## Oracle Order Management Cloud Order to Cash 2025Implementation Professional Sample Questions (Q124-Q129):

### NEW QUESTION # 124

What will happen in the Configurator runtime UI when the LX-Luxury Package option is selected that has the following constraint rules?

- . 'LX-Luxury Package' IMPLIES '8-way Power Driver Seat'
- . 'LX-Luxury Package' IMPLIES '8-way Power Passenger Seat'
- . 'LX-Luxury Package' IMPLIES 'Cloth'

- A. All the options after the IMPLIES keyword will be selected.
- B. '8-way Power Driver Seat' and '8-way Power Passenger Seat' will be selected but 'Cloth' will be excluded.
- C. 8-way Power Driver Seat' will be selected but '8-way Power Passenger Seat' and 'Cloth' will be excluded.
- D. All the options after the IMPLIES keyword will be excluded.
- E. '8-way Power Driver Seat' and 'Cloth' will be selected but '8-way Power Passenger Seat' will be excluded.

### Answer: A

Explanation:

The IMPLIES keyword is used to create a configurator rule that specifies a logical implication between two expressions. The syntax of the IMPLIES keyword is:

expression1 IMPLIES expression2

This means that if expression1 is true, then expression2 must also be true. However, if expression1 is false, then expression2 can be either true or false. In the Configurator runtime UI, the IMPLIES keyword can be used to show or hide options based on the selection of features. For example, the following rule:

'LX-Luxury Package' IMPLIES '8-way Power Driver Seat'

means that if the LX-Luxury Package feature is selected, then the 8-way Power Driver Seat option must also be selected. However, if the LX-Luxury Package feature is not selected, then the 8-way Power Driver Seat option can be either selected or not selected.

Therefore, when the LX-Luxury Package option is selected, all the options after the IMPLIES keyword will be selected, according to the constraint rules. This means that the 8-way Power Driver Seat, the 8-way Power Passenger Seat, and the Cloth options will be selected.

The order manager in your company likes to monitor order delivery commitments in real time for customers.

Identify the Order Management Oracle Transactional Business Intelligence (OTBI) dashboard that can be used to get all possible root causes for orders that are not fulfilled on time.

- A. Orders on Backorder
- B. **Orders on Past Due**
- C. Orders in Jeopardy
- D. Fulfillment line in Jeopardy
- E. Orders on Hold

**Answer: B**

Explanation:

Orders in jeopardy - Details - The Fulfillment Lines in Jeopardy Analysis shows the number of fulfillment lines that are in jeopardy, using a bar for each jeopardy priority that you have defined. For example, a range can indicate high, medium, or low jeopardy priorities. You can click a range bar to drill down to the Manage Fulfillment Lines page, which displays a list of fulfillment lines restricted to the exception type that corresponds to that range, as indicated by an icon in the Exception Type column.

Orders on Past Due - Details and allows filtering based upon :

#Year

#Inventory Organization Name

#Item Name

#Business Unit Name

#Bill-to Customer Name

#Ship-to Customer Name

So Past due seems to give root cause details while Jeopardy gives ranges
