

# Fortinet FCP\_FMG\_AD-7.6 Dump Check | FCP\_FMG\_AD-7.6 High Passing Score

What's more, part of that RealExamFree FCP\_FMG\_AD-7.6 dumps now are free: <https://drive.google.com/open?id=1AehpgtUpclf8jpy9iGiGAP1FzbC66RrH>

The web-based FCP\_FMG\_AD-7.6 practice exam is similar to the desktop-based software. You can take the web-based FCP\_FMG\_AD-7.6 practice exam on any browser without needing to install separate software. In addition, all operating systems also support this web-based Fortinet FCP\_FMG\_AD-7.6 Practice Exam. Both FCP - FortiManager 7.6 Administrator practice exams track your performance and help to overcome mistakes. Furthermore, you can customize your FCP - FortiManager 7.6 Administrator practice exams according to your needs.

With the advent of the era of big data, data information bringing convenience to our life at the same time, the problem of personal information leakage has become increasingly prominent. For preventing information leakage, our FCP\_FMG\_AD-7.6 test torrent will provide the data protection for all customers. It is not necessary for you to be anxious about your information gained by the third party. At the same time, the versions of our FCP - FortiManager 7.6 Administrator exam tool also have the ability to help you ward off network intrusion and attacks and protect users' network security. If you choose our FCP\_FMG\_AD-7.6 Study Materials, we can promise that we must enhance the safety guarantee and keep your information from revealing.

## New FCP\_FMG\_AD-7.6 Dump Check | Pass-Sure FCP\_FMG\_AD-7.6: FCP - FortiManager 7.6 Administrator 100% Pass

First of all we have fast delivery after your payment in 5-10 minutes, and we will transfer FCP\_FMG\_AD-7.6 guide torrent to you online, which mean that you are able to study as soon as possible to avoid a waste of time. Besides if you have any trouble coping with some technical and operational problems while using our FCP\_FMG\_AD-7.6 exam torrent, please contact us immediately and our 24 hours online services will spare no effort to help you solve the problem in no time. As a result what we can do is to create the most comfortable and reliable customer services of our FCP\_FMG\_AD-7.6 Guide Torrent to make sure you can be well-prepared

for the coming exams.

## Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q37-Q42):

### NEW QUESTION # 37

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors.

However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes. What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. Fortigate has a BGP template assigned on the FortiManager database.
- B. The FortiGate firmware version is different from the FortiManager ADOM version.
- C. The administrator must use the Install Wizard and select Install device settings only to push BGP settings
- D. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.

**Answer: A**

Explanation:

If a BGP template is assigned to the FortiGate device on FortiManager, device-level BGP configurations made directly in the device-level database are overridden by the template settings, so the changes do not get pushed to the device.

### NEW QUESTION # 38

An administrator wants to configure and manage multiple objects in the FortiManager database and give access to other users who work in the same database.

To stay in control of the changes made to firewall policies by other team members, the administrator needs a setup where all modifications go through a central check before they can be installed.

How can the administrator create this setup?

- A. Enable the prompt asking the administrator to accept firewall policies changes before saving.
- B. Enable the workspace (for all ADOMs) to control all changes made by any administrator.
- C. Enable device lock and the advanced mode feature in the ADOM.
- D. Enable workflow mode and the ADOM lock feature.

**Answer: D**

Explanation:

Enabling workflow mode along with the ADOM lock feature ensures that all configuration changes go through a centralized review and approval process before installation, allowing controlled and coordinated management of firewall policies by multiple administrators.

### NEW QUESTION # 39

Company policy dictates that any time a change is made to a policy package on FortiManager an ADOM revision is created before the change installed, and that revision is held for a minimum of 90 days.

Over the past three months, each installed change has resulted in several unused policies and duplicate objects.

The FortiManager administrator plans to upgrade the FortiGate devices and then upgrade the FortiManager ADOM from version 7.4 to 7.6.

Which action can the administrator take to avoid slow ADOM upgrades?

- A. Export firewall policies to Excel, delete them on the ADOM. then reimport them after upgrading the ADOM.
- B. Check and repair the global configuration database before upgrading.
- C. Limit ADOM revisions before upgrading.
- D. Find unused firmware templates, then delete them before upgrading.

**Answer: C**

Explanation:

Limiting ADOM revisions reduces the number of stored historical configurations, which helps avoid performance degradation and

slow ADOM upgrades caused by a large volume of revisions.

