AHU/ FCU TEST REPORT (Báo cáo thử nghiệm AHU/FCU)

Manufacture /Nhà sản xuất:	DECKER VIETNAM
Unit Model number / Model thiết bị:	DA-5-108H41-H0-E8
Serial number / Số sê ri:	HD352-2503311-68
Motor size (kW) / Công suất mô tơ	5.5
Motor Speed (RPM) / Vận tốc mô tơ (vòng/phút)	2900
Motor Power (V/Ph/Hz) / Nguồn điện dùng cho mô tơ	380/3/50
VSD setpoint (Hz) / Cài đặt tần số biến tần	50
Motor ampere L1/L2/L3 (A) / dòng điện mô tơ	8.9/8.9/8.9
Công suất điện trở cấp 1 (KW) / L1/L2/L3 (A)	/
Công suất điện trở cấp 2 (KW) / L1/L2/L3 (A)	/
Công suất điện trở cấp 3 (KW) / L1/L2/L3 (A)	/
Unit external static pressure (Pa)	500
Kỹ thuật viên kiểm tra	Phan Anh Quốc

P.S. Free 2026 SAP C_BCBAI_2502 dumps are available on Google Drive shared by PracticeMaterial:
https://drive.google.com/open?id=1ejd36jp9DmSo_KP0iEQD3vAzy8_VGt3z

Our C_BCBAI_2502 study questions in every year are summarized based on the test purpose, every answer is a template, there are subjective and objective C_BCBAI_2502 exams of two parts, we have in the corresponding modules for different topic of deliberate practice. To this end, our C_BCBAI_2502 training materials in the qualification exam summarize some problem- solving skills, and induce some generic templates. The user can scout for answer and scout for score based on the answer templates we provide, so the universal template can save a lot of precious time for the user to study and pass the C_BCBAI_2502 Exam.

SAP C_BCBAI_2502 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Understanding SAP AI Value Proposition: Explains the core benefits and strategic impact of SAP's AI technologies on business efficiency and innovation.
Topic 2	<ul style="list-style-type: none"> Business AI Solutions Positioning: Covers how to effectively position SAP's Business AI offerings within the SAP Business Suite to support intelligent enterprise goals.

Topic 3	<ul style="list-style-type: none"> • Integration with SAP Ecosystem: Highlights how SAP AI integrates with solutions like SAP S • 4HANA, SAP Customer Experience, and SAP BTP for end-to-end process optimization.

2026 Test C_BCBAI_2502 Score Report Free PDF | Latest C_BCBAI_2502 New Exam Camp: SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite

A few crops of practice materials are emerging in the market these days, with undecided quality to judge from customers' perspective. If you choose the wrong C_BCBAI_2502 practice material, it will be a grave mistake. Their behavior has not been strictly ethical and irresponsible to you, which we will never do. We know making progress and getting the certificate of C_BCBAI_2502 Training Materials will be a matter of course with the most professional experts in command of the newest and the most accurate knowledge in it. That's why our SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite exam prep has taken up a large part of market.

SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q10-Q15):

NEW QUESTION # 10

What are the key Business AI patterns? Note: There are 3 correct answers to this question.

- A. Enterprise Automation
- B. Custom Generative AI Extensions
- C. AI Lifecycle Management
- D. Digital Assistants with SAP
- E. Insight Apps, Data for AI

Answer: A,D,E

Explanation:

SAP Business AI is structured around key patterns that define how AI is applied across business processes.

The correct answers are Digital Assistants with SAP, Enterprise Automation, and Insight Apps, Data for AI, as these are explicitly documented as core Business AI patterns in SAP's framework.

SAP documentation states: "SAP Business AI is built around key patterns that enable organizations to leverage AI effectively: Digital Assistants with SAP, Enterprise Automation, and Insight Apps, Data for AI." Digital Assistants with SAP, exemplified by Joule, provide "natural language interfaces to interact with business processes," enhancing user productivity. Enterprise Automation involves "using AI-driven automation, such as SAP Intelligent RPA, to streamline repetitive tasks and optimize workflows" across functions like finance and supply chain. Insight Apps, Data for AI refers to "delivering predictive analytics and data-driven insights" through applications like SAP S/4HANA, which support decision-making with real-time data.

