

# Valid NSE5\_SSE\_AD-7.6 Exam Preparation & Leading Offer in Qualification Exams & Effective Fortinet Fortinet NSE 5 - FortiSASE and SD-WAN 7.6 Core Administrator

DOWNLOAD the newest ActualTestsQuiz NSE5\_SSE\_AD-7.6 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=13\\_NB\\_2VuDVAwsjQ6A7XrBJCR2IaPjRk6](https://drive.google.com/open?id=13_NB_2VuDVAwsjQ6A7XrBJCR2IaPjRk6)

As you can see, our NSE5\_SSE\_AD-7.6 practice exam will not occupy too much time. Also, your normal life will not be disrupted. The only difference is that you harvest a lot of useful knowledge. Do not reject learning new things. Maybe your life will be changed a lot after learning our NSE5\_SSE\_AD-7.6 Training Questions. And a brighter future is waiting for you. So don't waste time and come to buy our NSE5\_SSE\_AD-7.6 study braindumps.

## Fortinet NSE5\_SSE\_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• SASE Deployment: This domain covers FortiSASE administration settings, user onboarding methods, and integration with SD-WAN infrastructure.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Decentralized SD-WAN: This domain covers basic SD-WAN implementation including configuring members, zones, and performance SLAs to monitor network quality.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Rules and Routing: This section addresses configuring SD-WAN rules and routing policies to control and direct traffic flow across different links.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Secure Internet Access (SIA) and Secure SaaS Access (SSA): This section focuses on implementing security profiles for content inspection and deploying compliance rules to managed endpoints.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Analytics: This domain covers analyzing SD-WAN and FortiSASE logs to monitor traffic behavior, identify security threats, and generate reports.</li></ul>

## Certification NSE5\_SSE\_AD-7.6 Exam Dumps & Exam NSE5\_SSE\_AD-7.6 Materials

If you search reliable exam collection materials on the internet and find us, actually you have found the best products for your NSE5\_SSE\_AD-7.6 certification exams. We are famous for the high pass rate of our NSE5\_SSE\_AD-7.6 exam materials, that's

why many old customers trust us and choose us directly before they have NSE5\_SSE\_AD-7.6 Exams to attend. Before purchasing we can provide free PDF demo for your downloading so that you can know our product quality deeper and you can purchase NSE5\_SSE\_AD-7.6 study guide clearly not only replying on your imagination.

## Fortinet NSE 5 - FortiSASE and SD-WAN 7.6 Core Administrator Sample Questions (Q51-Q56):

### NEW QUESTION # 51

Which authentication method overrides any other previously configured user authentication on FortiSASE?

- A. SSO
- B. Local
- C. MFA
- D. RADIUS

**Answer: A**

Explanation:

In FortiSASE, SSO authentication takes precedence over all other configured authentication methods. When SSO is enabled, it overrides local, RADIUS, and MFA user authentication settings.

### NEW QUESTION # 52

Which three reports are valid report types in FortiSASE? (Choose three.)

- A. Shadow IT Report
- B. Cyber Threat Assessment
- C. Endpoint Compliance Deviation Report
- D. Vulnerability Assessment Report
- E. Web Usage Summary Report

**Answer: A,D,E**

### NEW QUESTION # 53

Which two methods are available for provisioning FortiClient on endpoints using FortiSASE? (Choose two.)

- A. FortiClient can be provisioned using installers with an invitation code from the FortiSASE portal, SCCM or GPO, or mobile device management (MDM) software.
- B. FortiClient can be provisioned by distributing the installer to end users for manual installation.
- C. FortiClient can be provisioned only by distributing installers to end users through the FortiSASE portal without an invitation code.
- D. FortiClient can be provisioned using SCCM or GPO, but only through an external portal, not the FortiSASE portal.
- E. FortiClient provisioning is limited to using mobile device management MDM software or manual installation without requiring an invitation code.

**Answer: A,B**

Explanation:

Administrators can distribute the FortiClient installer for manual installation on endpoints.

FortiClient can also be provisioned using installers embedded with an invitation code, distributed through SCCM, GPO, or MDM solutions via the FortiSASE portal.

### NEW QUESTION # 54

Refer to the exhibit. An administrator is troubleshooting SD-WAN on FortiGate. A device behind branch1\_fgt generates traffic to the 10.0.0.0/8 network.

The administrator expects the traffic to match SD-WAN rule ID 1 and be routed over HUB1-VPN1.

However, the traffic is routed over HUB1-VPN3.

Based on the output shown in the exhibit, which two reasons, individually or together, could explain the observed behavior? (Choose two.)

