C-S4PM-2504 Actual Dump, New C-S4PM-2504 Exam Name

ExamPrepAway is concentrating on the reform on the C-S4PM-2504 training material that our candidates try to get aid with. We own the profession experts on compiling the C-S4PM-2504 exam guide and customer service on giving guide on questions from our clients. Our C-S4PM-2504 preparation materials contain three versions: the PDF, the Software and the APP online. They give you different experience on trying out according to your interests and hobbies. And they can assure your success by precise and important information on your C-S4PM-2504 Exam.

SAP C-S4PM-2504 Exam Syllabus Topics:

Topic	Details
Topic 1	• SAP Activate Methodology: This section of the exam measures skills of Business Process Architects and covers the structure and practical application of SAP Activate. It includes understanding the phases of the methodology: Discover, Prepare, Explore, Realize, Deploy, and Run, and the use of supporting tools such as SAP Roadmap Viewer and SAP Best Practices. Candidates are expected to demonstrate the ability to apply this methodology to streamline cloud implementation processes and ensure agile delivery.
Topic 2	• SAP S • 4HANA Cloud Public Edition Implementation: This section of the exam measures the skills of Implementation Consultants and covers the foundational aspects of deploying SAP S • 4HANA Cloud Public Edition in a business environment. It focuses on understanding system architecture, scope definition, and the technical and functional setup required for a successful implementation. The candidate is expected to have a strong grasp of how to execute the necessary configuration and adoption tasks that align with customer-specific requirements.
Topic 3	• Project Management • Organizational Change Management (OCM): This section of the exam measures the skills of Project Managers and covers the key principles of managing SAP cloud implementation projects, including team coordination, stakeholder communication, and change management. It evaluates the ability to lead project activities, manage expectations, and handle resistance during digital transformation. Emphasis is placed on aligning organizational goals with implementation strategies to ensure effective user adoption and project success.

SAP Certified Associate - Managing SAP S/4HANA Cloud Public Edition Projects Sample Questions (Q65-Q70):

NEW QUESTION # 65

In the SAP Activate run phase the new system is monitored, maintained, and optimized to ensure it runs smoothly and efficiently. Which change management activity can only be realized in the run phase of the cloud implementation?

- A. Measurement of actual user adoption metrics
- B. Mapping of SAP roles to employees
- C. Development of the user adoption strategy
- D. Conduction of a pulse check

Answer: A

NEW QUESTION # 66

In which phase do you verify the SAP Best Practices content that meets the customer's business needs, and capture delta requirements? Note: There are 2 correct answers to this question.

- A. Discovery
- B. Explore
- C. Realize
- D. Prepare

Answer: B,D

NEW QUESTION # 67

What are some purposes of using Business Driven Configuration Questionnaires (BDCQs) during the implementation of SAP S/4HANA Cloud Public Edition?

Note: There are 2 correct answers to this question.

- A. To reduce the need for customer involvement
- B. To suggest new features in the SAP S/4HANA Cloud, Public Edition solution
- C. To ensure the appropriate level of business context for the Fit-to-Standard workshop
- D. To gather configuration values and validate solution fit

Answer: C,D

NEW QUESTION # 68

When doing a new implementation on premise or private cloud, which system is recommended to demonstrate standard functionality in the Explore phase?

- A. Development
- B. Trial
- C. Starter
- D. Sandbox

Answer: D

Explanation:

In the Explore phase of a new implementation for SAP S/4HANA on-premise or Private Cloud, a system is used to demonstrate standard functionality, typically SAP Best Practices, to validate the solution fit during Fit- to-Standard workshops.

* Option A: DevelopmentIncorrect. The Development system is used for configuration and custom development in the Realize phase, not for demonstrating standard functionality. TheSAP S/4HANA Implementation Guidestates, "Development systems are for building and testing configurations, not for demonstrating standard processes in the Explore phase."

* Option B: StarterIncorrect. The Starter system is specific to SAP S/4HANA Cloud Public Edition, not on-premise or Private Cloud implementations. TheSAP S/4HANA Cloud Study Guidenotes, "The Starter system is used in Cloud Public Edition, while on-premise or Private Cloud uses other systems for exploration."

* Option C: SandboxCorrect. The Sandbox system is recommended for demonstrating standard functionality inon-premise or Private Cloud implementations during the Explore phase. TheSAP Activate Methodology Guideexplains, "For new implementations of SAP S/4HANA on-premise or Private Cloud, the Sandbox system is used in the Explore phase to demonstrate standard functionality and support Fit-to-Standard workshops."

* Option D: TrialIncorrect. Trial systems are for evaluation or training, not for active implementation.

TheSAP S/4HANA Implementation Guideclarifies, "Trial systems are for exploration outside of implementation projects, not for demonstrating standard functionality during the Explore phase." Extract from Official Documentation:

* SAP Activate Methodology Guide(SAP Community,<https://community.sap.com>): "In the Explore phase for SAP S/4HANA on-premise or Private Cloud, the Sandbox system is recommended to demonstrate standard functionality, enabling Fit-to-Standard workshops to validate the solution fit."

* SAP S/4HANA Implementation Guide(SAP Help Portal,<https://help.sap.com>): "The Sandbox system is used in on-premise or Private Cloud implementations to showcase SAP Best Practices and standard functionality during the Explore phase, supporting requirement validation." Additional Context:

The Sandbox system's role in on-premise and Private Cloud implementations mirrors the Starter system's role in Public Cloud, providing a safe environment to explore standard processes without impacting development or production systems. This aligns with SAP Activate's focus on early validation to minimize customizations.

SAP Help Portal: SAP S/4HANA Implementation Guide (<https://help.sap.com>).

SAP Community: SAP Activate Methodology Guide (<https://community.sap.com>).

SAP S/4HANA Cloud Study Guide: Details system roles.

SAP Activate Methodology: Outlines Explore phase systems.

NEW QUESTION # 69

When should you run Digital Discovery Assessments of an SAP S/4HANA Cloud Public Edition implementation project?

- A. During the Discover phase
- B. After each upgrade

- Answer: A**
