Arch-303 Brain Dump Free & Exam Arch-303 Overview

We are leading company and innovator in this Arch-303 exam area. We are grimly determined and confident in helping you pass the Arch-303 exam. With professional experts and brilliant teamwork, our Arch-303 exam dumps have helped exam candidates succeed since the beginning. To make our Arch-303 Practice Engine more precise, we do not mind splurge heavy money and effort to invite the most professional teams into our group. They are the core value and truly helpful with the greatest skills.

Salesforce Certified B2C Commerce Architect Sample Questions (Q50-Q55):

NEW QUESTION # 50
The following promotions are configured with no exclusivity (can be combined with any other promotion) in a -1month campaign:
* Free correct- in -store shipping
* 20% accessories products discount, applies for all customers
* $5 off coupon based discount, sent to a selected group of customers
The combination of above promotions allows customers to get 16 socks for free in store. This was unintended, and the Client If considering disabling the coupon. The Client is concerned about a potential spike in the number of Call Center calls from customers who had the coupon code added to their baskets before it was disabled. As basket lifetime is set to 30 days for all customers, this can continue for the full length of the campaign.
What solution should the Architect suggest to keep the Call Center calls to a minimum?

- A. Disable the coupon code. Email all the customers to not use the coupon code in their baskets.
- B. Disable the coupon code. Restart the production instance from control Center to dear existing baskets.
- C. Disable the coupon code. Reduce the basket lifetime in Business Manager to expire some of the existing baskets
- D. Disable the coupon code. Clear the production cache from the Business Manager to clear existing baskets.

Answer: C

Explanation:
Reducing the basket lifetime is a strategic approach to minimizing the impact of disabling a promotional coupon. This action will

cause baskets that may still contain the now-disabled coupon to expire sooner, thereby reducing the potential volume of calls to the Call Center from customers inquiring about the coupon.

This method also avoids the drastic measure of clearing all existing baskets or restarting the production instance, which could disrupt user experience and lead to further customer dissatisfaction.

NEW QUESTION # 51

The Architect has been presented with a requirement from the business to implement a new LINK cartridge.
The current site is built on the Storefront Reference Architecture, and the LINK cartridge is certified for Pipelines and Controllers.
On review, the Architect notes that the Jobs are all created in Pipelines.
How should the Architect implement that cartridge to make sure the required jobs runs property?

- A. The job Pipelines must be removed and recreated with scripts.
- B. The job Pipelines must be updated to work as custom job steps.
- C. The Job Pipelines must be updated to use SiteGenesis Controllers.
- D. The job Pipelines must be updated to useSFRA Controllers.

Answer: B

Explanation:
For integrating a LINK cartridge that is certified for pipelines and controllers into a system using the Storefront Reference Architecture (SFRA), which primarily uses scripts instead of the older pipeline technology, the architect should update the job pipelines to work as custom job steps. This approach allows the existing LINK cartridge functionalities to be maintained while making them compatible with the SFRA framework. Custom job steps enable more flexibility and the ability to leverage the full capabilities of SFRA, ensuring that the jobs run correctly within the newer architecture.

NEW QUESTION # 52

An Architect is performing an audit of production logs via Log Center and finds some potentially dangerous custom log output.
In which two ways It this log output Improper In a production environment? Choose 2 answers

- A. The log information includes the customer's card CW (card security code) and expiration date, which violates PCI.
- B. The log information includes the customer s cardname as it appears along with the credit card number (PAN), which violates PCI.
- C. The log information includes the order number and customer s email, which violates PCI.
- D. Information logs should not be used in a production environment

Answer: B,C

Explanation:
In a production environment, logging sensitive customer information such as credit card details (PAN, CVV, expiration date) can lead to severe security and compliance issues, specifically violating PCI DSS (Payment Card Industry Data Security Standard) requirements. The standards strictly prohibit the storage of CVV codes and mandate that any PAN displayed must be masked. Storing such data in logs is not only a risk for data breaches but also non-compliance with these standards can lead to penalties.
* Option A: Including the customer's card name along with the full credit card number in logs is a clear violation of PCI DSS requirements, which stipulate that no more than the last four digits of the card number may be displayed.
* Option B: Logging the card security code (CVV) and expiration date is explicitly prohibited by PCI DSS, which requires that sensitive authentication data, including CVV, must never be stored post- authentication, even if it is encrypted.

