the page layout.
- C. Use a screen flow to ask the question.
- D. Set up a restriction rule on the field.

Answer: B,C

Explanation:
Making the field Read Only on the page layout prevents users from manually entering or editing the field value on the record page. This ensures that users cannot bypass answering the questions in order to determine their Tier value. Using a screen flow to ask the questions allows administrators to create an interactive user interface that guides users through a series of screens based on their inputs and logic. A screen flow can be used to ask questions and set the field value based on the answers

NEW QUESTION # 49
Regardless of the entitlement model used, which page layouts might you want to customize?

- A. Case page layouts
- B. Contact page layouts
- C. all of the above
- D. Account page layouts
- E. Asset page layouts
- F. Entitlements page layout

- G. none of the above

Answer: C

NEW QUESTION # 50
A sales manager wants to edit the opportunities owned by the sales team. The manager does not have Edit access to the Opportunity object. What is a recommended solution? * (1 Point)

- A. Create permission set and associate Edit opportunity to the user record
- B. Redefine the role hierarchy by enabling"grant access using hierarchies
- C. Change the opportunity's organization-wide default setting to Public Read/Write
- D. Enable team selling on the Opportunity object to Grant Read/Writeaccess

Answer: A

NEW QUESTION # 51
Cloud Kicks needs to create 10 separate environments for various projects. A developer sandbox has been created with the necessary configuration and data. The administrator needs to create 10 now environments with the same metadata and data for each user.
What should the administrator do to meet the requirements?

- A. Use clone a sandbox option from the existing sandbox.
- B. Use a scratch org definition to copy sandbox.
- C. Use the existing sandbox as a sandbox template.
- D. Use refresh sandbox without Auto Activate.

Answer: A

Explanation:
Cloning a sandbox creates a duplicate copy of an existing sandbox with the same type, name, description, configuration, and license type as the original sandbox. Cloning a sandbox is useful when you need to create multiple sandboxes with the same metadata and data for testing or development purposes. References:
