

Braindump PEGACPRSA22V1 Free - PEGACPRSA22V1 Brain Exam

P.S. Free 2026 Pegasystems PEGACPRSA22V1 dumps are available on Google Drive shared by ExamPrepAway:
<https://drive.google.com/open?id=1eYV5XBwt6PMisI2IU3hvxahhXjeR5OIQ>

The Pegasystems job market has become so competitive and challenging. To stay competitive in the market as an experienced Pegasystems professional you have to upgrade your skills and knowledge with the Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) certification exam. With the Pegasystems PEGACPRSA22V1 exam dumps you can easily prove your skills and upgrade your knowledge. To do this you just need to enroll in the Certified Pega Robotics System Architect 22 (PEGACPRSA22V1) certification exam and put all your efforts to pass this challenging PEGACPRSA22V1 exam with good scores. However, you should keep in mind that to get success in the PEGACPRSA22V1 certification exam is not a simple and easy task.

Pegasystems PEGACPRSA22V1 exam is a valuable certification for professionals who work with Pega Robotics. It validates a professional's knowledge and skills in designing and developing robotic automations, troubleshooting, and integration with other Pega products. With adequate preparation and experience, passing PEGACPRSA22V1 Exam can help professionals advance their careers and stand out in a competitive job market.

PEGACPRSA22V1 Brain Exam & PEGACPRSA22V1 Test Dumps

We are glad to receive all your questions on our PEGACPRSA22V1 learning guide. If you have any questions about our PEGACPRSA22V1 study questions, you have the right to answer us in anytime. Our online workers will solve your problem immediately after receiving your questions. Because we hope that you can enjoy the best after-sales service. We believe that our PEGACPRSA22V1 Preparation exam will meet your all needs. Please give us a chance to service you; you will be satisfied with our PEGACPRSA22V1 study materials.

Pegasystems Certified Pega Robotics System Architect 22 Sample Questions (Q56-Q61):

NEW QUESTION # 56

Which two of the following Tool Windows are used in Pega Robot Studio? (Choose two.)

- A. Menu toolbar
- B. Solution Explorer
- C. Designer windows
- D. Object Explorer

Answer: A,C

NEW QUESTION # 57

To modify an object's default properties before use in a project, which setting must be updated?

- A. Type Name
- B. Type Prefixes
- C. Prefix Types
- **D. Naming Rules**

Answer: D

NEW QUESTION # 58

An automation requires the web adapter to attach to a running instance of Internet Explorer. How do you achieve this requirement?

- A. Configure the Universal Web adapter and set the StartMethod property to MonitorAll.
- B. Configure the web adapter and set the StartMehod property to Attach.
- **C. Configure the web adapter and set the StartMethod property to MonitorAll.**
- D. The web adapter cannot connect to a running instance.

Answer: C

NEW QUESTION # 59

Deploying a robotic project to Pega Robot Manager requires configuring the Pega server and credentials.

The server connectivity settings can be set up or adjusted in several ways.

Which three of the following options are methods to set up or adjust the Pega Server settings? (Choose Three)

- A. Manually edit the PegaStudioConfig.xml file from the Tools menu in Pega Robot Studio.
- **B. Edit the Change Server fields during the deployment process.**
- **C. Configure the server settings during the initial installation of Pega Robot Studio.**
- **D. Edit the Server Connectivity settings in the Tools menu in Pega Robot Studio.**
- E. Rerun the Pega Robot Studio installation and configure the server settings.

Answer: B,C,D

Explanation:

Comprehensive and Detailed Explanation From Pega Robotics System Exact Extract:

Pega Robot Studio provides multiple ways to configure or modify Pega Server connectivity settings used for Robot Manager deployment. These settings define the server URL, operator credentials, and authentication method.

According to the Pega Robotics System Design and Implementation Guide, section "Configuring Pega Server Connectivity":

"Server connectivity settings can be specified in multiple ways within Pega Robot Studio:

* During the initial installation process, when prompted to enter Robot Manager URL and credentials.

* By navigating to the Tools # Options # Server Connectivity menu to edit or test server details.

* By adjusting the Change Server fields that appear during the deployment process to override existing configurations. Manual editing of XML files is not recommended for changing server connectivity settings." Detailed Reasoning:

* A. Edit the Change Server fields during the deployment process - Correct. The deployment wizard allows adjusting or overriding existing server settings.

* B. Configure the server settings during the initial installation of Pega Robot Studio - Correct. The installation wizard prompts for server setup.

