Charles Sheldon
Charles Sheldon

Which grouping option should you use in Tableau Prep to group all five names automatically?

- A. Pronunciation

- B. Common Characters
- **C. Spelling**
- D. Manual Selection

Answer: C

Explanation:

Tableau Prep's Grouping feature includes various methods to group similar data. The Spelling option is used when the data has small variations in spelling, such as capitalization differences or common typos. Given that the names in the dataset vary in capitalization and punctuation but are spelled correctly, the Spelling grouping option would be the most appropriate choice to automatically group all five names.
