## Juniper JN0-105 New Exam Materials, JN0-105 Well Prep

We are living in a good society; everything is changing so fast with the development of technology. So an ambitious person must be able to realize his dreams if he is willing to make efforts. Winners always know the harder they work the luckier they are. Our JN0-105 practice materials are prepared for the diligent people craving for success. Almost all people pursue a promising career, the reality is not everyone acts quickly and persistently. That is the reason why success belongs to few people.

### Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q99-Q104):

#### NEW QUESTION # 99

You have logged on to a Junos device and are at the operational mode prompt. Which two commands are used at this prompt? (Choose two.)

- A. run show interface terse
- B. request system shutdown
- C. set interface ge-0/0/0 unit 0 family inet
- D. show interface ge-0/0/0

**Answer: B,D**

Explanation:

At the operational mode prompt on a Junos device, you can use various commands to view the device's status and request system operations. The show interface ge-0/0/0 command is used to display information about a specific interface, while the request system shutdown command is used to properly shut down the device.

The set command is used in configuration mode, not operational mode, and the run command is used to execute operational mode commands from configuration mode.

#### NEW QUESTION # 100

Which protocol is responsible for learning an IPv4 neighbor's MAC address?

- A. Network Address Translation (NAT)
- B. Neighbor Discovery Protocol (NDP)
- C. Address Resolution Protocol (ARP)
- D. Media Access Control Security (MACsec)

**Answer: C**

Explanation:

The Address Resolution Protocol (ARP) is responsible for mapping an IPv4 address to a machine's MAC address. ARP operates at Layer 2 of the OSI model and is used to find the MAC address of a host given its IPv4 address. When a device wants to communicate with another device on the same local network, it uses ARP to discover the recipient's MAC address.

Reference:

Juniper official documentation: ARP.

Networking standards: RFC 826.

#### NEW QUESTION # 101

What will the request system configuration rescue save command do?

- A. It activates the rescue configuration.
- B. It saves the candidate configuration as the rescue configuration.

- C. It saves a configuration version prior to the configuration most recently committed as the rescue configuration.
- **D. It saves the most recently committed configuration as the rescue configuration.**

**Answer: D**

Explanation:

The request system configuration rescue save command in Junos OS saves the most recently committed configuration as the rescue configuration. This rescue configuration can be used to recover the device if future configurations cause issues. It ensures there is a stable, known-good configuration to fall back on, which is crucial in network management and troubleshooting.

Reference:

"rescue : save configurations as the rescue: request system configuration save .....( saves the current configs as a rescue configs )" from Useful Juniper Commands.txt.

Juniper official documentation: Configuring and Activating a Rescue Configuration.

### NEW QUESTION # 102

You are asked to configure your device running Junos OS to automatically archive your configuration upon commit. In this scenario, which two methods are supported by the Junos OS? (Choose two)

- A. FTP
- **B. SCP**
- C. HTTP
- **D. RCP**

**Answer: B,D**

Explanation:

Junos OS supports multiple methods for automatically archiving configurations upon commit. Two of the supported methods are SCP (Secure Copy Protocol) and RCP (Remote Copy Protocol). These methods can be configured to save the configuration files to a remote server automatically whenever a commit is made.

Reference: Juniper Networks Documentation on Configuration Archival

"You can configure Junos OS to automatically archive the configuration using protocols such as SCP and RCP upon commit."

### NEW QUESTION # 103

Which command modifier would you use to see all possible completions for a specific command?

- **A. ?**
- B. detail
- C. |
- D. extensive

**Answer: A**

Explanation:

In Junos OS, the ? command modifier is used to display all possible completions for a specific command. This helps users understand the available options and syntax for a command they are trying to use.

Reference:

"Use the ? command modifier to display all possible completions for a specific command."

### NEW QUESTION # 104

.....

It means that our JN0-105 test questions are very useful for all people to achieve their dreams, and the high quality of our JN0-105 exam prep is one insurmountable problem. If you decide to choose our products as your study tool, you will be easier to pass your exam and get the JN0-105 Certification in the shortest time. So do not hesitate and buy our JN0-105 test torrent, an unexpected surprise is awaiting you, we believe you will prefer to our JN0-105 test questions than other study materials.
