Our product boasts many advantages and varied functions to make your learning relaxing and efficient. The client can have a free download and tryout of our DEP-2025 exam torrent before they purchase our product and can download our study materials immediately after the client pay successfully. DEP-2025 exam question provides the free update and the discounts for the old client and our experts check whether our test bank has been updated on the whole day and if there is the update the system will send the update automatically to the client. Thus you can have an efficient learning and a good preparation of the exam. It is believed that our DEP-2025 latest question is absolutely good choices for you

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 2	<ul style="list-style-type: none"> Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.

Topic 3	<ul style="list-style-type: none"> • Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 4	<ul style="list-style-type: none"> • Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.
Topic 5	<ul style="list-style-type: none"> • Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 6	<ul style="list-style-type: none"> • Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.
Topic 7	<ul style="list-style-type: none"> • Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 8	<ul style="list-style-type: none"> • Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 9	<ul style="list-style-type: none"> • Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 10	<ul style="list-style-type: none"> • Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 11	<ul style="list-style-type: none"> • Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 12	<ul style="list-style-type: none"> • Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple's built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 13	<ul style="list-style-type: none"> • Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.

Realistic DEP-2025 Downloadable PDF | Easy To Study and Pass Exam at first attempt & Authoritative Apple Apple Deployment and Management Exam

Firmly believe in an idea, the DEP-2025 exam questions are as long as the user to follow our steps, follow our curriculum requirements, users can be good to achieve their goals, to obtain the DEP-2025 qualification certificate of the target. Before you make your decision to buy our DEP-2025 learning guide, you can free download the demos to check the quality and validity. Then you can know the DEP-2025 training materials more deeply.

Apple Deployment and Management Exam Sample Questions (Q64-Q69):

NEW QUESTION # 64

What must an enrollment profile contain?

- A. A configuration profile
- B. A provisioning profile
- C. A supervision token
- **D. An MDM payload**

Answer: D

Explanation:

An enrollment profile is what links an Apple device to an MDM server. Apple Learning resources are clear that the enrollment profile must always contain an MDM payload. This payload defines the server address, authentication method, and settings required for the device to establish secure management. Without the MDM payload, the device cannot receive configuration profiles, apps, or commands from the MDM solution.

Other items such as configuration profiles or provisioning profiles may be distributed after enrollment, but they are not part of the required enrollment profile. The MDM payload is therefore the critical element that makes enrollment functional.

References: Apple Platform Deployment - "Enrollment profiles in MDM."

NEW QUESTION # 65

Which feature allows IT administrators to manage firewall settings on a device?

- **A. Configuration profiles**
- B. iCloud
- C. MDM
- D. Find My

Answer: A

Explanation:

Configuration profiles allow IT administrators to manage firewall settings on macOS devices, enabling or disabling the firewall, specifying allowed apps, or configuring stealth mode. These profiles are deployed via MDM or manually, ensuring network security. Find My (option B) and iCloud (option C) are unrelated to firewall management. MDM (option D) delivers profiles, but the profiles contain the settings. Note: iOS/iPadOS devices don't have user-configurable firewalls, so this applies to macOS. The Apple Platform Deployment Guide details firewall configuration via profiles.

NEW QUESTION # 66

Which of these is a benefit of Platform Single Sign-On (Platform SSO) for macOS?

- A. User can leverage IdP passkey support in iCloud Keychain.
- B. Users can get a Federated Managed Apple Account.
- C. Users can turn on Kerberos SSO.
- **D. Users can synchronize local account credentials with an identity provider (IdP).**

Answer: D

Explanation:

Apple's Platform Single Sign-On (Platform SSO) integrates macOS with modern cloud identity providers such as Microsoft Entra ID or Okta. A primary benefit documented in Apple Learning is the ability for local account credentials to remain synchronized with IdP credentials. This means when a user changes their password at the IdP, the same update flows automatically to their macOS account, preventing mismatched credentials. This eliminates the long-standing issue of password drift seen in older directory-bound workflows. Kerberos SSO is a legacy technology, and federated Managed Apple Accounts are tied to Apple Business Manager, not directly to Platform SSO. IdP passkey integration with iCloud Keychain is a separate security enhancement, not part of Platform SSO. The essential benefit is seamless credential synchronization across local accounts and IdPs.

NEW QUESTION # 67

A user forgot their password for their organization-owned Mac. Their Mac has FileVault turned on, and the key is escrowed to the MDM solution. What can the user use in macOS Recovery to reset their password?

- A. Secure token
- **B. Personal recovery key**
- C. Institutional recovery key
- D. Bootstrap token

Answer: B

Explanation:

When FileVault is enabled, the encryption of the disk is tied to either user credentials or recovery keys. Apple documentation explains that the Personal Recovery Key (PRK) is unique to each device and can be escrowed to the MDM solution. If a user forgets their password, the IT admin retrieves the PRK from the MDM and provides it to the user. In macOS Recovery, the PRK can then be used to unlock the disk and reset the account password. Institutional recovery keys exist for organizations but require certificate infrastructure and are less common in MDM workflows.

References: Apple Platform Security - "FileVault recovery keys"; Apple Platform Deployment - "Escrow recovery keys with MDM."

NEW QUESTION # 68

Which Apple device capability allows MDM to secure devices?

- A. Enrollment profiles
- **B. Built-in device security features**
- C. Location Services

Answer: B

Explanation:

Apple devices come with built-in security features, such as data encryption, Secure Enclave, and passcode enforcement, which MDM solutions leverage to secure devices. These features allow MDM to enforce policies like requiring a passcode, enabling encryption, or remotely wiping a device if lost. Location Services (option A) provides geolocation data but is not a core security capability used by MDM for securing devices. Enrollment profiles (option B) are the mechanism to connect a device to MDM, not a capability that secures the device itself. The Apple Platform Security Guide highlights how MDM utilizes these built-in features to enhance device security, making option C the correct choice.

NEW QUESTION # 69

.....

It is because of our high quality Apple DEP-2025 preparation software, PDF files and other relevant products, we have gathered thousands of customers who have successfully passed the Apple DEP-2025 in one go. You can also attain the same success rate by using our high standard DEP-2025 Preparation products. Thousands of satisfied customers can't be wrong. You must try our products to believe this fact.