NEW QUESTION # 53

A client has just pushed a new site live to Production. However during smoketesting. It's found that some customers are not seeing the correct pricing on the Product Detail Page.
What three places would the Architect begin to look for the cause of this Issue?
Choose 3 answers

- A. Check that there was not an error during replication.
- B. Check Log Center
- C. Check the Quota Status page.
- D. Check the Global Preferences to be sure the settings are correct.

- E. Check that the cache is set correctly

Answer: A,D,E

Explanation:
To resolve issues where some customers are not seeing the correct pricing on the Product Detail Page, the following places should be examined:
* Global Preferences (C): It's critical to check the global preferences settings to ensure they align with the intended pricing strategy and configurations. This includes checking currency settings, pricing rules, and tax configurations, which can all influence the pricing displayed to customers.
* Error during replication (D): If there were errors during data replication, this could lead to inconsistencies such as incorrect pricing being shown. Ensuring that data has been replicated correctly and without errors is essential, particularly when moving from staging to production environments.
* Cache settings (E): Incorrect cache settings or outdated cached data can cause old or incorrect pricing to be displayed. Clearing the cache or verifying that cache invalidation rules are correctly set can resolve such issues.
These steps are critical for ensuring that the displayed pricing is accurate and consistent, providing a seamless user experience.

NEW QUESTION # 54
Northern Trail Outfitters uses an Order Management system (OMS), which creates an order tracking number for every order 24 hours after receiving it. The OMS provides only a web-service interface to get this tracking number. There is a job that updates this tracking number for exported orders, which were last modified yesterday.
Part of this jobs code looks like the following:
Based on the above description and code snippet, which coding best practice should the Architect enforce?

- A. Standard order import should be used instead of modifying multiple order objects with custom code.
- B. Post-processing of search results is a bad practice that needs to be corrected.
- C. The transaction for updating of orders needs to be rewritten to avoid problems with transaction size.
- D. Configure circuit breaker and timeout for the OMS web service call to prevent thread exhaustion.

Answer: D

Explanation:
Given that the OMS provides a web-service interface and updates tracking numbers for orders modified the previous day, it is crucial to manage the potential risks of service unavailability or delays that could lead to thread exhaustion in Salesforce Commerce Cloud. Implementing a circuit breaker pattern helps to manage failures gracefully by halting the interaction with the OMS if it becomes unresponsive, thereby preventing the service from impacting the entire system. Additionally, configuring timeouts ensures that the service calls do not hold up resources indefinitely. These strategies help maintain system stability and responsiveness, particularly when dealing with external systems over which there may be limited control.

NEW QUESTION # 55
......

In order to meet different needs of the candidates, three versions for Arch-303 exam materials are available. You can choose the one you prefer for your training. Arch-303 PDF version is printable, and you can print them into hard one if you like. Arch-303 Soft test engine can install in more than 200 personal computers, it also support MS operating system. Arch-303 Online Test engine can is convenient and easy to learn, it supports all web browsers, and you can have a general review of what you have learned through this version.

Salesforce Latest Arch-303 Dumps Ebook You have to spend less time reaching your goals before you can walk ahead and seize more opportunities, Salesforce Latest Arch-303 Dumps Ebook For a flat monthly fee you get access to ALL exam engines, Only for windows systems), one strong point is that PC version of Arch-303 latest dumps can be downloaded again in another computer which seldom providers can meet, Salesforce Latest Arch-303 Dumps Ebook And there is no limitation about the number you installed.
