PSE-Cortex Valid Practice Questions, PSE-Cortex Certification Materials

For some difficult points of the PSE-Cortex exam questions which you may feel hard to understand or easy to confuse for too similar with the others. In order to help you memorize the PSE-Cortex guide materials better, we have detailed explanations of the difficult questions such as illustration, charts and referring website. Every year some knowledge of the PSE-Cortex Practice Braindumps is reoccurring over and over. You must ensure that you master them completely.

Palo Alto Networks System Engineer - Cortex Professional Sample Questions (Q16-Q21):

NEW QUESTION # 16

Why is it important to document notes from the Proof of Value (POV) for post-sales hand off?

- A. To generate additional training material for the POV's production implementation
- **B. To ensure the implementation teams understand the customer use cases and priorities**
- C. To certify that the POV was completed and meets all customer requirements
- D. To allow implementation teams to bypass scoping exercises and shorten delivery time

Answer: B

Explanation:

Documenting notes from the Proof of Value (POV) is crucial for the post-sales handoff because it helps ensure that implementation teams understand the customer use cases and priorities. This documentation provides context for the customer's specific needs,

enabling a smoother and more tailored implementation process.

NEW QUESTION # 17

In an Air-Gapped environment where the Docker package was manually installed after the Cortex XSOAR installation which action allows Cortex XSOAR to access Docker?

- A. create a "Cortex XSOAR" or "demisto" group and add the "docker" user to this group
- B. enable the docker service
- C. disable the Cortex XSOAR service
- D. create a "docker" group and add the "Cortex XSOAR" or "demisto" user to this group

Answer: A

NEW QUESTION # 18

Which playbook functionality allows grouping of tasks to create functional building blocks?

- A. conditional tasks
- B. sub-playbooks
- C. playbook features
- D. manual tasks

Answer: C

Explanation:

Reference: <https://xsoar.pan.dev/docs/playbooks/playbooks-create-playbook-task>

NEW QUESTION # 19

What are the key capabilities of the ASM for Remote Workers module?

- A. Monitoring endpoint activity, managing firewall rules, and mitigating cybersecurity threats
- B. Gathering endpoint data, conducting internal scans, and automating network configurations
- C. Identifying office network vulnerabilities, monitoring remote workforce, and encrypting data
- D. Analyzing global scan data, identifying risky issues on remote networks, and providing internal insights

Answer: D

Explanation:

The ASM for Remote Workers module in Cortex Xpanse focuses on analyzing global scan data, identifying risky issues on remote networks, and providing internal insights. This helps organizations maintain visibility and control over the security of their remote workforce, ensuring that potential risks and vulnerabilities in remote network configurations are addressed proactively.

NEW QUESTION # 20

What are two reasons incident investigation is needed in Cortex XDR? (Choose two.)

- A. Insider Threats may not be blocked and initial activity may go undetected.
- B. Detailed reports are needed for senior management to justify the cost of XDR.
- C. Analysts need to acquire forensic artifacts of malware that has been blocked by the XDR agent.
- D. No solution will stop every attack requiring further investigation of activity.

Answer: A,C
