## CPMAI Preparation Store - Braindumps CPMAI Torrent

Our CPMAI study materials can help you pass the exam faster and take the certificate you want with the least time and efforts. Then you will have one more chip to get a good job. Our CPMAI study braindumps allow you to stand at a higher starting point, pass the CPMAI Exam one step faster than others, and take advantage of opportunities faster than others. With a high pass rate as 98% to 100%, our CPMAI training questions can help you achieve your dream easily.

## PMI Cognitive Project Management in AI (PMI-CPMAI) Sample Questions (Q103-Q108):

### NEW QUESTION # 103

You are working with a dataset that has a high number of dimensions. You're running into issues because some dimensions don't have enough real examples to properly train the systems for predictable results.

What's your best course of action?

- A. Try to get additional data - at least 5 training examples for each dimension in the representation
- B. Keep going as planned and the problem will eventually correct itself
- C. Try to improve the quality of your data through more preparation

- D. Try to get additional information from project lead to see how many examples per dimension are needed

**Answer: A**

#### **NEW QUESTION # 104**

Your team is running a simulation-based optimization exercise to increase routing efficiency. Learning for this exercise is done through "trial and error". Which type of machine learning approach is being leveraged for this exercise?

- **A. Reinforcement Learning**
- B. Unsupervised Learning
- C. Supervised Learning
- D. All would work equally well

**Answer: A**

#### **NEW QUESTION # 105**

During which phase of an AI project should you consider Trustworthy AI considerations?

- A. Phase II: Data Understanding
- B. Phase VI: Model Operationalization
- C. Phase I: Business Understanding
- **D. Every Phase of the AI project**

**Answer: D**

#### **NEW QUESTION # 106**

You're working with petabytes of data and need to make this dataset more manageable. To do this, you want to reduce the number of variables under consideration. What is the name for this process?

- A. Gradient Descent
- B. Data selection
- C. Multivariate regression
- **D. Dimensionality Reduction**

**Answer: D**

#### **NEW QUESTION # 107**

A team has started working on their first AI project and they are running this project like a traditional software development project. About two months into the project the team is hitting some major issues, and you're tasked with coming in to help manage this project. Immediately you realize that AI projects need to be treated like data centric projects. What's the next best course of action?

- A. Hire an entirely new team making sure there is at least one data scientist on this new team
- **B. Bring in data centric methodology best practices to get this project back on track**
- C. Get the existing team up to speed and make sure existing Agile approaches can support the AI effort
- D. Hire an outside consulting firm to handle the technical aspects while you train the team yourself on data centric best practices

**Answer: B**

#### **NEW QUESTION # 108**
