# Verified Official AIGP Practice Test | Easy To Study and Pass Exam at first attempt & Authorized AIGP: IAPP Certified Artificial Intelligence Governance Professional

P.S. Free & New AIGP dumps are available on Google Drive shared by Prep4sures: https://drive.google.com/open?id=1sLAfrAsBnL0GPWTo4GtCkGiWxw0mDR_b

The AIGP exam solutions is in use by a lot of customers currently and they are preparing for their best future on daily basis. Even the students who used it in the past for the preparation of AIGP certification exam have rated our product as one of the best. Candidates of the AIGP exam receive updates till 1 year after their purchase and there is a 24/7 available support system for them that assist them whenever they are stuck in any problem or issues. This product is a complete package and a blessing for people who want to pass the AIGP Exam on the first attempt. Try a free demo if you are interested in the checking features of the product.

IAPP AIGP Exam Syllabus Topics:

Topic	Details
Topic 1	• Understanding How Laws, Standards, and Frameworks Apply to AI: This section of the exam measures skills of compliance officers and covers the application of existing and emerging legal requirements to AI systems. It explores how data privacy laws, intellectual property, non-discrimination, consumer protection, and product liability laws impact AI. The domain also examines the main elements of the EU AI Act, such as risk classification and requirements for different AI risk levels, as well as enforcement mechanisms. Furthermore, it addresses the key industry standards and frameworks, including OECD principles, NIST AI Risk Management Framework, and ISO AI standards, guiding organizations in trustworthy and compliant AI implementation.

Topic 2	• Understanding How to Govern AI Development: This section of the exam measures the skills of AI project managers and covers the governance responsibilities involved in designing, building, training, testing, and maintaining AI models. It emphasizes defining the business context, performing impact assessments, applying relevant laws and best practices, and managing risks during model development. The domain also includes establishing data governance for training and testing, ensuring data quality and provenance, and documenting processes for compliance. Additionally, it focuses on preparing models for release, continuous monitoring, maintenance, incident management, and transparent disclosures to stakeholders.
Topic 3	• Understanding How to Govern AI Deployment and Use: This section of the exam measures skills of technology deployment leads and covers the responsibilities associated with selecting, deploying, and using AI models in a responsible manner. It includes evaluating key factors and risks before deployment, understanding different model types and deployment options, and ensuring ongoing monitoring and maintenance. The domain applies to both proprietary and third-party AI models, emphasizing the importance of transparency, ethical considerations, and continuous oversight throughout the model's operational life.
Topic 4	• Understanding the Foundations of AI Governance: This section of the exam measures skills of AI governance professionals and covers the core concepts of AI governance, including what AI is, why governance is needed, and the risks and unique characteristics associated with AI. It also addresses the establishment and communication of organizational expectations for AI governance, such as defining roles, fostering cross-functional collaboration, and delivering training on AI strategies. Additionally, it focuses on developing policies and procedures that ensure oversight and accountability throughout the AI lifecycle, including managing third-party risks and updating privacy and security practices.

Pass Guaranteed 2026 AIGP: IAPP Certified Artificial Intelligence Governance Professional Accurate Official Practice Test

Knowledge about a person and is indispensable in recruitment. That is to say, for those who are without good educational background, only by paying efforts to get an acknowledged AIGP certification, can they become popular employees. So for you, the AIGP latest braindumps complied by our company can offer you the best help. With our test-oriented AIGP Test Prep in hand, we guarantee that you can pass the AIGP exam as easy as blowing away the dust, as long as you guarantee 20 to 30 hours practice with our AIGP study materials. The reason why we are so confident lies in the sophisticated expert group and technical team we have, which do duty for our solid support.

IAPP Certified Artificial Intelligence Governance Professional Sample Questions (Q147-Q152):

NEW QUESTION # 147
Pursuant to the White House Executive Order of November 2023, who is responsible for creating guidelines to conduct red-teaming tests of AI systems?

- A. National Science and Technology Council (NSTC).
- B. National Institute of Standards and Technology (NIST).
- C. Office of Science and Technology Policy (OSTP).
- D. Department of Homeland Security (DHS).

