Wenn Sie noch zögern, ob Sie ITZert wählen, können Sie kostenlos einen Teil der Snowflake SOL-C01 Fragen und Antworten in ITZert Website herunterladen, um unsere Zuverlässigkeit zu testen. Wenn Sie alle unsere Prüfungsfragen und Antworten herunterladen, geben wir Ihnen eine 100%-Pass-Garantie, dass Sie die Snowflake SOL-C01 Zertifizierungsprüfung einmalig mit einer hohen Note bestehen können.

Snowflake SOL-C01 Prüfungsplan:

Thema	Einzelheiten
Thema 1	<ul style="list-style-type: none">• Identity and Data Access Management: This domain focuses on Role-Based Access Control (RBAC) including role hierarchies and privileges, along with basic database administration tasks like creating objects, transferring ownership, and executing fundamental SQL commands.
Thema 2	<ul style="list-style-type: none">• Data Loading and Virtual Warehouses: This domain covers loading structured, semi-structured, and unstructured data using stages and various methods, virtual warehouse configurations and scaling strategies, and Snowflake Cortex LLM functions for AI-powered operations.
Thema 3	<ul style="list-style-type: none">• Interacting with Snowflake and the Architecture: This domain covers Snowflake's elastic architecture, key user interfaces like Snowsight and Notebooks, and the object hierarchy including databases, schemas, tables, and views with practical navigation and code execution skills.
Thema 4	<ul style="list-style-type: none">• Data Protection and Data Sharing: This domain addresses continuous data protection through Time Travel and cloning, plus data collaboration capabilities via Snowflake Marketplace and private Data Exchange sharing.

Hohe Qualität von SOL-C01 Prüfung und Antworten

ITZert bietet verschiedene Schulungsunterlagen und Ressourcen zur Vorbereitung der Snowflake SOL-C01 Prüfung. Es umfasst Kurse, Praxis-Test, Online Test Engine und einen Teil kostenloser PDF-Download.

Snowflake Certified SnowPro Associate - Platform Certification SOL-C01 Prüfungsfragen mit Lösungen (Q116-Q121):

116. Frage

How is the initial activation of the Snowflake Data Exchange feature, which is necessary for establishing private exchanges, typically accomplished?

- A. Activation of the Data Exchange feature generally requires a request to Snowflake Support, who then enable it for the specific account.
- B. Any Snowflake account administrator can enable Data Exchange through the web interface with a single click.
- C. Data Exchange is automatically enabled for all Snowflake accounts upon creation.
- D. Activation of the Data Exchange feature requires a specific SQL command to be executed by the ACCOUNTADMIN role.

Antwort: A

Begründung:

The Data Exchange feature is not automatically enabled for all Snowflake accounts. Instead, enabling this capability-particularly for private exchanges-typically requires submitting a request to Snowflake Support.

Snowflake evaluates account type, region, and compliance requirements before enabling the Data Exchange functionality. Snowflake administrators cannot independently enable this through Snowsight, nor is there a SQL command available to turn it on. Once activated, account administrators can create private exchanges, manage listings, and define which Snowflake accounts can participate. This activation step ensures secure, intentional use of data-sharing capabilities at an account level.

117. Frage

What are the key benefits of using Snowflake? (Select TWO).

- A. Independent scaling of compute and storage
- B. Manual infrastructure management
- C. Vendor lock-in
- D. On-premises deployment
- E. Near-unlimited concurrency

Antwort: A,E

Begründung:

Snowflake's multi-cluster shared data architecture enables independent scaling of compute and storage, meaning workloads can be sized differently without affecting stored data.

It also provides near-unlimited concurrency, because Snowflake can automatically add compute clusters during peak loads.

Snowflake does not require manual infrastructure management and runs fully in the cloud-not on-premises.

Multi-cloud support reduces vendor lock-in, not increases it.

118. Frage

You have a table 'CUSTOMER REVIEWS' with a column 'REVIEW TEXT' containing unstructured customer feedback. You want to use CLASSIFY TEXT to categorize these reviews into predefined categories like 'Product Quality', 'Customer Service', and 'Shipping'. You plan to create a materialized view to store the classifications for faster querying. Which of the following SQL statements is the most efficient and correct way to achieve this using CLASSIFY TEXT, assuming the function has already been granted usage privileges?