#### NEW QUESTION # 40

Refer to the exhibits. An administrator runs the reload failure command diagnose test deploymanager reloadconf 262 on FortiManager.

Why does the administrator receive an error message?

**Diagnose output**

```
FortiManager # get system status
Platform Type           : FMG-VM64-KVM
Platform Full Name      : FortiManager-VM64-KVM
Version                 : v7.6.1-build3344 241023 (GA.M)
Serial Number           : FMG-VMTM24012945
BIOS version            : 04000002
```

**Diagnose output**

```
FortiManager # diagnose dvm device list
--- There are currently 5 devices/vdoms managed ---
--- There are currently 5 devices/vdoms count for license ---

TYPE          OID    SN              HA      IP          NAME          ADOM    IPS          FIRMWARE
fmgfaz-managed 230  FGVM02TM24013423 -    10.0.13.254 FGVM02TM24013423 root    7.0 MR6 (3401) N/A
|- STATUS: dev-db: not modified; conf: in sync; cond: OK; dm: retrieved; conn: up
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
unregistered   167  FGVM02TM24013501 -    192.168.1.3  FGVM02TM24013501 root    7.0 MR6 (3401) N/A
|- STATUS: dev-db: unknown; conf: out of sync; cond: unregistered; dm: none; conn: unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]

|- STATUS: dev-db: unknown; conf: out of sync; cond: unregistered; dm: none; conn: unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
unregistered   188  FGVM02TM24013504 -    192.168.1.111 FGVM02TM24013504 root    7.0 MR6 (3401) N/A
|- STATUS: dev-db: unknown; conf: out of sync; cond: unregistered; dm: none; conn: unknown
|- vdom:[3]root flags:0 adom:root pkg:[never-installed]
fmgfaz-model   262  -              -      -            HQ-NGFW       My_ADOM 7.0 MR6 (3401) N/A
|- STATUS: dev-db: unknown; conf: unknown; cond: unknown; dm: unknown; conn: unknown
|- vdom:[3]root flags:0 adom:My_ADOM pkg:[never-installed]

FortiManager # diagnose test deploymanager reloadconf 262
Retrieving configuration file from FGT...
Error: Configuration file import error.
```

- A. FortiManager requires the FortiGate serial number instead of the ID number.
- B. The administrator must use the FortiGate name instead of the ID number.
- C. FortiManager does not support FortiOS version 7.0.
- **D. The administrator just recently added FortiGate HQ-NGFW as a model device.**

**Answer: D**

Explanation:

The error occurs because the FortiGate HQ-NGFW device with ID 262 is a newly added model device and has not yet been fully synchronized or installed with a configuration package, which causes the reload configuration command to fail.

#### NEW QUESTION # 41

Refer to the exhibit. What can you conclude from the downloaded import report?

```

Start to import config from device(Remote-FortiGate) vdom(root) to
adom(root), package(Remote-FortiGate_root)

"firewall address",SKIPPED,"(name=all, oid=2309, DUPLICATE)"

"firewall address",FAIL,"(name=REMOTE_SUBNET, oid=2311,
reason=interface((firewall address:REMOTE_SUBNET) any<-port6) binding
fail)"

"firewall policy",FAIL,"(name=1, oid=3070, reason=interface(interface binding
contradiction. detail: (firewall address:REMOTE_SUBNET) any<-port6) binding
fail)"

```

- A. The administrator will see a new policy package named Remote-FortiGate\_root in the FortiManager ADOM database.
- B. FortiManager will change the configuration of REMOTE\_SUBNET to match the interface mapping coming in from Remote-FortiGate.
- C. FortiManager does not support per-device mapping for firewall addresses.
- D. As a result of this policy import process, FortiManager will create a new firewall address called REMOTE\_SUBNET in the ADOM database.

**Answer: A**

Explanation:

The import report shows that a new policy package named Remote-FortiGate\_root will be created in the FortiManager ADOM database, but some firewall addresses and policies failed to import due to interface binding conflicts.

## NEW QUESTION # 42

.....

RealExamFree exam study material is essential for candidates who want to appear for the FCP - FortiManager 7.6 Administrator (FCP\_FMG\_AD-7.6) certification exams and clear it to validate their skill set. This preparation material comes with Up To 1 year OF Free Updates And Free Demos. Place your order now and get real Fortinet FCP\_FMG\_AD-7.6 Exam Questions with these offers.