### Diagnose output

```
fgt_A # diagnose sys sdwan service4

Service(1): Address Mode(IPV4) flags=0x4200 use-shortcut-sla use-shortcut
Tie break: cfg
Shortcut priority: 2
Gen(8), TOS(0x0/0x0), Protocol(0): src(1->65535), Mode(sla), sla-compare-order
Members(3):
  1: Seq_num(4 HUB1-VPN1 HUB1), alive, sla(0x1), gid(0), cfg_order(0), local cost(0), selected
  2: Seq_num(6 HUB1-VPN3 HUB1), alive, sla(0x1), gid(0), cfg_order(1), local cost(0), selected
  3: Seq_num(5 HUB1-VPN2 HUB1), alive, sla(0x1), gid(0), cfg_order(2), local cost(0), selected
Src address(1):
  10.0.1.0-10.0.1.255

fgt_A # diagnose sys sdwan member | grep HUB1
Member(4): transport-group: 0, interface: HUB1-VPN1, flags=0xd may_child, gateway: 100.64.1.1, peer:
192.168.1.29, source 192.168.1.1, priority: 15 1024, weight: 0
Member(5): transport-group: 0, interface: HUB1-VPN2, flags=0xd may_child, gateway: 100.64.1.9, peer:
192.168.1.61, source 192.168.1.33, priority: 10 1024, weight: 0
Member(6): transport-group: 0, interface: HUB1-VPN3, flags=0xd may_child, gateway: 172.16.1.5, peer:
192.168.1.93, source 192.168.1.65, priority: 1 1024, weight: 0

fgt_A # get router info routing-table all | grep HUB1
S   10.0.0.0/8 [10/0] via HUB1-VPN3 tunnel 172.16.1.5, [1/0]
B   10.0.3.0/24 [200/0] via 192.168.1.2 [3] (recursive is directly connected, HUB1-VPN1), 04:11:41,
[1/0]
           [200/0] via 192.168.1.34 [3] (recursive is directly connected, HUB1-VPN2), 04:11:41,
[1/0]
B   10.1.0.0/24 [200/0] via 192.168.1.29 (recursive via HUB1-VPN1 tunnel 100.64.1.1), 04:11:42. [1/0]
           [200/0] via 192.168.1.61 (recursive via HUB1-VPN2 tunnel 100.64.1.9), 04:11:42. [1/0]
           [200/0] via 192.168.1.93 (recursive via HUB1-VPN3 tunnel 172.16.1.5), 04:11:42. [1/0]
```

- A. HUB1-VPN3 has a higher member configuration priority than HUB1-VPN1.
- B. HUB1-VPN1 does not have a valid route to the destination.
- C. The traffic matches a regular policy route configured with HUB1-VPN3 as the outgoing device.
- D. HUB1-VPN3 has a lower route priority value (higher priority) than HUB1-VPN1.

Answer: B,C

Explanation:

## Key Routing Principles

1. SD-WAN rules are policy routes
2. Regular policy routes have precedence over SD-WAN rules
3. Route lookup is done for new and dirty sessions
  - For original and reply traffic
  - Includes policy route lookup
4. SD-WAN rules are skipped if:
  - Best route to destination isn't an SD-WAN member
  - None of the members have a valid route to destination
    - If the preferred member doesn't have a valid route to destination, the next member in the rule is checked
5. Implicit SD-WAN rule equals standard forwarding information base (FIB) lookup
  - If lookup matches ECMP routes, traffic is load balanced using the configured algorithm

## NEW QUESTION # 55

How is the Geofencing feature used in FortiSASE? (Choose one answer)

- A. To encrypt data at rest on mobile devices in specific countries.
- B. To restrict access to applications based on the time of day in specific countries.
- **C. To allow or block remote user connections to FortiSASE POPs from specific countries.**
- D. To monitor user behavior on websites and block non-work-related content from specific countries

**Answer: C**

Explanation:

According to the FortiSASE 7.6 Administration Guide and the FCP - FortiSASE 24/25 Administrator study materials, the Geofencing feature is a security measure implemented at the edge of the FortiSASE cloud to control ingress connectivity based on the physical location of the user.

\* Access Control by Location (Option A): Geofencing allows administrators to allow or block remote user connections to the FortiSASE Points of Presence (PoPs) based on the source country, region, or specific network infrastructure (e.g., AWS, Azure, GCP).

\* Scope of Application: This feature is universal across all SASE connectivity methods. It applies to Agent-based users (FortiClient), Agentless users (SWG/PAC file), and Edge devices (FortiExtender / FortiAP). If a user attempts to connect from a blacklisted country, the connection is dropped at the PoP level before the user can even attempt to authenticate.

\* Use Case Example: An organization operating exclusively in North America might configure geofencing to block all connections originating from outside the US and Canada. This significantly reduces the attack surface by preventing brute-force or unauthorized access attempts from high-risk regions or countries where the organization has no legitimate employees.

\* Configuration Path: In the FortiSASE portal, this is managed under Configuration > Geofencing.

From there, administrators can create an "Allow" or "Deny" list and select the relevant countries from a standardized global database.

Why other options are incorrect:

\* Option B: While FortiSASE supports Time-based schedules for firewall policies, geofencing is specifically an IP-to-Geography mapping tool for connection admission, not a time-of-day restriction tool.

\* Option C: Encryption of data at rest on mobile devices is a function of an MDM (Mobile Device Management) solution or local OS features (like FileVault or BitLocker), not a SASE network geofencing feature.

\* Option D: Monitoring web behavior and blocking non-work content is the role of the Web Filter and Application Control profiles, which operate on the traffic after the connection is allowed by geofencing.

## NEW QUESTION # 56

.....

Our ActualTestsQuiz aims at helping you reward your efforts on preparing for NSE5\_SSE\_AD-7.6 exam. If you don't believe it, you can try our product demo first; after you download and check our NSE5\_SSE\_AD-7.6 free demo, you will find how careful and professional our Research and Development teams are. If you are still preparing for other IT certification exams except NSE5\_SSE\_AD-7.6 Exam, you can also find the related exam dumps you want in our huge dumps and study materials.