- A. CREATE MATERIALIZED VIEW CLASSIFIED_REVIEWS AS SELECT REVIEW_TEXT, ['Product Quality',

- 'Customer Service', 'Shipping')) AS CATEGORY FROM CUSTOMER REVIEWS;
- B. CREATE MATERIALIZED VIEW CLASSIFIED_REVIEWS AS SELECT REVIEW_TEXT, OBJECT CONSTRUCT('categories', ARRAY CONSTRUCT('Product Quality', 'Customer Service', 'Shipping')) AS CATEGORY FROM CUSTOMER REVIEWS;
- C. CREATE MATERIALIZED VIEW CLASSIFIED_REVIEWS AS SELECT REVIEW_TEXT, Quality, 'Customer Service', 'Shipping')) AS CATEGORY FROM CUSTOMER REVIEWS;
- D. CREATE MATERIALIZED VIEW CLASSIFIED_REVIEWS AS SELECT REVIEW_TEXT, 'Product Quality', 'Customer Service', 'Shipping') AS CATEGORY FROM CUSTOMER REVIEWS;
- E. CREATE MATERIALIZED VIEW CLASSIFIED_REVIEWS AS SELECT REVIEW_TEXT, Quality, 'Customer Service', 'Shipping')) AS CATEGORY FROM CUSTOMER REVIEWS;

Antwort: C

Begründung:

The correct syntax for providing categories to CLASSIFY TEXT is using ARRAY CONSTRUCT.

Option B is the only one that correctly uses ARRAY_CONSTRUCT to pass the categories as an array. Options A, C, D and E all use incorrect syntax and will result in errors. Materialized views are suitable for storing the results of CLASSIFY TEXT for performance reasons.

119. Frage

Which task is performed in the Cloud Services layer in the Snowflake architecture?

- A. Managing user roles
- B. Scaling warehouses up and down
- C. Optimizing SQL queries
- D. Optimizing network traffic

Antwort: C

120. Frage

You are designing a data ingestion pipeline in Snowflake using Snowsight to load JSON data from an external stage (AWS S3). The JSON files contain nested arrays and objects, and you need to flatten the data and load specific fields into a relational table 'FLATTENED DATA' with columns, 'NAME', 'VALUE', and 'TIMESTAMP'. Given the sample JSON structure below, which of the following COPY INTO statement, combined with an appropriate file format, would BEST achieve this goal without requiring a complex transformation process after loading?

- A. Load the entire JSON file into a VARIANT column in a staging table and then use a separate query with UTERAL to transform and insert the data into the 'FLATTENED DATA' table. File Format type is CSV
- B. Use the = TRUE' file format option and 'COPY INTO' with a 'SELECT statement that uses 'LATERAL FLATTEN()' on the JSON column to extract the desired fields. Don't need a target table.
- C. Use a file format with ' TYPE = JSON' and = TRUE (if the JSON data is enclosed in an array). In the 'COPY INTO statement, use a 'SELECT clause with 'LATERAL FLATTEN(input \$1)' to extract data. For Example:

```
COPY INTO FLATTENED_DATA(ID, NAME, VALUE, TIMESTAMP) FROM (SELECT $1:id::NUMBER, f.value:name::STRING, f.value:value::NUMBER, $1:timestamp::TIMESTAMP FROM @my_stage, LATERAL FLATTEN(input => $1:data) f);
```

- D. Create an external table pointing to the JSON files and then use a 'CREATE TABLE AS SELECT (CTAS) statement with 'LATERAL FLATTEN()' to transform and load the data into the FLATTENED DATA table.
- E. Load the JSON files directly into the FLATTENED_DATX table without flattening and rely on Snowflake's automatic type inference to handle the nested structures.

Antwort: C

121. Frage

.....

ITZert bietet eine klare und ausgezeichnete Lösung für jeden Snowflake SOL-C01 Prüfungskandidaten. Wir versorgen Sie mit den ausführlichen Snowflake SOL-C01 Prüfungsfragen und Antworten. Unser Team von IT-Experten ist das erfahrenste und qualifizierteste. Unsere Testfragen und Antworten sind fast gleich wie die echte Prüfung. Das ist wirklich großartig. Am wichtigsten ist, dass die Erfolgsquote von ITZert die höchste in der Welt ist.
