- D. Shared accounts are only used by administrators.

Answer: B

Explanation:

According to Requirement 8.2.1, PCI DSS mandates that all users be assigned a unique ID before accessing system components or cardholder data. This ensures accountability, enabling identification of actions taken by each user.

* Option A:#Incorrect. Password strength is addressed under Requirement 8.3, not unique ID.

* Option B:#Incorrect. Shared accounts are prohibited regardless of admin status.

Testing Requirements

- * Methods include network scans, configuration reviews, and traffic analysis to verify the segmentation is functioning as intended.

Incorrect Options
