NEW QUESTION # 25

- A. Articulate the vision, identify the Redwood Page templates, understand the problem, add the detail and refine the design, specify the design for development, and monitor engagement in the real world
- B. Understand the problem, articulate the vision, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world

- D. Understand the statement, articulate the problem, identify the Redwood Page templates to use, add the detail and refine the design, specify the design for development, and monitor engagement in the real world

Answer: B

Explanation:
Full Detailed in Depth Explanatio n:
The Redwood design process, as outlined in Oracle's Redwood documentation, follows a structured approach to ensure a user-centered and iterative design. The correct sequence starts with "Understand the problem" (to define the challenge), followed by "Articulate the vision" (to set goals), "Identify the Redwood Page templates to use" (to select appropriate patterns), "Add the detail and refine the design" (to iterate), "Specify the design for development" (to hand off to developers), and "Monitor engagement in the real world" (to evaluate post-launch). Option D reflects this logical flow. Option A reverses the initial steps, Option B uses incorrect terminology ("Understand the statement"), and Option C misorders understanding the problem after template selection, which disrupts the process.
