Candidates who pass the exam

receive a certificate that validates their skills and knowledge, which can help them advance their careers in the field of IBM mainframe administration.

IBM Db2 12 for z/OS Administrator Sample Questions (Q58-Q63):

NEW QUESTION # 58

DB2A and DB2B are in the same data sharing group on separate LPARs. There are two coupling facilities CF01 and CF02. CF01 contains the Lock and SCA structures and CF02 contains the GBP structures. The group buffer pools are not duplexed. The structures can reside on either CF01 or CF02 as specified in the CRFM policy PREFLIST and AUTOREC is set to YES. CF02 fails and DB2A or DB2B can no longer connect to it. Once they are able to reconnect, what action is necessary in order to minimize loss of data availability?

- A. No action is needed. Each member performs automatic GRECP recovery
- B. No action is needed. The GBP structures are automatically rebuilt in CF02
- C. Manually rebuild the GBP structures on CF01
- D. Stop members DB2A and DB2B and initiate a group restart

Answer: C

NEW QUESTION # 59

Which of the following can be accomplished by altering a table to use column access control?

- A. Modify the values returned for table columns based on column masking definitions
- B. Restrict the access to specific rows for all or some users
- C. Pre-materialize a view with the changed values provided by the column mask
- D. Hide column definitions from the DB2 catalog table SYSIBM.SYSCOLUMNS

Answer: A

NEW QUESTION # 60

Which of the following is TRUE about the SYSCTRL authority?

- A. It is designed to be an administrator in a system with sensitive data
- B. It is designed so group privileges cannot be granted to SYSCTRL
- C. It is designed to allow access to all data directly in DB2
- D. It is designed not to be a part of the administrative authorizations

Answer: A

Explanation:

The SYSCTRL authority is designed for administering a system that contains sensitive data. With the SYSCTRL authority, you have nearly complete control of the DB2 subsystem. However, you cannot access user data directly unless you are explicitly granted the privileges to do so.

NEW QUESTION # 61

One DB2 catalog page set is corrupt and needs to be recovered to current. Which of the following is TRUE?

- A. The corrupt page set, and all of the page sets that are required prior to this, must be recovered in a certain order
- B. The catalog always needs to be recovered as a whole in a certain order
- C. Only the corrupt page set needs to be recovered
- D. The catalog and directory always needs to be recovered as a whole in a certain order

Answer: B

NEW QUESTION # 62

What action will enable most new functions in DB2 12?

- Answer: C**
