- B. Can be positive or negative.
- C. Computed for an activity by subtracting its early finish from its late finish, or its early start from its late start.

NEW QUESTION # 75

Schedule Risk may affect the following:

- A. The final milestones phase milestones, critical and non-critical activities
- B. Long-duration activities
- C. Calendar shifts
- D. Activity resource allocation

Answer: A

NEW QUESTION # 76

If the administrative constraints for developing the precedence diagram, as provided in the contract documents, indicate that no individual construction activities shall have a longer duration of two months, how many activities in the "normal" schedule would be affected?

□

- A. 12.
- B. 13.
- C. 14.
- D. Cannot be determined.

Answer: A

Explanation:

To determine how many activities in the "normal" schedule would be affected by the constraint of no activity exceeding a two-month duration (approximately 60 days):

Review the "Normal Schedule Days" Column:

Look for activities with a duration greater than 60 days in the "Normal Schedule Days" column of the table provided in the image.

Count the Affected Activities:

Count all activities where the "Normal Schedule Days" value exceeds 60.

Activities with durations greater than 60 days:

Activity ID 1000: 1072 days

Activity ID 1001: 85 days

Activity ID 2001: 92 days

Activity ID 3001: 152 days

Activity ID 4001: 152 days

Activity ID 5001: 102 days

Activity ID 6001: 140 days

Activity ID 6002: 115 days

Activity ID 6003: 152 days

Activity ID 9001: 175 days

Activity ID 9002: 180 days

Activity ID 9005: 72 days

Total Count:

There are 12 activities in the "normal" schedule exceeding the 60-day duration constraint.

Verified answer: A. 12.

Detailed Explanation with Reference: The constraint specifies that no activity should exceed a two-month (60-day) duration. By examining the "Normal Schedule Days" column, any activity with a duration greater than 60 days is non-compliant and therefore affected. The PSP study guide emphasizes reviewing contract requirements to ensure schedules adhere to such administrative constraints.

NEW QUESTION # 77

Identify the minimum project duration.

- A. 20 months.
- B. 19 months.
- C. 16 months.
- D. 21 months.

Answer: C

Explanation:

Minimum Project Duration Calculation:

The critical path determines the minimum project duration.

Path: A → B → G → H → 16 months.

Cross-Verification with Network Diagram:

Other paths have shorter durations or do not impact the overall project finish date.

Verification with PSP Guidelines:

Critical path analysis is central to determining project duration (Ref: PSP Study Guide, Chapter 2A: Critical Path Method).
