Whether you want to study PECB ISO-45001-Lead-Auditor Exam or pass other PECB Certified ISO 45001 Lead Auditor Exam exam, if you want to prepare for PECB ISO-45001-Lead-Auditor exam, you can choose PECB ISO-45001-Lead-Auditor Valid Exam Questions exam.

### PECB Certified ISO 45001 Lead Auditor Exam Sample Questions (Q44-Q49):

#### NEW QUESTION # 44

A well-known fast-food organisation (ISO 45001 certified) contracts young people to deliver orders; last week one of them died in a street accident riding for the first time a new motorbike provided by the organisation. You will lead the recertification audit in two weeks, and you plan to prepare a checklist to investigate this incident. The following are potential questions you might ask; match them to the related ISO 45001 clause/subclause.

| Question related to the worker who had the accident                | ISO 45001 clause/subclause |
|--|----------------------------|
| Was he made aware of the hazards related to this work?             |                            |
| Was he trained to use the new motorbike?                           |                            |
| Was he asked to deliver too many orders in a short period of time? |                            |
| Was he carrying any contact details in case of an accident?        |                            |

### NEW QUESTION # 45

You are auditing a site of Good Food Shack, a restaurant chain. In the kitchen area, you notice a half-filled open drum sitting in a pool of liquid, which is dribbling across a work area. You ask the head Chef what is in the drum and are told it is waste from the frying process. When you ask why it is kept there, You are told that it is not normally kept there, but it is not a problem and says that he will arrange it to be moved to a storeroom and will give the floor a good clean.

Look around the kitchen, you observe knives and cleavers lying around on worktops, staff wearing no protective gloves and a large pot of boiling water with nobody near it. There is no evidence of any fire extinguishers or fire blankets within sight.

You decide to raise a nonconformance. Select one of the options that best describes the finding against clause 8.1.2 of ISO 45001.

- A. Training of the kitchen staff was not effective enough to prevent poor safety awareness in the kitchen area.
- **B. Failure to reduce risks associated with working in the kitchen.**
- C. Staff are at risk of serious injury while working in the kitchen.
- D. Measures to prevent slippage in the kitchen from waste cooking oil were not taken.

#### Answer: B

##### Explanation:

Comprehensive Detailed Explanation along with All ISO 45001 Audit Reference Clause 8.1.2 of ISO 45001 pertains to Eliminating Hazards and Reducing OH&S Risks. Organizations must implement appropriate controls to manage workplace hazards effectively.

##### Issue Identified:

The kitchen environment at the audited site presents multiple hazards, including:

Oil spillage creating a slip hazard.

Open drums of waste material posing a chemical or hygiene hazard.

Unsecured knives and cleavers increasing the risk of cuts.

Boiling water left unattended, posing a risk of burns.

Lack of visible fire extinguishers or fire blankets, increasing fire risk.

##### Analysis of Options:

A . Failure to reduce risks associated with working in the kitchen.

This option accurately captures the broader failure to implement effective measures to eliminate or reduce hazards across multiple areas in the kitchen.

B . Measures to prevent slippage in the kitchen from waste cooking oil were not taken.

This is specific to one hazard (oil spillage) and does not address other significant risks observed, such as fire safety or sharp tools.

C . Staff are at risk of serious injury while working in the kitchen.

While true, this is more of a general observation and does not address the root cause of the hazards or the failure of controls.

D . Training of the kitchen staff was not effective enough to prevent poor safety awareness in the kitchen area.

Although training deficiencies may contribute to the issue, this option does not reflect the overarching systemic failure to manage hazards effectively.

##### Best Description of the Nonconformance:

Failure to reduce risks associated with working in the kitchen (Option A) is the most comprehensive finding, reflecting the organization's lack of adequate controls to mitigate hazards.

##### ISO Reference:

Clause 8.1.2: Organizations must establish controls to eliminate or minimize OH&S risks systematically.

Clause 7.2: Ensuring competency through training is important but must be coupled with hazard control measures.

#### NEW QUESTION # 46

Select the two options which represent an advantage of using a sampling plan for the audit.

- A. May require an increased audit duration
- B. May miss key issues
- C. **Implements the audit plan efficiently**
- D. Use of the plan for consecutive audits without review
- E. **Gives confidence in the audit results**
- F. Overrules the auditor's instincts

**Answer: C,E**

#### NEW QUESTION # 47

Select three options that would provide evidence of conformance with clause 9.1.1 of ISO 45001.

- A. Competency of centre staff
- B. **Periodic analysis of the results of improvement actions.**
- C. **A procedure on how to determine trends when analysing OHS data.**
- D. Signage that alerts visitors to hazards in the centre.
- E. Reports showing that elevators have passed the annual inspection.
- F. **Reports of accidents to staff members.**
- G. An increase in the visitors using the website.
- H. An OH&S objective to reduce the number of reported incidents.

**Answer: B,C,F**

#### NEW QUESTION # 48

Worker participation is a key factor for the success of OHSMS. Which three of the following ISO 45001 activities require workers' participation?

- A. **Establishing OHS policy**
- B. Determining competence requirements
- C. **Determining actions to eliminate hazards**
- D. Managing internal audit programme
- E. **Establishing OHS objectives**
- F. Determining what needs to be communicated

**Answer: A,C,E**

Explanation:

Worker participation is a fundamental principle of ISO 45001 (Clause 5.4). It ensures workers at all levels are involved in key activities to enhance the OH&S management system's effectiveness.

Analysis of Options:

A . Determining competence requirements:

Incorrect. Determining competence is primarily the responsibility of management, though workers may provide input.

B . Establishing OHS objectives:

Correct. Worker involvement ensures objectives are realistic and relevant to workplace conditions (Clause 6.2).

C . Managing internal audit programme:

Incorrect. Managing audits is typically a managerial responsibility, though workers may participate in audits.

D . Determining actions to eliminate hazards:

Correct. Workers' insights are critical in identifying and implementing actions to eliminate hazards (Clause 8.1.2).

E . Determining what needs to be communicated:

Incorrect. While communication strategies impact workers, their participation in determining communication needs is not explicitly required.

F . Establishing OHS policy:

Correct. Workers should be involved in developing policies to ensure relevance and buy-in (Clause 5.2).

ISO Reference:

Clause 5.4: Worker participation.

Clause 6.2: OHS objectives.

#### Clause 8.1.2: Hierarchy of controls and hazard elimination.

## NEW QUESTION # 49

Our team of professionals and experts has prepared ISO-45001-Lead-Auditor vce dumps by keeping the vigilant eyes on the current exam information and exam requirements.