Answer: B

Explanation:
The White House Executive Order of November 2023 designates the National Institute of Standards and Technology (NIST) as the responsible body for creating guidelines to conduct red-teaming tests of AI systems.
NIST is tasked with developing and providing standards and frameworks to ensure the security, reliability, and ethical deployment of AI systems, including conducting rigorous red-teaming exercises to identify vulnerabilities and assess risks in AI systems.
Reference: AIGP BODY OF KNOWLEDGE, sections on AI governance and regulatory frameworks, and the White House Executive Order of November 2023.

NEW QUESTION # 148

What is the primary purpose of an AI impact assessment?

- A. To anticipate and manage the potential risks and harms of an AI system
- B. To escalate the findings to the appropriate owner(s)
- C. To identify and measure the benefits of an AI system
- D. To determine whether a conformity assessment is needed

Answer: A

Explanation:
The correct answer is D. AI Impact Assessments are primarily used to identify and manage risks and harms associated with AI systems.
From the AIGP Body of Knowledge:
"The goal of an AI impact assessment is to ensure that risks are identified, evaluated, and mitigated prior to or during development and deployment." As further confirmed in the AI Governance in Practice Report 2025 (Part III):
"Risk-based tools like DPIAs and Algorithmic Impact Assessments help identify potential risks to individuals and society, enabling organizations to implement mitigation plans and safeguards." While benefits may be noted in such assessments, the core objective is to manage risks and promote responsible AI.

NEW QUESTION # 149

Scenario:
A large multinational organization is rolling out a company-wide AI governance initiative. To build awareness and support adoption, they are evaluating different ways to train employees and stakeholders across departments, including legal, technical, marketing, and customer-facing roles.
Which of the following typical approaches is a large organization least likely to use to responsibly train stakeholders on AI terminology, strategy and governance?

- A. Providing information and education to customers and users to understand the capabilities and limitations of the AI tools with which they interact
- B. Providing role-specific training, based on whether the organization uses a centralized, federated or decentralized governance model
- C. Providing training on AI ethics, based on the extent to which the organization seeks to promote a responsible AI culture
- D. Providing all technical employees education on AI development so they can retool and participate in the development of AI systems

Answer: D

Explanation:
The correct answer is A. While educating technical staff is important, expecting all technical employees to be retooled as AI developers is unrealistic and not aligned with scalable governance practices.
From the AIGP ILT Guide:
"Training approaches should be role-specific and align with the individual's function and responsibilities...
Organizations typically do not expect every technical role to participate in model development." The AI Governance in Practice Report 2025 supports tailored approaches:
"Cross-functional training should be specific to the individual's role and exposure to AI risk... Role-based education supports scalability and comprehension." Thus, broad development training for all technical employees is the least practical and least likely approach.

NEW QUESTION # 150

What is the most important factor when deciding whether or not to select a proprietary AI model?

- A. Whether its system card identifies risks.
- B. Whether its training data is disclosed.
- C. How frequently it will be updated.
- D. What business purpose it will serve.

Answer: D

Explanation:

Theprimary considerationin selecting any AI system, especially aproprietary model, is itsfit for business purpose. Whether it serves the intended goals is foundational before evaluating technical or governance features.

From theAI Governance in Practice Report 2024:

"AI governance starts with defining the corporate strategy for AI... and aligning systems with business purpose and operational context." (p. 11)

* B, C, Dare relevant for evaluation, but onlyafterconfirming business applicability.

NEW QUESTION # 151

A company developing and deploying its own AI model would perform all of the following steps to monitor and evaluate the model's performance EXCEPT?

- A. Publicly disclosing data with forecasts of secondary and downstream harms to stakeholders.
- B. Establishing a regular schedule for human evaluation of the model's performance, including qualitative assessments.
- C. Implementing a formal incident response plan to address incidents that may occur during system operation.
- D. Setting up automated tools to regularly track the model's accuracy, precision and recall rates in real- time.

Answer: A

Explanation:

While transparency is encouraged,publicly disclosing forecasts of secondary harmsisnot a required or standard practicefor internal performance evaluation. Risk assessments and reporting typically remaininternal or shared with regulators.

From theAI Governance in Practice Report2025:

"Organizations must assess secondary risks... but disclosure is subject to context, regulatory requirements, and risk management discretion." (p. 30)

NEW QUESTION # 152
