HCL-DOM-AADM-12 Labs, HCL-DOM-AADM-12 Trustworthy Exam Torrent

Our company has forged a group of professional experts with the excelsior craftsmanship and a mature service system. The quality of our HCL-DOM-AADM-12 latest question is high because our expert team organizes and compiles them according to the real exam's needs and has extracted the essence of all of the information about the test. So our HCL-DOM-AADM-12 Certification tool is the boutique among the same kinds of the study materials. Our assiduous pursuit for high quality of our HCL-DOM-AADM-12 exam prep creates our top-ranking HCL-DOM-AADM-12 test guide and constantly increasing sales volume.

HCL Software Academy HCLSoftware Certified Associate Administrator Exam - Notes/Domino 12 Sample Questions (Q62-Q67):

NEW QUESTION # 62

Which directory must be referenced for Domino servers to authenticate users in a multi-domain environment?

- A. ID Vault registry
- B. daoscat.nsf
- C. Directory Assistance database
- D. domino.key

Answer: C

Explanation:

In a complex environment where users are spread across multiple Domino domains or external LDAP directories, a single local Domino Directory is insufficient for authentication. The Directory Assistance database acts as a pointer that tells the Domino server where to look for user credentials when they are not found in the primary local directory (names.nsf). This allows for authentication and name lookups across an entire organization, regardless of which domain the user belongs to.

NEW QUESTION # 63

What is the role of the Domino Domain Monitoring (DDM) feature?

- A. To centralize event collection and monitoring across servers
- B. To replicate directory entries across domains
- C. To encrypt all SMTP mail messages

Answer: A

Explanation:

Domino Domain Monitoring (DDM) is designed to give administrators a high-level view of the health of their entire infrastructure. Its primary role is to centralize event collection and monitoring across servers within a domain. By using specialized probes, DDM gathers status information from various servers and aggregates the data into a single database (ddm.nsf), allowing administrators to identify and resolve issues from one central location.

Here is the next batch of questions (51-60) from your provided list, strictly following the requested formatting and verified for the HCL-DOM-AADM-12 exam.

NEW QUESTION # 64

Which two tasks can an administrator perform from the People & Groups tab of the Domino Administrator Client? (Choose two)

- A. Register new users
- B. View DAOS objects
- C. View system resource usage
- D. Create groups

Answer: A,D

Explanation:

The People & Groups tab is the primary management interface for directory objects in HCL Domino.

Administrators use this tab to manage the lifecycle of identities, specifically for registering new users into the Domino Directory and creating groups. Groups are essential for defining mail distribution lists and managing security access levels across the domain. System resource monitoring and DAOS management are typically handled in the Server and Files tabs, respectively.

NEW QUESTION # 65

Which database is used by Domino to store DDM event data?

- A. admin4.nsf
- B. events4.nsf
- C. names.nsf
- D. ddm.nsf

Answer: D

Explanation:

Domino Domain Monitoring (DDM) is a feature that centralizes the monitoring of multiple servers within a domain. All event data generated by DDM-such as probes that check server health or security-is stored in the ddm.nsf (Domino Domain Monitoring) database. Administrators use this database to view reports, track trends, and identify specific issues that require attention across their entire server infrastructure.

NEW QUESTION # 66

Which Domino server task should be used to enforce message delivery limits and control mail flow?

- A. Router
- B. MailTracker
- C. MailConvert
- D. AdminP

Answer: A

Explanation:

The Router task is the engine responsible for the delivery and transfer of all mail in the Domino system.

Because it manages the mail box and determines the delivery path for every message, it is also the task that enforces message delivery limits - such as maximum message size - and controls mail flow based on the configurations set in the Configuration Settings document.

NEW QUESTION # 67

.....

Exam4Tests is one of the most reliable platforms to get actual HCL Software Academy HCL-DOM-AADM-12 dumps. It offers the latest and valid real HCL Software Certified Associate Administrator Exam - Notes/Domino 12 (HCL-DOM-AADM-12) exam dumps.