* C. Rerun the Pega Robot Studio installation and configure the server settings - Not necessary unless reinstallation is required.

* D. Manually edit the PegaStudioConfig.xml file - Not recommended or supported for changing connectivity.

* E. Edit the Server Connectivity settings in the Tools menu in Pega Robot Studio - Correct. This is the standard interface to modify or test connection settings.

NEW QUESTION # 60

In Pega Robol Studio. Windows application menu items ate generally not directly interrogated. What is the process of interrogating menu items in a Windows application? In the Interrogation Steps list, move the options to the Ordered Interrogation Steps column and place them in the correct order.

In the Add Menu Items dialog box, select the menu items.
Select the control in the control hierarchy list.
Interrogate the Windows form.
Click OK to save the selection.
Start the interrogation for the Windows application.
In the More menu, select Add menu items .
Navigate to the window that contains the menu.

examprepaway.com

Answer:

Explanation:

Interrogation Steps

In the Add Menu Items dialog box, select the menu items.
Select the control in the control hierarchy list.
Interrogate the Windows form.
Click OK to save the selection.
Start the interrogation for the Windows application.
In the More menu, select Add menu items .
Navigate to the window that contains the menu.

Ordered Interrogation Steps

Start the interrogation for the Windows application.
Interrogate the Windows form.
Navigate to the window that contains the menu.
Select the control in the control hierarchy list.
In the More menu, select Add menu items .
In the Add Menu Items dialog box, select the menu items.
Click OK to save the selection.

Explanation:

(Correct Order):

- * Start the interrogation for the Windows application.
- * Interrogate the Windows form.
- * Navigate to the window that contains the menu.
- * Select the control in the control hierarchy list.
- * In the More menu, select Add menu items.
- * In the Add Menu Items dialog box, select the menu items.
- * Click OK to save the selection

Unlike web or text-based controls, Windows application menus (such as File, Edit, or Help) are often rendered as non-standard Windows controls that cannot be directly interrogated using the bullseye tool.

Instead, Pega Robot Studio provides a specific method to add menu items through the interrogation hierarchy.

According to the Pega Robotics System Design and Implementation Guide, section "Interrogating Menu Items in Windows Applications":

"Menu items in Windows applications are not directly interrogated through visual selection.

Instead, the process involves interrogating the parent form, identifying the menu control in the hierarchy, and then using the 'Add Menu Items' option to expose individual menu commands as controls.

Steps:

- * Start interrogation for the Windows adapter.
- * Interrogate the main form that contains the menu bar.
- * Navigate to the window containing the menu to ensure visibility.
- * In the control hierarchy, select the menu bar control.
- * From the More menu, choose Add menu items.
- * In the Add Menu Items dialog box, select the menu items to expose as interrogated controls.
- * Click OK to confirm and save your selections."

Detailed Step Reasoning:

- * Start the interrogation for the Windows application.
- * Launches the adapter and begins the interrogation session.
- * Interrogate the Windows form.
- * Interrogates the main form containing the menu bar control (the top-level parent for menus).
- * Navigate to the window that contains the menu.
- * Ensures the correct active window is in focus for interrogation.
- * Select the control in the control hierarchy list.
- * Identifies the menu bar or parent control within the form's hierarchy.

- * In the More menu, select Add menu items.
- * Opens the configuration dialog for menu interrogation.
- * In the Add Menu Items dialog box, select the menu items.
- * Displays a list of all available menu items to expose as automatable elements.
- * Click OK to save the selection.
- * Finalizes interrogation and creates the selected menu items as controls in the project hierarchy.

Final Ordered Steps:

Order

Interrogation Step

1

Start the interrogation for the Windows application.

2

Interrogate the Windows form.

3

Navigate to the window that contains the menu.

4

Select the control in the control hierarchy list.

5

In the More menu, select Add menu items.

6

In the Add Menu Items dialog box, select the menu items.

7

Click OK to save the selection.

Reference: Extracted and verified from Pega Robotics System Design and Implementation Guide, Interrogating Menu Items in Windows Applications section (Pega Robotics 19.1 and later).

NEW QUESTION # 61

.....

After you purchase our PEGACPRSA22V1 study materials, we will provide one-year free update for you. Within one year, we will send the latest version to your mailbox with no charge if we have a new version of PEGACPRSA22V1 learning materials. We will also provide some discount for your updating after a year if you are satisfied with our PEGACPRSA22V1 Exam Questions. And if you find that your version of the PEGACPRSA22V1 practice guide is over one year, you can enjoy 50% discount if you buy it again.
