

CIS-PA Exam Prep & CIS-PA Study Materials & CIS-PA Actual Test

P.S. Free 2026 ServiceNow CIS-PA dumps are available on Google Drive shared by ITdumpsfree: <https://drive.google.com/open?id=1mPHMnWv2IXyRRbY0bi01sYJLbsAHHRM>

Free demos of ITdumpsfree CIS-PA exam questions are available which you can download easily. Just choose the right ITdumpsfree CIS-PA exam questions format and download the CIS-PA exam product demo free of cost. Check the top features of CIS-PA Exam Questions and if you feel that the ITdumpsfree Certified Implementation Specialist - Platform Analytics (CIS-PA) certification exam practice material can work with you then take your buying decision and download it accordingly. Best of luck!!!

ServiceNow CIS-PA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Perform Diagnostics and Troubleshooting
Topic 2	<ul style="list-style-type: none">• Configure Indicators and Indicator Sources: This domain addresses creating and configuring indicators (performance metrics), including source conditions, fact tables, indicator types, properties, and aggregation scripts.
Topic 3	<ul style="list-style-type: none">• This section addresses identifying and resolving issues using Spotlight diagnostic tools to monitor system health and performance.
Topic 4	<ul style="list-style-type: none">• Data Collection: This domain explains how Performance Analytics gathers and processes data, including collection flow, configuration properties, and troubleshooting collection issues.
Topic 5	<ul style="list-style-type: none">• Architecture and Deployment: This domain covers the foundational components of the Performance Analytics solution and the proper deployment sequence in ServiceNow environments.
Topic 6	<ul style="list-style-type: none">• Data Visualization: This section focuses on presenting data through widgets, interactive filters, appropriate visualizations, dashboards, and analyzing data using Analytics Hub and KPI Details.

CIS-PA Exam Valid Exam Question- Updated CIS-PA Exam Overviews Pass Success

With the rapid development of the world economy and frequent contacts between different countries, the talent competition is increasing day by day, and the employment pressure is also increasing day by day. Our company provides three different versions to choice for our customers. The software version of our CIS-PA exam question has a special function that this version can simulate test-taking conditions for customers. If you feel very nervous about exam, we think it is very necessary for you to use the software

version of our CIS-PA Guide Torrent. The simulated tests are similar to recent actual exams in question types and degree of difficulty. By simulating actual test-taking conditions, we believe that you will relieve your nervousness before examination.

ServiceNow Certified Implementation Specialist - Platform Analytics Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which property indicates the recommended evaluation date for a Target?

- A. End Date
- B. Improvement Date
- C. Review Date
- D. Baseline Date

Answer: C

Explanation:

In Platform Analytics, a Target defines the desired performance level for an indicator. The Review Date property specifies the recommended date to evaluate progress toward that target. This date is used for governance and performance review purposes, helping stakeholders determine when to assess whether the indicator is trending appropriately toward its goal. The Baseline Date marks the starting point for measurement, while the End Date defines when the target expires or is no longer valid. The Improvement Date indicates when improvement efforts begin, not when performance should be evaluated. ServiceNow documentation clearly identifies the Review Date as the point in time when the target's effectiveness and achievement should be assessed, making option D the correct answer.

NEW QUESTION # 55

Which user should you run Data Collections as?

- A. A dedicated Performance Analytics service account
- B. Platform Analytics Admin
- C. Maintenance account (maint)
- D. System Administrator

Answer: A

Explanation:

ServiceNow best practice recommends running Performance Analytics data collections using a dedicated service account specifically created for analytics processing. This ensures consistent permissions, predictable access to data, and improved auditability.

Running collections as individual admins can introduce permission inconsistencies if roles change. The maint account is intended for system upgrades and maintenance, not scheduled analytics jobs. A dedicated Performance Analytics service account minimizes operational risk and aligns with ServiceNow security and governance guidelines.

ServiceNow documentation emphasizes the importance of service accounts for background processing, making option C the correct and recommended choice.

NEW QUESTION # 56

Where are Next Experience Dashboards and Data Visualizations created?

- A. In the Analytics Hub
- B. In the Analytics Center
- C. In Analytics Administration
- D. In Reports Administration

Answer: B

Explanation:

Analytics Center is the workspace used to create and manage Next Experience Dashboards and Data Visualizations. It provides a unified interface for building modern, interactive analytics experiences, including metric visualizations, time series, breakdown views, and dashboards.

Analytics Hub is primarily used for viewing and exploring existing analytics, not creating them. Reports Administration and Analytics Administration serve different purposes and do not support Next Experience dashboard creation. ServiceNow documentation explicitly identifies Analytics Center as the creation and management environment for Next Experience analytics content, making option D the correct answer.

NEW QUESTION # 57

When are Additional conditions of an Indicator evaluated during Data Collection?

- A. At the same time as the Indicator Source conditions
- B. When the Indicator is viewed in the Analytics Hub
- C. Before the Indicator Source conditions
- **D. After the Indicator Source conditions**

Answer: D

Explanation:

During data collection, Platform Analytics first applies the Indicator Source conditions to retrieve the base dataset. Once the source data is identified, the system then evaluates the Additional conditions defined on the Indicator itself.

This separation allows indicator-specific filtering without duplicating logic in the indicator source, supporting reuse and performance optimization. Additional conditions do not run in parallel with source conditions and are not evaluated at visualization time.

ServiceNow documentation explicitly explains that Indicator conditions refine the dataset after the source query executes, making option D the correct answer.

NEW QUESTION # 58

What is an example of how Platform Analytics can help achieve the goal of reducing IT spending by 10%?

- A. By automating password resets for users
- B. By generating comprehensive asset cost reports and importing them
- **C. By breaking down incident resolution costs and identifying areas to optimize**
- D. By conducting user satisfaction surveys to identify areas for improvement

Answer: C

Explanation:

Platform Analytics helps reduce IT spending by enabling cost visibility, trend analysis, and optimization insights. Breaking down incident resolution costs allows organizations to identify high-cost incident categories, inefficient processes, or teams with unusually long resolution times. By correlating cost data with performance indicators, leaders can make data-driven decisions to streamline workflows, reduce rework, and optimize resource allocation.

User satisfaction surveys (option A) provide qualitative feedback but do not directly measure or reduce costs.

Importing asset cost reports (option B) is a reporting or data integration activity, not an analytics-driven optimization approach.

Automating password resets (option D) is an operational improvement but does not directly leverage Platform Analytics capabilities.

ServiceNow documentation emphasizes that Platform Analytics supports strategic objectives such as cost reduction by revealing inefficiencies through indicators, breakdowns, and historical trend analysis-making option C the correct answer.

NEW QUESTION # 59

.....

The online version of CIS-PA quiz torrent is based on web browser usage design and can be used by any browser device. The first time you use CIS-PA test preps on the Internet, you can use it offline next time. CIS-PA learn torrent does not need to be used in a Wi-Fi environment, and it will not consume your traffic costs. You can practice with CIS-PA Quiz torrent at anytime, anywhere. On the other hand, the online version has a timed and simulated exam function.