The incorrect options-AI Lifecycle Management and Custom Generative AI Extensions-are not listed as primary Business AI patterns. AI Lifecycle Management is a technical process for managing AI models, not a business pattern. Custom Generative AI Extensions, while emerging, are not a core pattern in SAP's current Business AI framework, which focuses on established use cases. SAP's emphasis on these patterns, as seen in its AI strategy, confirms the selected answers.

NEW QUESTION # 11

What are the key use cases of SAP AI in manufacturing? Note: There are 3 correct answers to this question.

- A. AI-driven predictive maintenance
- B. Manual equipment failure analysis
- C. Handwritten production reports
- D. AI-powered production scheduling
- E. Automated quality control

Answer: A,D,E

Explanation:

SAP AI provides transformative use cases in manufacturing, leveraging AI to optimize processes and improve efficiency. The correct answers are AI-driven predictive maintenance, automated quality control, and AI-powered production scheduling, as these are explicitly documented as key use cases in SAP's manufacturing solutions.

SAP documentation highlights: "SAP AI in manufacturing supports predictive maintenance, quality control, and production scheduling to enhance operational efficiency and reduce costs." AI-driven predictive maintenance, supported by SAP Digital Manufacturing Cloud, uses "machine learning to predict equipment failures and schedule maintenance proactively," minimizing downtime. Automated quality control leverages AI to "analyze production data in real-time" and "detect defects automatically," ensuring product quality, as seen in SAP S/4HANA Manufacturing. AI-powered production scheduling optimizes "resource allocation and production timelines" by analyzing demand and capacity, supported by solutions like SAP Integrated Business Planning.

The incorrect options—manual equipment failure analysis and handwritten production reports—are not AI-driven. Manual equipment failure analysis contradicts SAP's automation focus, and handwritten production reports are outdated practices replaced by digital solutions. SAP's manufacturing case studies, such as those involving SAP Digital Manufacturing Cloud, confirm the relevance of the selected use cases.

NEW QUESTION # 12

Match the outcomes in the dropdown lists to the capabilities of Joule

□

Answer:

Explanation:

□

NEW QUESTION # 13

What is the role of SAP AI Core in Business AI solutions? Please choose the correct answer.

- A. It replaces all manual business processes
- **B. It provides an infrastructure for developing and running AI models**
- C. It is used for HR management exclusively
- D. It is a hardware-based AI computing solution

Answer: B

Explanation:

SAP AI Core serves as a foundational platform for developing and deploying AI models within SAP Business AI solutions. The correct answer is "It provides an infrastructure for developing and running AI models," as this is its primary role according to SAP documentation.

SAP documentation explains: "SAP AI Core is a cloud-based platform that provides the infrastructure for developing, training, and running AI models at scale. It supports machine learning, natural language processing, and other AI capabilities, enabling organizations to integrate AI into their business processes." SAP AI Core facilitates "custom AI model development" and "seamless integration with SAP applications," such as SAP S/4HANA and SAP Customer Experience, to power solutions like predictive analytics and fraud detection. For example, it supports "training models for demand forecasting" in supply chain operations, ensuring scalability and performance.

The incorrect options are not accurate. Replacing all manual business processes is an overstatement, as SAP AI Core focuses on AI model infrastructure, not process replacement. It is not used exclusively for HR management, as it supports multiple domains. It is not a hardware-based solution, as it operates in the cloud.

SAP AI Core's role as an AI infrastructure platform, as seen in SAP's AI framework, confirms its purpose.

NEW QUESTION # 14

A logistics company is looking to reduce delivery delays and improve inventory management. Which SAP AI-powered solutions should they implement?

There are 3 correct answers to this question.

Response:

- **A. SAP Digital Manufacturing Cloud**
- **B. SAP Cloud ERP**
- **C. SAP Predictive Analytics**

- Answer: A,C,E**
