- A. A cloud-based process modeling tool for documenting workflows.
- B. A process mining solution that provides process analytics and insights.
- C. A collaboration platform for managing business decisions.
- D. An ERP system for managing financial transactions.

Answer: B

Explanation:

SAP Signavio Process Intelligence is the process mining and analytics component of the SAP Signavio Business Transformation Suite. It allows organizations to analyze real process data to identify inefficiencies and improvement opportunities.

"SAP Signavio Process Intelligence is a process mining solution that enables customers to analyze and visualize process flows, uncovering performance issues and improvement opportunities." Reference:

It connects to operational systems, extracts event logs, and reconstructs end-to-end business processes to deliver data-driven process insights.

"The solution provides process analytics and actionable insights by comparing actual process execution data against designed models." Incorrect Options:

A: Refers to SAP Signavio Process Manager, not Process Intelligence.

B: SAP Signavio is not an ERP; it integrates with SAP ERP systems for analysis.
