```

Refer to the exhibit, which shows a partial output of diagnose hardware sysinfo memory. Which two statements about the output are true? (Choose two.)

- A. There are 98908 kB of memory that will never be used.
- B. The value indicated next to the inactive heading represents the currently unused cache page.
- C. The I/O cache, which has 641364 kB of memory allocated to it.
- D. The user space has 708880 kB of physical memory that is not used by the system.

정답: A,B

질문 # 61

Refer to the exhibit.

Output of diagnose npu np6 port-list on FortiGate 2000E

Chip	XAUI	Ports	Max Speed	Cross-chip offloading
np6_1	0	port1	1G	No
	0	port5	1G	No
	0	port9	1G	No
	0	port13	1G	No
	0	port17	1G	No
	0	port21	1G	No

-omitted-

A partial output of diagnose npu up6 port-list on FortiGate 2000E is shown.

An administrator is unable to analyze traffic flowing between port1 and port17 using the diagnose sniffer command.

Which two commands allow the administrator to view the traffic? (Choose two.)

- A. 

```
diagnose npu np6 port-list disable 5 17
```
- B. 

```
diagnose npu np6 fastpath disable 1
```
- C. 

```
config firewall policy
edit 5
set auto-asic-offload disable
end
next
edit 17
set auto-asic-offload disable
end
```
- D. 

```
config system npu
set fastpath disable
end
```

정답: B,C

설명:

The administrator cannot see traffic in the sniffer because it is being offloaded to the NPU (NP6). To view the traffic, offloading must be disabled so packets pass through the CPU.

B). config firewall policy ... set auto-asic-offload disable: This is the recommended method to troubleshoot specific traffic. By disabling ASIC offloading in the relevant firewall policies (Policies 5 and 17 in the exhibit), traffic is forced to the CPU and becomes visible to the sniffer.

C). diagnose npu np6 fastpath disable 1: This command temporarily disables the fastpath processing on the specific NP6 processor (ID 1) handling the ports. This forces all traffic handled by that NPU to the CPU, allowing the sniffer to capture it.

Incorrect Options: Option A uses invalid syntax (port-list disable is not a valid command). Option D (config system npu) is not the standard method for granular troubleshooting.

## 질문 # 62

Refer to the exhibit, which shows the omitted output of a session table entry.

```
